READ LABEL BEFORE USE

PRODUCT DESCRIPTION & USE

DESCRIPTION & DIRECTIONS FOR USE

This product is an emulsifier for use with Mycostat® brand antisapstain products. Read and understand this label, and the Mycostat® product label, before use. Prepare a tank-mix emulsifiable concentrate by admixing 1 volume of Mycostat® antisapstain concentrate with 2 to 6 volumes Diamulse P emulsifier concentrate. Brief agitation is essential to prepare tank-mixed emulsifiable concentrate; once prepared, tank-mix is indefinitely stable. Use of tank-mix is governed by the Mycostat® product label. For admixture with pesticide concentrate only, so as to prepare an emulsifiable tank-mix. Do not add directly to RTU (ready-to-use) solution. RTU dilutions of tank mixtures prepared with Diamulse products may be used in conjunction with Ferrobrite brand acidifiers/buffers and silicone emulsion type antifoam products.

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic/marine organisms – do not apply or discharge product or wastes to waters.

STORAGE & DISPOSAL

Store in sealed original container or approved bulk vessel only. Incompatible with copper, brass and other cuprous alloys. Do not reuse empty containers; triple rinse, then recycle or dispose of container in accordance with applicable State and local requirements.

WHMIS INFORMATION

DANGER - CORROSIVE

PRECAUTIONS KEEP OUT OF REACH OF CHILDREN

Prevent contact with eyes & skin: wear rubber gloves, and chemical goggles or safety glasses. Wear additional protective equipment as required to prevent skin contact. Use a respirator suitable for protection against corrosive mist if exposed to mists. Wash thoroughly after handling, remove & launder contaminated clothing.

FIRST AID

If in eyes, hold eye open and flush with gentle stream of water for 20 minutes, removing contact lenses if present after 5 minutes, then seek immediate medical attention. If on skin, flush with water then wash affected area with soap and water. Get medical attention if irritation persists. If ingested, do not induce vomiting. Give conscious patients large quantities of water and seek immediate medical attention. If aerosolized mists are inhaled, remove victim to fresh air; give artificial respiration if indicated.
