FORMULA 3232

ACTIVE INGREDIENT(S): Poly[(carboxylethyl)morpholino](hexamethylenimine)ethylene(dimethylamino)ethylenedichloride

INERT INGREDIENTS

TOTAL

KEEPS OUT OF REACH OF CHILDREN

CAUTION:

KEEP OUT OF REACH OF CHILDREN.

FIRST AID

IF IN EYES

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN, CLOTHES

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF SWALLOWED

- If person is not breathing, call 911 or an ambulance, then give artificial preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

WATER COOLING TOWERS: Prior to the use of FORMULA 3232 in water cooling towers, clean the systems to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 2.5 to 7.0 fluid ounces of FORMULA 3232 per 100 gallons of water to provide 24 to 60ppm FORMULA 3232, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.75 to 2.5 fluid ounces of FORMULA 3232 per 1000 gallons of water (6 to 20 ppm FORMULA 3232) every 2 to 6 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Make slug additions into the sump of water cooling towers.

DECORATIVE FOUNTAINS: FORMULA 3232 is used to control the growth of algae in decorative fountains that do not contain fish. Manually clean heavy growths of algae prior to treatment. Fountains with just visible algae growth require an initial dose of 4 to 6 fluid ounces of FORMULA 3232 per 100 gallons of water. To treat a freshly cleaned and filled fountain, add 2 to 4 fluid ounces of FORMULA 3232 per 100 gallons of water. For maintenance dosages, add 1 to 3 fluid ounces of FORMULA 3232 per 1000 gallons of water every 6 to 7 days as needed. Make sure FORMULA 3232 is added at a point where it can be uniformly distributed. FORMULA 3232 may be used in fountains treated with chlorine chemicals, but do not mix FORMULA 3232 with concentrated dry or liquid chlorine products.

INDUSTRIAL AIR WASHING SYSTEMS: FORMULA 3232 is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Prior to its use, clean the systems to remove bacterial slime and other deposits. An initial slug dose of 11.0 to 15.0 fluid ounces of FORMULA 3232 per 1000 gallons of water is recommended. Repeat initial dosage until control is evident. Make subsequent slug additions of 7.5 to 18.0 fluid ounces of FORMULA 3232 per 1000 gallons of water each 1 to 5 days, as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Make slug additions into the sump or into the water collection trays of the airlwash system.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wear chemical-resistant eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash clothing before use.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish, aquatic organisms and clams. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewage systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PESTICIDE DISPOSAL:

NONREFILLABLE CONTAINER (Less than or equal to 6 gallon container): Keep container closed when not in use. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. NONREFILLABLE CONTAINER (Greater than 6 gallon container): Do not stack more than four drums high. Leaking or damaged drums should be placed in overpack drums for disposal. In case of spills, use sawdust or sand to absorb the spilled pesticide and dispose of in a sanitary landfill. Keep container closed when not in use.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Do not ship with Food, Feed, Drugs, or Clothing.

NONREFILLABLE CONTAINER (Less than or equal to 6 gallon container): Wastes resulting from the use of this product may be disposed of off-site or at an approved waste disposal facility.

CONTAINER HANDLING

NONREFILLABLE CONTAINER (Less than or equal to 6 gallon container): Non refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and reasop. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for the later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or reconditioning, if appropriate, or by other procedures if approved by state and local authorities.

NONREFILLABLE CONTAINER (Greater than 6 gallon container): Non refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use of disposal. Repeat this procedure two more times. Then offer for recycling if available or reconditioning, if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures if approved by state and local authorities.
