**FIRST AID:**

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

**IN CASE OF EMERGENCY CALL:** 1-800-654-6611

---

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product is an extremely concentrated form of a swimming pool sanitizing agent. This product is designed to dissolve slowly and at a uniform rate to eliminate the need of frequent hand-feeding of granular or liquid chlorine.

Reentry into treated swimming pools is prohibited above levels of 3 ppm chlorine.

**FOR CONTINUOUS DAILY CHLORINATION:**

Before the first use of this product, be sure to take the following steps:

1. Adjust the pool water pH value to between 7.2 and 7.8 as determined by a suitable test kit and adjust the total alkalinity to 80 to 150 ppm (parts per million).
2. Stabilize pool water to at least 70 ppm with Rebarb® Stabilizer as directed on the container label. Regular use of Rebarb Pool Specialties 3” Tablets for daily chlorination will provide any needed makeup stabilizer.
3. Superchlorinate (shock treat) your pool water to reach a 4 ppm residual chlorine reading.
4. Once you complete 1, 2 and 3 above, use this product to maintain the free residual chlorine at a safe and efficient 1.0-1.5 ppm at all times as determined by the daily or more frequent use of a suitable test kit.
5. Using a leader, floater or skimmer dispenser, immerse one tablet (or as many as required to continuously maintain the safe free available chlorine level) for each 5,000 to 10,000 gallons of pool water.

**NEVER ADD THESE TABLETS DIRECTLY INTO THE SWIMMING POOL AS DISCOLORATION OF THE POOL LINER OR FINISH MAY OCCUR.**

6. Superchlorinate or shock treat your pool water at least twice monthly (more often in warmer climates) during hot weather and peak bather loads using Rebarb Ultra Quick Swive® shock oxidizer. Failure to shock treat regularly can result in the growth of algae in your pool.

---

**PRECAUTIONARY STATEMENTS:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Corrosive. Causes irreversible eye damage. Causes eye and skin burns. May be fatal if inhaled or absorbed through skin. Harmful if swallowed. Causes burns to digestive tract. Irritating to nose and throat.

- Avoid excessive exposure. Avoid breathing dust and fumes.
- Do not get in eyes, on skin or on clothing. Wear goggles and rubber gloves. For additional protection of skin, wear long sleeves and long pants.
- Wash hands after handling and before eating, drinking, chewing gum, or using tobacco.
- Remove contaminated clothing and wash clothing before reuse.
