GENERAL INFORMATION

Rate of Fast Trak may vary with the conditions of application. Add as the last ingredient when mixing with wettable powders, dispersible granules, and other materials designed to be mixed with plain water. Add first when spraying materials sensitive to hard water or high pH. Always add with agitator running. Always read and follow the entire pesticide label for proper timing rates, specific directions and any special use precautions or regional use recommendations.

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

Storage: Store in original container only and keep sealed. Store in closed storage areas. Use caution when moving, opening, closing or pouring.

Pesticide Disposal: Improper disposal of excess spray mixture or rinsate is a violation of federal law. Wastes resulting from use of this product should be disposed of through on site application or at an approved waste disposal facility.

Container Disposal: Triple rinse (or equivalent), then offer recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or other procedures approved by state and local authorities.

SUGGESTIONS FOR USE

Fast Trak should be used in spray applications where pesticide requires an ammonium sulfate or ammonium nitrate type additive. It is most beneficial due to its lack of corrosiveness or abrasiveness to spray nozzles.

Fast Trak should also be used with pesticides that are enhanced by acidic spray solutions.

Use Rates: Use 1 to 4 pints per 100 gallons of solution.

Fast Trak is intended for use with herbicides such as Glyphosate Products, Poast, Gramoxone Inteon and any others where ammonium sulfate is recommended.

NOTE: Use caution when tank mixing Fast Trak with pesticides that are adversely affected by low pH spray solutions. If the pesticide manufacturer requires the use of a surfactant, then always include a non-ionic surfactant labeled for such use, such as POWER-LINE Surf 90. Surfactant must contain at least 90% active ingredient.

NOT FOR AQUATIC USE

NET CONTENTS rev. 4/2014

Manufactured For: P.O. Box 475, Rupert, Idaho 83350
(208) 531-4100
www.powerlineproducts.com

PRINCIPAL FUNCTIONING AGENTS:
- Dicarbamide
- Dihydrogen Sulfate
- Carbon Constituents 51.00%
- Constituents Ineffective as Spray Absorption Agent 49.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

If this product gets into the eyes, immediately wash the eyes with large amounts of water for at least 15 minutes. Seek medical treatment immediately. If this product gets on the skin, immediately wash the contaminated area. Seek medical attention if skin irritation persists. If this product is swallowed and the person is conscious, immediately give large volumes of water. Do not induce vomiting. Seek immediate medical attention.

PERSONAL PROTECTIVE EQUIPMENT

Applicators and other handlers must wear: chemical dust/splash goggles or full face shield to prevent eye contact. Protective gloves and clothing to minimize skin exposure. If use generates an aerosol mist or respiratory irritation, use NIOSH approved dust/mist respirator.

NOTICE: The statements made on this label are believed to be true and accurate but because of conditions of use which are beyond our control. Power-Line Products does not make nor does it authorize any agent or representative to make any warranty, guarantee or representation, expressed or implied, concerning this material or the use thereof, except in conformity with the statements of the label. Neither Power-Line Products nor the seller shall be held responsible in any manner for any personal injury or property damage or loss resulting to the buyer or to the other person from handling, storage or use of this material not in accordance with the directions. The buyer assumes all risk and liability resulting from improper handling, storage or use and accepts and uses this material on these conditions. This product meets E.P.A. Requirements under Title 40 CFR 180.1001 subparagraph C & D.
