FEEDING AND MANAGEMENT INSTRUCTIONS:
When used as directed, MINERALIX FLY TUB with IGR will provide sufficient (Euglossine) insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Emerging adult horn flies will not be affected. Start feeding before horn fly season and continue until cold weather forest the end of the horn fly season. Allow free choice to cattle. Cattle should consume an average of 5 pounds of MINERALIX FLY TUB with IGR per 100 lbs of animal body weight per day, which is equivalent to 4 ounces per day for a 1,000 pound steer.

1. Allow cattle to be trained for nutrients by providing them prior to feeding MINERALIX FLY TUB with IGR.
2. Offer cattle 1 MINERALIX FLY TUB with IGR for every 15-25 head of cattle
3. Reduce all other self-limiting nutritional supplements.
4. Locate MINERALIX FLY TUB with IGR where cattle congregate (feeding, bedding, shelter).
5. Distribute MINERALIX FLY TUB with IGR on a regular basis as needed.
6. Omit MINERALIX FLY TUB with IGR in bedding 8 ounces per 100 pounds animal body weight per day. Increase the number of feeding locations (if change location(s) to areas more frequented by cattle.
7. Omit MINERALIX FLY TUB with IGR 3 ounces per 100 pounds animal body weight per day. Reduce the number of feeding locations (if change location(s) to areas less frequented by cattle.
8. Knowledge of this product after what the fly is controlled shall be established will require disposal of cattle with established a positive identification of the adult fly population is desired.
