### Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Store in original container only. After partial use, close the container tightly. Store in a secure place that is temperate and dry. High humidity and moisture will cause product to harden. Use spray and take solutions within 24 hours. Immediate use is required if another component is added to the spray solution.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on the site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not cause to pollute this container. Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by statute and local authorities, by burning. If burned, stay out of smoke.

### Warranty Disclaimer and Limitation of Liability

Pine Agrochemicals Limited ("PINE") warrants that this Product conforms to the specifications on this label. To the extent consistent with applicable law, PINE makes no other warranties and disclaims all other warranties, express or implied, including, without limitation, any warranties of merchantability or fitness for a particular purpose. No agent of PINE or any other person is authorized to make any representation or warranty beyond those contained herein.

It is impossible to eliminate all risks associated with the Product. Plant injury, lack of performance, or other unanticipated consequences may occur because of factors such as climatic weather conditions, use of the Product other than in strict accordance with this label’s instructions, presence of other materials, the manner of application or other factors, all of which are beyond the control of PINE or the seller. To the extent consistent with applicable law, all such risks shall be assumed by the buyer.

To the extent consistent with applicable law, 5% FINE disclaims any liability whatsoever for special, incidental or consequential damages resulting from the handling or use of this Product and/or PINE’s failure under the label shall be limited to the amount of the purchase price, or, at the election of PINE, the base replacement of the Product.

**FIRST AID:**
- **IF IN EYES:** Rinse with large amounts of water and consult with a doctor if 5% FINE product is in the eyes.
- **IF IN SKIN:** Rinse with large amounts of water and consult with a doctor if 5% FINE product is on the skin.
- **IF IN MOUTH:** Rinse with large amounts of water and consult with a doctor if 5% FINE product is swallowed.

**PERSONAL PROTECTIVE EQUIPMENT:**
- **FACE:** Wear a face mask or respirator approved for pesticide use.
- **HANDS:** Use non-porous gloves approved for pesticide use.
- **EYES:** Wear protective eye wear approved for pesticide use.

**SPECIAL CASES:**
- **SUSCEPTIBLE SPECIES:** Do not spray near pets or livestock.
- **SIZZLING EMBRACE:** Apply only to crops intended for grazing.

**KEEP OUT OF REACH OF CHILDREN CAUTION:**
- **DARZIE® 85 WSG** is not a permitted pesticide for lawn and landscape use. It is not intended for use on ornamentals or turf.
- **CAUTION:** Keep away from children and pets.

**MATERIAL SAFETY DATA SHEET:**
- **Date of Last Revision:** 10/01/2015
- **Document Number:** 1850-0001-01
- **Company:** Pine Agrochemicals Limited
- **Address:** 1580 Mt. Diablo Blvd., Suite 405, Walnut Creek, CA 94596, USA
ENVIRONMENTAL HAZARDS

Do not contaminate water when disposing of equipment wash waters or mistate.

PHYSICAL OR CHEMICAL HAZARDS

Do not store near heat or open flame. For CHEMICAL EMERGENCY, call local, fire,leak, fire, or an accident call CHEMTRAC, 1-800-424-9300.

IMPORTANT: Read the entire directions for use and the conditions of sale and warranty before using this product.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with the labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirement specific to your state or tribe, contact the state/tribal agency responsible for pesticide regulation. Do not apply this product through any type of irrigation system.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 190. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements to protect handlers, workers, and others who enter the treated areas and persons working in emergency assistance. It also contains specific instructions and limitations for applying this product to areas that are subject to runoff or are adjacent to water bodies. The statements on the label are based on the best available data, and are intended to be applied to all users of this product.

MIXING INSTRUCTIONS

Quarter fill the spray tank with clean water. Accurately measure out the required amount of DAZIDE 65 WSG according to Table 1. Add the DAZIDE 65 WSG to the spray tank with remaining required amount of water to achieve the correct concentration. Wait 6 minutes, stirring occasionally for the DAZIDE 65 WSG to dissolve.

*Approximate measures only. Probably not water treatment.

APPLICATION TECHNIQUES

Surface applications must only be performed in enclosed areas, such as greenhouses, where spray drift outside the treated area cannot occur.

Spray to the point of runoff. This is approximately 1 gallon of spray solution to 200 square feet of area.

Plant foliage should be dry when applying DAZIDE 65 WSG. All plants should be well watered prior to application of DAZIDE 65 WSG. With plants not soaked, the spray solution will absorb into the foliage and roots.

Do not apply this spray to plants within 24 hours of applying DAZIDE 65 WSG. This allows the spray solution to be absorbed into the foliage and roots.

Two applications of DAZIDE 65 WSG at 1/2-2/3 rate within 48 hours may be more efficacious than a single application of the total application rate.

Applications of DAZIDE 65 WSG and CITADEL® TANK MIX Applications of this tank mix can provide a synergistic effect on certain crops that do not respond well to DAZIDE 65 WSG alone. Select a rate of DAZIDE 65 WSG and CITADEL® TANK MIX for the desired control and then vary the rate of DAZIDE 65 WSG to adjust to other species.

DETERMINING OPTIMUM RATES

Optimum DAZIDE 65 WSG rates will vary between growers and will depend on the desired final plant height, growing conditions, application techniques, species and variety, or outline. Growers should conduct trials with small numbers of plants using the specified rates to determine the optimum rates for their situations before DAZIDE 65 WSG is applied to a large number of plants. Growers may find that they have to adjust application rates, techniques, timings and treatment periods to achieve desired effect.

Always start with the lowest specified rate and increase rates as required.

Do not exceed the maximum rate.

A. FLORIST AZALEAS

Apply 2500 ppm (0.25%) DAZIDE 65 WSG to promote compactness and development of additional shoots after final shaping, and when new growth has reached 2-3 inches. A repeat application of up to 2500 ppm (0.25%) may be made 14 days later.

B. BEDDING/FLOWERING PLANTS

Apply 5000 ppm (0.5%) DAZIDE 65 WSG to prevent excessive elongation when new growth has reached 1-1/2-2 inches after transplanting, pruning or trimming. Repetitive applications may be made as new growth continues to elongate. DAZIDE 65 WSG has a significant end-use, but is not limited to application on all bedding/flowering plants. Adjust applications according to the current growing condition of the plant. The appearance of the flowers may vary depending on the species.

C. BEDDING PLANT PLUGS

Apply 1000 ppm (0.1%) DAZIDE 65 WSG to increase plant compactness starting at the first true leaf stage (8 days) through to the finishing stage (49 days).

Repeat applications at 1-week intervals may be made as required, but the most vigorous sendings will require the most regular applications. In addition to the ‘Bedding/Flowering Plant’ section above, Impatiens and Petunias may also be sprayed with DAZIDE 65 WSG at the plug stage.

FIRST AID

IF IN EYES
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-858-7378 (National Pesticide Information Center) for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Chemical resistant gloves made of any waterproof material
- Shoes plus socks

Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. When handlers use closed systems, enclosed cabins or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS

Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
