**Foster 40-20™**

**Fungicidal Protective Coating**

- Prevents the spread of molds and odor-causing bacteria on its surface
- Can be used on walls, ceilings, pipes, interior and exterior surfaces of HVAC duct systems, and wherever effective controls are essential.

**Active Ingredients:**
- Barium Metaborate: 8.00%
- 3-Iodo-2-propanyl butylcarbamate: 0.11%
- Other Ingredients: 30.14%
- TOTAL: 100.00%

This contains 1.36 pounds of Barium Metaborate and 0.02 pounds of 3-Iodo-2-propanyl butylcarbamate per gallon.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

**FIRST AID: IF SWALLOWED:** Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not give anything to an unconscious person. Do not induce vomiting unless told by a Poison Control Center doctor. In case of emergency call 1-888-852-1758. Have the product container or label with you when calling a Poison Control Center or doctor. **IF ON SKIN:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferable mouth-to-mouth if possible. Call a Poison Control Center or doctor for further treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a Poison Control Center or doctor for treatment advice.

See last panel for additional precautionary statements.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons.

MATERIAL PREPARATION: DO NOT THIN. Keep container closed when not in use. Do not apply outdoors in damp or rainy weather.

SURFACE PREPARATION:

Unpainted brick, plaster, and cement based surfaces: Apply only to clean, dry surfaces free of all dirt, grease, or impurities. On mold infested surfaces, aggressively scrape the surface, then wire brush to produce a firm, sound substrate. Wash the intended surface with a detergent and water solution following the instructions for its use, then rinse and allow to dry completely before proceeding. Foster 40-20 may be applied directly without the need for primer. For improved adhesion to unpainted brick, plaster and cement based surfaces, prime with Foster® 40-26 Waterbase Primer and fill gaps with Foster® 40-16 Block Filler.

Painted Surfaces: Wire brush painted surfaces removing all flaking, loose, or chalking material. Sand all glossy surfaces (alkyl, oil, epoxy based coatings, etc.) to roughen entire area. Wash the intended surface with a detergent and water solution following the manufacturer's instructions for its use, then rinse and allow to dry thoroughly.

Metal Surfaces: Remove any dust, grease, oil, or materials. Abrade all surfaces to remove all surface rust. Wash the intended surface with detergent and water, then rinse and allow to dry thoroughly. Where metal will be exposed or potential exists for the coating to be peeled from the surface, prime metal surfaces with Foster Waterbase Primer.

Wooden Surfaces (unpainted): Remove all dirt, grease, oil, or materials. Remove all loose substrate materials, unnatural protrusions, splintered materials, etc. to a sound surface. Wash with detergent and water following the manufacturer's directions, then rinse and allow to dry thoroughly. Foster 40-20 may be applied directly without the need for primer. On exposed surfaces where staining or discoloration of the coating would be objectionable, prime with Foster Waterbase Primer.

HVAC Systems: Follow the directions described in the supplemental document "Application of 40-26 Fungicidal Protective Coating in HVAC Systems" available at www.fosterproducts.com. Always follow industry accepted cleaning procedures. Galvanized surfaces need to be vacuumed or washed clean of all accumulated mold, dust and loose particles. Ensure that all interior surfaces are thoroughly dry before applying Foster 40-20. All metal surfaces must be primed with Foster Primer before application of Foster 40-20. Lined air ducts must be lightly vacuum cleaned to remove all mold, dust, and loose particles, being careful not to tear or loosen the liner.

APPLICATION: Always ensure adequate ventilation. HVAC systems must be under negative air pressure during and after application to allow for exhausting of odors and rapid drying of the coating. Apply Foster 40-20 to all surfaces by brush, roller or airless spray at a rate of approximately 1.25 gallon per 100 square feet. Always ensure adequate ventilation. Brushing or rolling will require two coats applied at 90° to each other. Under normal circumstances a spray application can be completed in one coat, but for extremely porous or irregular surfaces, a second coat may be required. Ensure that the finished surface is smooth and homogeneous. For airless spray application, use an electric 2800 psi minimum pump with a 0.021–0.035 fluid tip.

NOTE: Continue to circulate fresh dry air throughout the area during the application and for as long after the application as is possible. Exhaust circulated air outside the building or occupied space. If air must be exhausted inside the building, circulate air through an air scrubbing filtration system with odor absorbing medium such as a charcoal medium. This circulation and filtration helps to reduce the dry time of the coating and reduce latex type odors that could possibly migrate from the application area. Be sure exhausted air is odorless before venting into occupied spaces.

MAINTENANCE: Wash down periodically with a mild detergent and water. Where severely contaminated, scrub clean using steam cleaning while permissible. Normal cleaning procedures must be maintained in HVAC systems to remove accumulated airborne particles. If coating becomes damaged clean surface and re-apply coating.

CLEAN-UP: Use fresh water to clean brushes and equipment before product dries. Dry product may be removed with chlorinated solvents (non-flammable) or xylol (flammable).

DISCLAIMER: The information and data contained herein are correct to the best of our knowledge and tests. We require that adequate tests be made by the purchaser to determine if a product is suitable for the intended purpose and use.

IMPORTANT: H.B. Fuller Construction Products Inc. ("HBF-CP") warrants that each of its products will be manufactured in accordance with HBF-CP's specifications in effect on the date of manufacture. If a product fails to meet this limited warranty, the purchaser's sole and exclusive remedy is replacement of the product or at HBF-CP's option refund of the purchase price. HBF-CP'S ACCEPANCE OF ANY ORDERS FOR THE PRODUCT IS EXPRESSLY CONDITIONAL UPON PURCHASER'S ASSENT TO THE TERMS ON THE APPLICABLE PRODUCT DATA SHEET AND INVOICE.
