**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS – DANGER:** HIGHLY CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if swallowed. Do not take internally, irritating to nose and throat. Avoid breathing dust. Use with adequate ventilation. Do not get in eyes, on skin or on clothing. Wear protective clothing, chemical resistant gloves and protective eyewear (goggles, face shield or safety glasses). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

**PHYSICAL AND CHEMICAL HAZARDS**

**CHEMICAL HAZARD: STRONG OXIDIZING AGENT.** Mix only with water. Use clean dry utensils. Mix ONLY WITH WATER. USE CLEAN DRY UTENSILS. DO NOT ADD THIS PRODUCT TO ANY DISPENSING DEVICE CONTAINING REMNANTS OF ANY OTHER PRODUCT. SUCH USE MAY CAUSE A VIOLENT REACTION LEADING TO FIRE OR EXPLOSION. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not re-seal container. If possible, isolate container in open air or well-ventilated area. Food with large amounts of water if necessary.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish.

**STORAGE AND DISPOSAL:** Do not contain water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Do not store in direct sunlight. Do not store at temperatures above 100°F. Do not store on side, avoid cross-contaminating or impacting of side walls. Keep container tightly closed. Store in a cool, dry, well-ventilated area that is inaccessible to children. Do not store at elevated temperatures.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous, improper disposal of excess pesticide, spray mixture, or rinse water is a violation of Federal Law. If these wastes cannot be disposed of by use according to the label instructions, contact your state pesticide or environmental control agent or the hazardous waste representative at your nearest EPA regional office for guidance.

**CONTAINER DISPOSAL:** Nonhazardous container. Do not reuse or refill this container. Triple rinse container (or equivalent), promptly after emptying. Offer for recycling, if available or puncture and dispose of in a sanitary landfill, or incinerate or burn if allowed by State and local authorities. If burned, stay out of smoke.

**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

See back panel for additional Precautionary Statements and First Aid.

**Net Contents**

1.65 lbs. (748 g)

**Brilliance** for spas bromo tabs are a form of brominating hydantoin for spas and hot tubs. It is easily adapted to any disinfection needs for both commercial and residential spas and hot tubs. When used as directed, Brilliance for spas bromo tabs will disinfect spa and hot tub water, keeping it clean, clear and free of odor. Brilliance for spas bromo tabs give the effectiveness of chlorine without the chlorine odor. Proper sanitary practices require changing spa water at a minimum of every 30 days.

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DANGER:** Do not mix this product in concentrated form with any other chemicals. Do not add other chemicals to the feeding device when using this product. A violent reaction leading to fire and/or explosion could result.

**NOTE:** Before using Brilliance for spas bromo tabs in your spa or hot tub for the first time, add 1/2 ounce of sodium bromide per 100 gallons of water to establish a 0.5 ppm bromide concentration. Also, add sodium bromide at this dosage whenever the spa or hot tub is drained and refilled. The bromide addition ensures immediate establishment of an all-bromine system, eliminates chlorinous odors and maximizes skin and eye comfort.

**SPA OR HOT TUB START UP:** To start up a new spa or hot tub, or to one recently drained, clean all surfaces, backwash or clean the filter, chemically balance the calcium hardness and total alkalinity, treat for metals (present iron, copper and manganese), and adjust the pH to 7.2 - 7.8.

**Using a suitable buffer adjusted according to the manufacturer’s directions, add Brilliance for spas bromo tabs to maintain an active bromine concentration of 2.0 ppm in residential spas and 3 to 6 ppm in commercial spas. Use a reliable test kit to monitor for bromine regularly.**

Brilliance for spas bromo tabs usage will typically vary from 0.015 to 0.10 pound for every 300 gallons of spa water to maintain the recommended bromine concentration range. The presence of organic debris, high bather use and other factors may require a higher dosage.

**SUPEROXIDATION:** Water soluble, non-filterable waste can accumulate in spa or hot tub water and cause cloudy water and can stimulate skin and eye irritation. Superoxidation or superconcentration with a suitable oxidizing shock treatment should be done on a regular basis to remove these wastes and maintain clear spa water. Suitable oxidizing agents are those based on calcium hypochlorite, lithium hypochlorite, sodium hypochlorite or potassium peroxymonopersulfate.
