FOR USE IN HEALTH CARE, LABORATORY, MEDICAL FACILITIES AND HOSPITALS

Accel TB is a one-step disinfectant cleaner and odor neutralizer designed for general cleaning, and disinfecting of hard, non-porous environmental surfaces. It cleans quickly by removing dirt, grime, mildew, and other common soils found in hospitals, nursing homes, and medical offices. Accel TB's non-dulling formula eliminates the time and labor normally required for rinsing. It is designed for use on hard, non-porous environmental surfaces listed on the label. Read for plastic, chrome, stainless steel, aluminum associated with woks, tables, chairs, countertops, telephones, glazed tile, and more.

Accel TB is an effective cleaner-disinfectant Sanitizer on non-porous contact surfaces.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product is not to be used as a terminal sterilant/sterilization level disinfectant on any surface or instrument that 1) is introduced directly into the human body, either into or in contact with the blood stream or normally sterile areas of the body, or 2) contacts intact mucous membrane surfaces which do not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. The product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

FOR USE AS A ONE-STEP CLEANER/ DISINFECTANT PRODUCT

1. Pre-clean heavy-soiled areas.
2. Apply solution by spray, cloth, disposable wipe or mop to hard non-porous environmental surfaces.
3. All surfaces must remain wet for 5 minutes, then 10 minutes for non-porous surface areas.
4. Wipe surfaces dry.

ACTIVE INGREDIENTS:
Hydrogen Peroxide 0.3%
Other ingredients 99.7%

PART NO.
ACC55R-1832

74559-1

EPA EST. NO.
74559-CAN-1

CLAIMS

See reference sheet for a complete list of pathogenic organisms claimed for the product.

BACTERICIDAL: 1 Min.
In the presence of 5% serum and 1 minute contact time at 20°C on hard, non-porous environmental surfaces.

- Mycobacterium marinum
- Erwinia herbicola
- Nozawana accrued (formerly known as Salmomella enterica)
- Staphylococcus aureus
- Mycobacterium smegmatis

FUNGICIDAL: 1 Min.
In the presence of 5% serum and 1 minute contact time at 20°C on hard, non-porous environmental surfaces.

- Trichophyton mentagrophytes (ATCC 9823)

Antifungal activity was determined by the ADAC Antifungal Activity of Disinfectants Method.

BROAD-SPECTRUM NON-FOOD CONTACT SANITIZING: 30 Sec.
In the presence of 5% serum and 30 second contact time at 20°C on hard, non-porous environmental surfaces.

- Escherichia coli 0117:H7
- Klebsiella pneumoniae
- Pseudomonas aeruginosa
- Salmomella enterica (formerly known as Salmomella enterica)
- Staphylococcus aureus

Sanitizing activity was determined by the EPA Sanitizer Test for Non-food Contact Surfaces and the ASTM E1153 Standard Test Method for Efficacy of Sanitizers Recommended for Non-food Contact Surfaces.

KEEP OUT OF REACH OF CHILDREN

See reference sheet for additional features and claims.

BROAD-SPECTRUM NON-FOOD CONTACT SANITIZER
FOR USE IN HEALTH CARE, LABORATORY, MEDICAL FACILITIES AND HOSPITALS

Accel TB is a single-step disinfectant cleaner and decontaminant designed for general cleaning, soil disinfecting, and disinfecting of non-vivo porous environmental surfaces. It cleans, sanitizes, and disinfects without pre-rinsing or scrubbing and is effective against 26 of the most common healthcare-associated pathogens including virus, bacteria, and fungi. It is effective against bloodborne pathogens and is effective in reducing the risk of infection from drug-resistant bacteria by killing methicillin-resistant Staphylococcus aureus (MRSA) and vancomycin-resistant Enterococcus (VRE). Accel TB is effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is also effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is a highly effective disinfectant cleaner for use in healthcare facilities.

DIRECTIONS FOR USE:

1. Before use, thoroughly clean the area with a detergent solution to remove all obvious dirt and debris. Then, using a disposable brush or cloth, scrub the area to be disinfected with Accel TB solution. Make sure to cover all surfaces and corners, including those that are normally difficult to reach.
2. After cleaning, allow the solution to remain on the surface for at least 20 minutes. Then, remove the solution by wiping it off with a dry cloth or paper towel.
3. Repeat the process if necessary, until all signs of contamination have been removed.
4. Rinse the surface with clean water to remove any remaining solution.
5. Allow the surface to air dry.

