NE-22 IGR
PREVENTS ADULT HORN FLY EMERGENCE FROM MANURE OF TREATED CATTLE
A Nutritional supplement Containing S-Methoprene* Insect Growth Regulator for Continuous Feeding to All Classes of Beef and Dairy Cattle through the Horn Fly Season
Contains Altosid®

Guaranteed Analysis
Crude Protein, minimum 22.0% (this includes not more than 10% equivalent crude protein as non-protein nitrogen)
Crude Fat, minimum 5.0%
Crude Fiber, maximum 2.0%
Calcium, minimum 2.3%
Calcium, maximum 2.8%
Phosphorus, minimum 2.0%
Potassium, minimum 2.5%
Cobalt, minimum 3 ppm
Copper, minimum 300 ppm
Iodine, minimum 15 ppm
Manganese, minimum 1,200 ppm
Selenium, minimum 6.6 ppm
Zinc, minimum 1,200 ppm
Vitamin A, minimum 80,000 IU/lb
Vitamin D, minimum 8,000 IU/lb
Vitamin E, minimum 80 IU/lb

TOTAL 100.000%

Feed Ingredients
Beet molasses, processed grain by-products, soybean meal, hydrolyzed vegetable fat, monocalcium phosphate, dicalcium phosphate, urea, limestone, zinc sulfate, manganese sulfate, copper chloride, sodium selenite, ethylenediamine dihydroiodide, cobalt carbonate, vitamin A acetate, vitamin D supplement, vitamin E supplement.

*As the Insect Growth Regulator ALTOSID®

FEEDING AND MANAGEMENT INSTRUCTIONS
When used as directed NE-22 IGR will provide sufficient (S)-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue use until cold weather marks the end of the horn fly season. Allow free choice to cattle. Cattle should consume an average of 0.8 ounces of NE-22 IGR per 100 lbs. of animal body weight per day, which is equivalent to 8 ounces per day for a 1,000 pound animal.

1. Assure cattle are not starved for nutrients prior to feeding NE-22 IGR.
2. Offer cattle 1 block NE-22 IGR for every 15-25 head of cattle.
3. Remove all other self-limiting nutritional supplements.
4. Locate NE-22 IGR where cattle congregate (watering, loafing, shade areas).
5. Redistribute NE-22 IGR on a regular basis as needed.
6. If intake of NE-22 IGR is below 0.8 ounces per 100 pounds animal body weight per day, increase the number of feeding locations and/or change location(s) to areas more frequented by cattle.
7. If intake of NE-22 IGR is above 0.8 ounces per 100 pounds animal body weight per day, reduce the number of feeding locations and/or change location(s) to areas less frequented by cattle.
8. Introduction of this product after adult horn fly infestation is established will require treatment of cattle with adulticides if elimination of adult fly population is desired.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
This product contains high levels of copper. Consumption of this product by sheep or goats may result in copper toxicity.

ENVIRONMENTAL HAZARDS
Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Product No. B66250

Net Weight: 250 LB (113.4 kg)

STORAGE & DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Store NE-22 IGR in a cool dry place.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER HANDLING: Refillable Containers. Refill this container with this product only. Do not reuse this container for any other purpose. Return empty tube to AFSGIF for cleaning and recycling. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. If the container is not returned, completely empty container by tapping sides and bottom to loosen material. Then offer for recycling if available or dispose of in a sanitary landfill or by other procedures approved by state and local authorities.
