Kaput-D

POCKET
Gopher BAIT

This product may be used only to kill pocket gophers in manual, below-ground applications.

NET WT. 30 LBS. (13.6 kg)

ACTIVE INGREDIENT:
Diphacinone: (CAS No. 82-66-6) ................................................ 0.005%
OTHER INGREDIENTS ................................................................. 99.995%
TOTAL ..................................................................................... 100.000%

Keep Out of Reach of Children

CAUTION.
Harmful if swallowed. See back panel for First Aid and additional Precautionary Statements.
READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact the National Poison Information Center at 1-800-222-1222 for emergency medical treatment information.

If Swallowed: Immediately call a poison control center or doctor for treatment advice. Have person sip a glass of water or other liquid to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on Skin or Clothing: Take off contaminated clothing.

TREATMENT FOR PET POISONING
If animal eats bait, call veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN
Contains the anticoagulant Diphacinone. If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. For humans or animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K-1.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

CAUTION
Hazardous if swallowed. Stay out of reach of children. Causes moderate eye irritation. Do not get on skin or clothing. Keep away from children, domestic animals and pets.

Personal Protective Equipment (PPE)
All handlers (including applicators) must wear long-sleeved shirt and long pants, socks and shoes, and chemical-resistant gloves (such as or made of any waterproof material, selection category A). Any person who enters carcasses or unused bait after application of this product must wear gloves.

User Safety Requirements
Follow manufacturer's instructions for cleaning/maintaining PPE. Promptly wash all soiled and contaminated surfaces with soap and water.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds and other wildlife. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or residue.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its label.

Apply this product only for the sites, pests and application methods specified on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:
1. Store product not in use, not in a location where children can reach and pets can get to it.
2. Apply bait in locations out of the reach of children and pets, domestic animals and non-target wildlife.
3. Dispose of product container and unused, spotted and unconsumed bait as specified on this label.

Use Restrictions: For control only of Pocket Gophers (Geomyoidea sp. and Thomomys sp.) in and bordering crops (alfalfa, forage, hay, vegetables and grains); range; orchards; and non-crop areas (forestry, plantations, golf courses, lawns and other turf areas, livestock barns, mansions, parks and around agricultural buildings). Apply only by the methods of application on this label.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not apply bait above ground, cause must be applied directly into pocket gophers' burrow systems. Remove or bury any bait spilt on the ground during application.

Endangered Species Considerations: Do not use this product within prairie dog towns within the range of the black-footed ferret without first consulting endangered species specialists. U.S. Fish and Wildlife Service, Denver Regional Office. Do not use this product within one mile of active dens of the San Joaquin Kit Fox in the following California counties: Fresno, Kern, Kings, Merced, Mono, San Benito, Santa Barbara, San Luis Obispo, Tulare and Ventura. Prior to use, contact endangered species specialists at the California Department of Fish and Game or the U.S. Fish and Wildlife Service, Portland Regional Office, for recommendations. To review endangered species within your state and county, log on to www.fws.gov. At the top of the page use the drop down menu to select your region; then select endangered species or ecological services (dependent on the region); next search for the listed species by state or county; review the endangered species for that area.

Selection of Treatment Areas: Pocket gophers out throw low, fan-shaped mounds of earth from their underground tunnels. The tunnel entrance is plugged with soil and is found near one edge of the mound. The mounds are usually at the end of short lateral tunnels which connect with the main burrow system. The main burrow is typically about 18 inches from the mound and within 10 inches of the surface. A single gopher burrow system will be about 2 feet in diameter.

Application Directions: Method 1: Use a pointed metal rod to probe for the main burrow. The probe will "give" when the burrow is penetrated. Remove the probe. Insert a funnel into the hole. Apply 1/2 cup of Kaput bait into the burrow. Carefully plug the hole with leaves, grass or similar material to prevent light from entering and soil from covering the bait. Make 2-3 applications per burrow system. Repeat treatment if fresh mounds appear after 2-3 weeks.

Method 2: Using a long-handled teaspoon, remove the plug from the burrow. Carefully deposit 1/2 cup of Kaput bait as far as possible into the burrow. Close the opening with soil, being careful not to cover the burrow. Treat again if fresh mounds appear after 2-3 weeks. Method 3: If using the Sub-Station (underground bait station) place 1 lb. of Kaput bait in the station. Align the openings of the station with the tunnel system, then cover the station with dirt. Add bait to the station as necessary.

Method 4: When using a hand probe applicator, insert the tip into the burrow system, making certain to penetrate the tunnel. Follow the directions on the applicator and dispense 1/2 cup of bait into the gopher burrow. Remove the probe and close the remaining hole by placing a sod plug over it or kicking the opening closed. Treat again if fresh mounds appear after 2-3 weeks.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store in original container in a dry place inaccessible to children and pets. Pesticide Disposal: Washes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Disposal: Nonrefillable container; do not reuse or refill this container. Offer for recycling, if available or reconditioning, if appropriate; otherwise, dispose of empty container in a sanitary landfill or by incineration.

Lot Number: See Container Lid

WARRANTY
To the extent consistent with applicable law, Manufacturer and Seller make no warranty, express or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
