Granular Stabilized Chlorinating Concentrate

Active Ingredients:
Sodium Dichloro-triazinetrione ..................99%
Inert Ingredient: ..................................1%
Total Ingredients: ..................................100%
Available Chlorine .........................56%

Danger
Keep out of reach of children
See other precautions and first aid on back panel
Net weight 50 lb. (18.65 kg)
DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Reentry into treated swimming pool is prohibited above levels of 3 ppm chlorine.

This product is a stabilized concentrated chlorine which will provide effective control of bacteria and algae when used as directed. For the convenience of continuous automatically fed chlorine and relief from frequent hand feeding, try our automatic feeder that uses our 3" Chlorination Tablets.

1. Adjust the pool water pH value to between 7.2 and 7.8 and total alkalinity to between 80 and 150 ppm as determined by a suitable test kit.
2. Stabilize pool water to 30 ppm with Stabilizer as directed on the container label. Thereafter regular use of this product will provide any needed makeup stabilizer.
3. Shock treat the pool water by using 9 ounces of this product for each 10,000 gallons of pool water. Before using the pool, be certain the chlorine level returns to 1.0 to 1.5 ppm.
4. Maintain a free available chlorine level of 1.0 to 1.5 ppm (as determined daily by a suitable test kit) at all times. For each 10,000 gallons of pool water, add 2 1/2 ounces of this product every other day (or 1 1/4 ounces daily) or more as needed to maintain the proper chlorine level.
5. Shock treat your pool at least twice monthly (more often in sunbelt regions) according to Step No. 3 above. During hot weather and peak bather loads, shock treat your pool weekly to prevent water cloudiness and algae growth.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: CORROSIVE. Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles or face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such a use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.
FIRST AID:
If Swallowed: Call a poison control center immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.
If in Eyes: Hold eyelids open and rinse slowly with water for 15 – 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eye. Call poison control center or doctor for treatment advice.
If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. Call a poison control center or doctor for treatment advice.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.
Have product container or label with you when calling a poison control center or doctor or going for treatment.
You may also contact 800-222-1222 for emergency medical treatment information.

STORAGE AND DISPOSAL
Keep product dry in a tightly closed container, when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.
