Thousands of hours of groundbreaking laboratory and field research have gone into the product you are holding. Motomco Mole Killer has been carefully designed to mimic a mole’s most common natural food source - earthworms and grubs. Moles may consume a lethal dose in a single feeding, but it may take two or more days from the time of bait consumption for moles to die.

**How to Use Motomco Mole Killer**

1. **Verify Active Runways**
   - Use your finger, small wooden dowel or a probe, such as a pencil, to locate holes or openings and mark the location.
   - Make a hole in the runway, ensuring that the worm should be larger than the diameter of the bait.
   - Drop one worm into the runway. The worm should not be exposed.

2. **Bait Active Runways**
   - Repeat bait application every 5-10 feet of each active subsurface runway.
   - Add bait to the grass above them turns yellow. Conical mounds may be indicative of the location of deeper main underground runways.

3. **Determine Baiting Results**
   - Five (5) to 7 days after bait application, check for mole activity using the same procedure for determining tunnel location. Return 48-72 hours later and retreat all active runs.

**Use Restrictions**
- 3. Dispose of product container and unused or spoiled product as specified on label.
- 2. Follow all application directions and **USE RESTRICTIONS** on this label. Apply bait only in underground runways of moles. Keep out of reach of children and pets.
- 1. Store product not in use in locations out of the reach of children and pets.

**Precautionary Statements**
- **HAZARDS TO HUMANS AND DOMESTIC ANIMALS**
  - Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Do not get on food or food preparation areas. Do not contaminate water, food or feed by storage or disposal.

**Storing and Disposal**
- Keep container closed and store in a dry, cool area.
- **DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Do not expose children to this product or use it for any purpose other than to control moles.
