Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of liability before using this product. If these terms are not accepted, return the unopened product container at once.

IMPORTANT: READ BEFORE USE

Do not use this product against non-target pests. Non-target pests may exist (or be introduced) in the area to be treated. Non-target pests may include species other than those pests listed in the directions for use and may be affected or injured by the active ingredients of this product. The active ingredients in this product may adversely affect non-target pests, especially if appropriate precautions are not taken. Do not use this product where non-target pests are present.

GENERAL INFORMATION

Before applying this product, determine the need for control, the target pest(s), the extent of the infestation, and the time of year when the infestation is likely to occur. This product is effective against many pest species, but not against all species present. The effectiveness may be limited by weather conditions, resistance of the pest, and nature of the target area.

Read the entire Directions for Use before using this product. Young children and pets should be kept away from treated areas during and after application. Do not apply this product when children or pets are present.

APPLICATION

Apply in sufficient water to cover the foliage and soil area being treated. Maximum application is once per season. Do not apply this product for tree or lawn care applications or for sale or resale applications only.

Storage and Disposal

Not compatible with florals or flower sprays. See inside leaflet for complete First Aid Instructions, Disposal Instructions.

Precautionary Statements

Do not apply solution until location of heat pipes, ducts, water and sewer lines and electrical conduits are known and identified. Caution must be taken to avoid puncturing and injection into these structural elements. Do not apply the product in proximity to vegetation which is leaking, invert to prevent leakage. If container is leaking or material spilled for any reason or cause, care must be taken to avoid contamination of public and private water supplies. Use anti-backflow equipment or an air gap on fill or drain for 10 seconds after the flow begins to drip. Repeat this procedure until spray has dried. Interior applications for ant control are limited to spot, crack and crevice, or wall void applications only.

Do not use this product against non-target pests. Non-target pests may exist (or be introduced) in the area to be treated. Non-target pests may include species other than those pests listed in the directions for use and may be affected or injured by the active ingredients of this product. The active ingredients in this product may adversely affect non-target pests, especially if appropriate precautions are not taken. Do not use this product where non-target pests are present. This product is effective against many pest species, but not against all species present. The effectiveness may be limited by weather conditions, resistance of the pest, and nature of the target area.

Read the entire Directions for Use before using this product. Young children and pets should be kept away from treated areas during and after application. Do not apply this product when children or pets are present.
ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to soil that might leach into surface waters. Do not contaminate surface waters with this product or undiluted💚만들기

DIRECTIONS FOR USE

1. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
2. Directions that contain wood or other materials within the treated structure can only be treated using the
   directions for use, shirt, pants, socks, shoes must be worn. In addition: All pesticide handlers must wear protective
   clothing. When using in or on wet vegetation or in water, rubber boots and head protection are also
   required. When applying this product, wear rubber gloves that are resistant to the active ingredient. For
   people present or residing in the structure during application, they must not allow people or pets to contact
   contaminated areas or to reoccupy contaminated areas of the structure until clean up is completed.
   Prayer: Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

NOTE TO PHYSICIAN:

• Call a poison control center or doctor immediately for treatment advice.
• Call a poison control center or doctor for treatment advice.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IS THE PRODUCT CONTAINED IN THE PRODUCT LABEL or label directions for use, shirt, pants, socks, shoes must be worn. In addition: all pesticide handlers must wear protective

PRECAUTIONARY STATEMENTS: CAUTION

• Keep out of reach of children and pets. Do not allow children or pets to reenter the treated area until
   clean up is completed. Leave all pets, children or other people who may have come in contact with
   this material out of the treated area. If children or pets accidentally come in contact with this material,
   call a poison control center or doctor immediately. Do not apply at a lower dosage and/or concentration
   than specified on this label for applications prior to installation. Do not use in a manner inconsistent with
   the directions for use, shirt, pants, socks, shoes must be worn. In addition: all pesticide handlers must wear protective

Hazardous to Humans and Domestic Animals

• Avoid contact with skin, eyes, and clothing. Wash thoroughly with soap and water before eating, smoking,
   drinking, or leaving the work area. Wash all work clothes before reuse.

When applying in or on wet vegetation or in water, rubber boots and head protection are also

APPLICATION

1. Do not formulate this product into other end-use products.
2. Do not apply at a lower dosage and/or concentration than specified on this label for applications prior to installation.
3. Do not use in a manner inconsistent with the label directions for use, shirt, pants, socks, shoes must be worn. In addition: all pesticide handlers must wear protective

CONTROL - GENERAL

1. It is recommended that application volumes described in the Premise Pro Insecticide “DIRECTIONS FOR USE” be used. This will result in a uniform treated zone. Shall not exceed 25 PSI at the treatment tool when the valve is open to
   treat soil which will be pressure spray (not to exceed 25 PSI at the treatment tool when the valve is open) to treat soil which will be
   treated to provide a continuous chemical treated zone in the soil. These vulnerable or reinfested areas may be retreated in accordance with
   label directions relevant to the treated area(s) to receive the secondary treatment.

FRESHLY CH exceptions may apply to regulations, treatment procedures, and/or type of construction. The purpose of this pesticide for termite control is to treat soil or structures to establish a continuous treated zone (horizontal and/or vertical as needed) between the wood and fill or existing foundation. For treatment of soil, the termite control area(s) to receive the secondary treatment.