KEEP OUT OF REACH OF CHILDREN

Read the label before use. Accel TB is a non-foaming, non-flammable, non-toxic solution that is safe for use in healthcare facilities. It is effective against a broad spectrum of microorganisms, including virus, bacteria, and fungi. It is highly effective against bloodborne pathogens and is effective in reducing the risk of infection from drug-resistant bacteria by killing methicillin-resistant Staphylococcus aureus (MRSA) and vancomycin-resistant Enterococcus (VRE). Accel TB is also effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is a highly effective disinfectant cleaner for use in healthcare facilities.

BROAD SPECTRUM NON-FOAMING CONTOUR SANITIZER

- Bactericidal
- Virucidal
- Fungicidal
- Tuberculocidal

CLAIMS

See reference sheet for additional features and claims.

BACTERICIDAL

In the presence of 2% serum and 2% blood, Accel TB is effective against 26 of the most common healthcare-associated pathogens including virus, bacteria, and fungi. It is effective against bloodborne pathogens and is effective in reducing the risk of infection from drug-resistant bacteria by killing methicillin-resistant Staphylococcus aureus (MRSA) and vancomycin-resistant Enterococcus (VRE). Accel TB is also effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is a highly effective disinfectant cleaner for use in healthcare facilities.

VIRUCIDAL

In the presence of 2% serum and 2% blood, Accel TB is effective against 26 of the most common healthcare-associated pathogens including virus, bacteria, and fungi. It is effective against bloodborne pathogens and is effective in reducing the risk of infection from drug-resistant bacteria by killing methicillin-resistant Staphylococcus aureus (MRSA) and vancomycin-resistant Enterococcus (VRE). Accel TB is also effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is a highly effective disinfectant cleaner for use in healthcare facilities.

FUNGICIDAL

In the presence of 2% serum and 2% blood, Accel TB is effective against 26 of the most common healthcare-associated pathogens including virus, bacteria, and fungi. It is effective against bloodborne pathogens and is effective in reducing the risk of infection from drug-resistant bacteria by killing methicillin-resistant Staphylococcus aureus (MRSA) and vancomycin-resistant Enterococcus (VRE). Accel TB is also effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is a highly effective disinfectant cleaner for use in healthcare facilities.

TUBERCULOCIDAL

In the presence of 2% serum and 2% blood, Accel TB is effective against 26 of the most common healthcare-associated pathogens including virus, bacteria, and fungi. It is effective against bloodborne pathogens and is effective in reducing the risk of infection from drug-resistant bacteria by killing methicillin-resistant Staphylococcus aureus (MRSA) and vancomycin-resistant Enterococcus (VRE). Accel TB is also effective against a broad spectrum of microorganisms, including VRE, MRSA, and Clostridium difficile. It is highly effective against bacteria, viruses, fungi, and yeast, including MRSA and VRE. Accel TB is a highly effective disinfectant cleaner for use in healthcare facilities.

FOR USE IN HEALTH CARE, LABORATORY, MEDICAL FACILITIES AND HOSPITALS

Acet T.B is a one-step disinfectant cleaner and odor neutralizer designed for general cleaning, and deodorizing of hard, non-porous environmental surfaces. It cleans quickly by removing dirt, grime, most, odors, and other common soils found in hospitals, clinics, homes, and medical offices.

Acet T.B’s non-bleaching formula eliminates the time and labor normally required for bleaching. It is designed for use on hard, non-porous environmental surfaces labeled as this label exists from plastic, ceramics, metal, steel, aluminum with walls, tile, counters, equipment, furniture, floors, and more.

Acet T.B is an effective cleaner/disinfectant on non-food contact surfaces.

DIRECTIONS FOR USE:

This product is not to be used as a terminal disinfecting level-disinfectant on any surface or instrument that is to be exposed to a terminal disinfectant or sterilization. The use of Acet T.B is intended for use on surfaces that are not likely to be contaminated with blood, body fluids, or other organic matter that might interfere with the disinfection process. When used with a terminal disinfectant, Acet T.B should be used to clean the surfaces before the terminal disinfectant is applied. When used alone, Acet T.B should be used to clean the surface after the terminal disinfectant has dried.

BROAD SPECTRUM NON-FOOD CONTACT SANITIZER

Apply Acet T.B to hard non-porous surface to allow to remain wet for 30 seconds. Rinse with water and then apply, if a pre-cleaning is required.

STORAGE AND DISPOSAL

PESTICIDE STORAGE

Store in original container in areas inaccessible to small children, pets, and other animals.

CONTAINER HANDLING

Batteries, chemicals, or other materials that are likely to cause serious injury or death, such as batteries, should be handled carefully. Batteries, chemicals, or other materials that are likely to cause serious injury or death, such as batteries, should be disposed of properly.

KEEP OUT OF REACH OF CHILDREN

See reference sheet for additional features and cautions.

READY TO USE

BACTERICIDAL 1 Min.

