ClearView algaecure

Effective for Black and Green Algae Infestations

FOR PROFESSIONAL USE
Do not use in vinyl liner pools, painted pools, or colored plaster cement pools.

ACTIVE INGREDIENT:
TRICHLORO-S-TRIAZINETHIONE ........... 99%
OTHER INGREDIENTS .................. 1%
TOTAL ................................... 100%
AVAILABLE CHLORINE 90%

KEEP OUT OF REACH OF CHILDREN
DANGER:

FIRST AID

If swallowed:
Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow.

If in Eyes:
Hold eyes open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If on Skin:
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If Inhaled:
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.

Have the product container or label with you when calling poison control center or doctor, or for treatment advice.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Elimination of Existing Algae Growth: CLEAR VIEW™ ALGAE CURE is highly effective for control of black and green algae infestations and will aid in the removal of algae only when pool or spa is not in use. Repeat treatment whenever visible algae growth occurs. Turn off filter and pump prior to application and keep off for at least 8 hours after treatment. 1. Brush algae spots on wall and bottom with a stainless steel brush.
2. Sprinkle CLEAR VIEW™ ALGAE CURE directly over pool or spa walls and bottom where algae growth appears. Use approximately 16 ounces CLEAR VIEW™ ALGAE CURE per 10,000 gallons of pool water. For spas, use 3/4 - 1 ounce per 500 gallons. For heavy algae growth, dosage may be doubled.
3. Brush algae spots again with a stainless steel brush and vacuum debris to waste. Supervinification: Swimming pools and spas should be super chlorinated once each 7 - 10 days when not in use. After rain or dust storms, during hot weather, and whenever water is cloudy or foaming algae appears on the water surface. Broadcast 7/10 to 15 ounces CLEAR VIEW™ ALGAE CURE per 10,000 gallons pool water over the deepest end of the pool. For spas, use 0.125 to 0.25 ounces CLEAR VIEW™ ALGAE CURE per 500 gallons spread evenly over water surface of spa.

After Treatment:
1. Measure pH of swimming pool or spa water immediately after application. Use a reliable test kit. If necessary, adjust and maintain pH within 7.2 - 7.6 range. pH down (dry acid) lowers pH. pH Up (food acid) raises pH. Follow directions for use contained on the labeling of these products.
2. Recheck for treated swimming pools or spas is prohibited above levels of 3.0 ppm available chlorine.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DANGER - CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May cause conjunctivitis or severe eye irritation. Intact to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Strong Oxidizing Agent. Use only with water. Use clean, dry utensils. Do not add this product to any dispensing device which contains remnants of other product. Such use may lead to a violent chemical reaction leading to fire and/or explosion. Contact with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, generation of hazardous gases, and/or possible fire and/or explosion. In case of decomposition, isolate container in open air or in a well-ventilated area. If necessary, flood with large quantities of water and flush to a sanitary sewer.

STORAGE AND DISPOSAL: Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible, and flood with large quantities of water to dissipate all material before discarding. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal site. Completely empty plastic liner by shaking or tapping sides of container. Do not use bottom to loosen clinging particles. Empty residue into application equipment. Non-refillable container. Do not reuse or refill the container. Offer for recycling if available or dispose of plastic liner and container in a sanitary landfill or by incineration if allowed by State and local authorities. Do not contaminate water, food, or feed by storage or disposal.
