FOR SPAS AND HOT TUBS
When used as directed, this product is effective as a sanitizing agent for spa and hot tub water.

DIRECTIONS FOR USE:
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.
- Ensure all spa and hot tub equipment is working properly. Backwash/clean the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.8. When using other products as outlined in the directions for this product, always follow directions on those products.

MAINTENANCE Dose:
- With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 1 teaspoon per 1,000 gallons) as a single treatment. Repeat at 15 to 20 minute intervals until a residual of 3 to 5 ppm of available chlorine is established as determined by test kit. A test kit must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3 - 5 ppm.

SUPERCHELATION:
- Use one teaspoon of this product per 100 gallons of water (or 1/2 cup per 1,000 gallons). Superclellination may be needed on a weekly basis in heavily used spas or as infrequently as once a week in a moderately used spa.

NOTE: Onity to treated spas is prohibited above levels of 3 ppm chlorine due to risk of body injury.

SWIMMING POOL Algicide
- When used as directed, this product kills algae and will not color pool or change pool water quality.

This product is ideal for use in vinyl lined, fiberglass or colored plaster surface pools.

DIRECTIONS FOR USE:
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all pool equipment is working properly. Backwash/clean the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.8. Add to the pool at a rate of 25-50 ppm to reduce the organic acids affecting the calcium hardness of the pool. Test the pool water pH and adjust as necessary.

NOTE: Onity to treated swimming pools is prohibited above levels of 3 ppm chlorine due to risk of body injury.

EMERGENCY HANDLING:
- In case of contact or decomposition – Do not reuse container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.