In the presence of 1% serum and 1 minute contact time at 20°C on hard, non-porous environmental surfaces.

VIRUCIDAL 1 Min.

In the presence of 1% serum and 1 minute contact time at 20°C on hard, non-porous environmental surfaces.

TUBERCULOCIDEAL 1 Min.

In the presence of 1% serum and 1 minute contact time at 20°C on hard, non-porous environmental surfaces.

TUBERCULOCIDEAL 1 Min.

In the presence of 1% serum and 1 minute contact time at 20°C on hard, non-porous environmental surfaces.

TOTAL 100%
**ACCEL® TB RTU**

Reference Sheet

**BACTERICIDAL: 1 MINUTE**

In the presence of 5% serum load and 1 minute contact time on hard, non-porous environmental surfaces against:
- *Acinetobacter baumannii* (ATCC 19606)
- *Enterococcus faecalis* VRE (ATCC 51575)
- *Escherichia coli* O157:H7 (ATCC 35150)
- *Escherichia coli* with extended beta-lactamase resistance (ESBL) (ATCC BAA-196)
- *Klebsiella pneumoniae* (ATCC 4352)
- *Pseudomonas aeruginosa* (ATCC 15442)
- *Salmonella enterica* (formerly known as *Salmonella choleraesuis*) (ATCC 10708)
- *Shigella dysenteriae* (ATCC 11835)
- *Staphylococcus aureus* (ATCC 6538)
- *Staphylococcus aureus* (CA-MRSA) (NARRA NRS 384) (Genotype US300)
- *Staphylococcus aureus* MRSA (ATCC 33592)
- Community Associated Methicillin Resistant *Staphylococcus aureus* (CA-MRSA) (NARRA NRS 123) (Genotype US400) Community Associated Methicillin Resistant
- Bactericidal activity was determined by the AOAC Use Dilution Test Method.

**VIRUCIDAL: 1 MINUTE**

In the presence of 5% serum load and 1 minute contact time on hard, non-porous environmental surfaces:
- *Adenovirus* type 8 (ATCC VR-1368)
- *Avian Influenza A* (ATCC VR-2072)
- *Feline Calicivirus, Strain F9* (ATCC VR-782)
- *Hepatitis B Virus* (HBV)
- *Hepatitis C Virus* (HCV)
- *Herpes Simplex Virus, Type 1* (HSV-1) (ATCC VR-733)
- *Herpes Simplex Virus, Type 2* (HSV-2) (ATCC VR-734)
- *HIV-1 (AIDS Virus), Strain HTLV-III (HIV-1), (Acquired from Adv. Biotechnologies, Inc.)
- *Human Coronavirus* (ATCC VR-740)
- *Influenza A/Hong Kong* (ATCC VR-544)
- *Norovirus* (Feline Calicivirus, as the surrogate)
- *Poliovirus Type 1, Strain Brunhilde* (ATCC VR-1000)
- *Rhinovirus Type 37, Strain 151-1* (ATCC VR-1147)
- *Rotavirus WA* (Acquired from University of Ottawa)
- This product has demonstrated effectiveness against Influenza A virus and is expected to inactivate all Influenza A viruses including Pandemic 2009 H1N1 Influenza A virus.

**TUBERCULOCIDAL: 5 MINUTES**

In the presence of 5% serum load and 5 minute contact time on hard, non-porous environmental surfaces
- *Mycobacterium bovis* (BCG) (OT 451C150)
- Tuberculocidal activity was determined by the EPA Quantitative Tuberculocidal Activity Test Method.

**FUNGICIDAL: 10 MINUTES**

In the presence of 5% serum load and 10 minute contact time on hard, non-porous environmental surfaces
- *Trichophyton mentagrophytes* (ATCC 9533)
- Fungicidal activity was determined by the AOAC Fungicidal Activity of Disinfectants Method.

**BROAD-SPECTRUM NON-FOOD CONTACT SANITIZING: 30 SEC**

In the presence of 5% serum load and 30 second contact time on hard, non-porous environmental surfaces
- *Enterococcus faecalis* VRE (ATCC 51575)
- *Escherichia coli* O157:H7 (ATCC 35150)
- *Klebsiella pneumoniae* (ATCC 4352)
- *Pseudomonas aeruginosa* (ATCC 15442)
- *Salmonella enterica* (formerly known as *Salmonella choleraesuis*) (ATCC 10708)
- *Staphylococcus aureus* (ATCC 6538)
- *Staphylococcus aureus* MRSA (ATCC 33592)
- Sanitizing activity was determined by the EPA Sanitizer Test for Inanimate, Non-Food Contact Surfaces and ASTM E1153 Standard Test Method for Efficacy of Sanitizers Recommended for Inanimate Non-Food Contact Surfaces.
