**PRECAUTIONARY STATEMENTS**

Hazards To Humans And Domestic Animals

**CAUTION:** Harmful if swallowed. Keep away from children, domestic animals and pets. Causes moderate eye irritation. Do not get in eyes, or on clothing. All handlers (including applicators) must wear long-sleeved shirt and long pants, shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**NOT TO VETERINARIAN**

Anticoagulant Bromadiolone: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**NOT TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**FIRST AID**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

For animals ingesting bait

- Do not give first aid by mouth to an unconscious person.
- Do not give anything by mouth to an unconscious person.

**NOTE TO VETERINARIAN**

If anticoagulant bromadiolone is suspected, consult a veterinarian before giving vitamin K₁.

**TREATMENT FOR PET POISONING**

If animal eats bait, call veterinarian or 800-234-2269 at once.

**NOTE TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

**NOT TO VETERINARIAN**

Anticoagulant Bromadiolone: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁, if needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**ENVIRONMENTAL HAZARDS:** This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply this product directly to water.

**ACTIVE INGREDIENT:**

Bromadiolone: 0.005%

**OTHER INGREDIENTS:**

69.995%

**TOTAL:**

99.995%

**Kills Norway rats, roof rats, house mice and warfarin resistant Norway rats.**

This product has been treated with 5-methylnitroso to protect the bait from infestation by insects.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

**PESTICIDE DISPOSAL:** Dispose of waste resulting from the use of this product in trash or at an approved waste disposal facility.

**CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container.

**CONDITIONS OF SALE:**

To the extent consistent with applicable law, this warranty does not extend to the chemical description on the label and is reasonably fit for the purposes set forth on this label. To the extent consistent with applicable law, this warranty does not extend to the handling or use of this product contrary to the label instructions or under abnormal conditions or conditions not reasonably foreseeable to seller, and buyer assumes all risk of any such use.

**User Safety Requirements**

Follow manufacturer’s instruction for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco, or using the toilet and change into clean clothing.

**NOTICE TO VETERINARIAN**

BAR

Kills Norway rats, roof rats, house mice and warfarin resistant Norway rats.

†

*Norway rats and house mice may consume a lethal dose in a single night's feeding with first dead rodents appearing four or five days after feeding begins.

EPA Reg. No. 270-373  •    A  EPA Est. No.  75806-AZ-1    B    EPA Est. No. 61282-WI-01

Contains denatonium benzoate

See back panel for additional precautionary statements.

CONTAINS

Individually Wrapped

1 Pound Bars!

1 Pound Bars!

NET CONTENTS:

96 Bar pieces (85 oz each)

CONTAINER HANDLING:

Dispose of wastes resulting from the use of this product in trash or at an approved waste disposal facility.

PESTICIDE DISPOSAL:

PESTICIDE STORAGE:

Store only in original container, in a cool, dry place inaccessible to children and pets. Keep containers closed and away from livestock, pets and other nontarget animals. Do not store in direct sunlight.

User Safety Requirements

Hazardous material.

Hazardous material. Do not clean the equipment in water.

Do not apply this product directly to water or areas where surface water or ground water is subject to contamination.

User Safety Requirements

Hazardous material.

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply this product directly to water or areas where surface water or ground water is subject to contamination.

ENVIRONMENTAL HAZARDS

•

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

•

Have person sip a glass of water if able to swallow.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact FARNAM COMPANIES, INC., 800-234-2269, or your state or tribal environmental agency responsible for pesticide regulation.

HOT LINE NUMBER

If animal eats bait, call veterinarian or 800-234-2269 at once.

Anticoagulant Bromadiolone:

For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give intramuscularly Vitamin K

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K

While wearing gloves, break bar into 2-oz pieces and apply one 2-oz bar piece per placement in infested areas at 8 to 12 foot intervals in treated areas. Do not contaminate water by cleaning of equipment or disposal of wastes.

To prevent reinfestation, eliminate sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment.

To the extent consistent with applicable law FARNAM COMPANIES, INC. warrants this product in its unopened package conforms to the chemical specifications on the label. FARNAM COMPANIES, INC. is not responsible for the use of this product in any application, treatment, manner or condition not reasonably foreseeable to seller, and buyer assumes all risk of any such use.

Precautionary Statements

•

Hold eye open and rinse slowly and gently with water for 15-20 minutes.

•

Call a poison control center or doctor immediately for treatment advice.
