POOL SPECIALTIES

Super Algi-Gon®

Kills and prevents algae
Non-metallic, non-foaming

FIRST AID:

1. Have the product container or label with you when calling a poison control center or doctor or going for treatment.
2. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
3. IF ON SKIN OR CLOTHING: Take off all clothing immediately. Wash skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
4. IF SWALLOWED: Call a poison control center or doctor for treatment advice.
5. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
6. NOTE TO PHYSICIAN: Probable mucosal damage may contradict the use of gastric lavage.

In Case of Emergency Call: 1-800-654-9811

This product efficiently reduces green, blue-green and square D. algae growth in pools. It will not harm pool surfaces or equipment and is compatible with most other pool chemicals.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT NOTE:

1. Do not allow swimming in pool for at least 15 minutes after this product has been applied.
2. Always dilute this and other pool treatment chemicals separately, fewer, never mix them.
3. Weather, radiant temperature, number of swimmers and frequency of pool use affect the rate at which the unfiltered pool conditions develop. Adjust your pool chemistry and maintenance frequencies accordingly.
4. This product may harm and therefore must not be used on tiger Swims.

BEFORE YOU BEGIN:

1. Make sure pool equipment is working properly including filter, pump, skimmer, and heater. Allow the filter to run for at least 30 minutes before adding algicide.
2. Backwash filter, following normal procedures for your pump's filter.
3. Check pH (specific gravity) balance with a test kit, following label directions. Desired pH range is between 7.2-7.6. If necessary adjust pH by adding pH increaser to lower pH or pH decreser to raise pH.
4. Check color at minimum it must be between 7.2-7.6 for at least 4 hours before adding this product.
5. Add this product directly into pool by pouring around entire perimeter of pool.

COMPATIBILITY WITH OTHER PRODUCTS

Caution: Do not mix with any other products other than those listed in this brochure. Do not mix with any other chelating agents or bleach. Do not mix with other chelating agents, chelating agents, or acids.

TROUBLESHOOTING:

1. If product does not work or if algae bloom continues, consult your pool professional or call 1-800-654-9811.
