Wear protective eyewear (goggles or face shield) chemical-resistant gloves, long-sleeved shirt and long pants, shoes plus socks when mixing or applying CUT-RATE.

DIRECTIONS FOR USE
CUT-RATE is intended for use with products registered for agricultural, horticultural, turf, ornamental, industrial and non-crop uses. Read and follow all pesticide label recommendations. Do not use CUT-RATE if the accompanying tank mix pesticide label prohibits the use of water conditioners or acidifying agents.

Always add CUT-RATE to the spray water as the first component of the mixture. Slowly pour CUT-RATE into the spray tank at the point of maximum agitation. Continue filling while recirculating until all added products are thoroughly mixed into the spray solution.

Maintain good agitation at all times until the contents of the tank are sprayed. If mixture is allowed to settle, thorough agitation is required before spraying is resumed. For optimum water conditioning, the spray mixture should be used within eight hours.

USE RATE
For ground, air and aquatic applications, use CUT-RATE at 3 to 4 pounds per 100 gallons of spray solution. Use the higher rate with hard water conditions. Use the higher rate when tank mixed with glyphosates or other herbicides that do not contain a surfactant ingredient.

CUT-RATE can be used as a replacement for ammonium sulfate under most conditions. Where extremely hard water conditions exist in conjunction with difficult-to-control weeds, additional CUT-RATE or ammonium sulfate may be required.

GENERAL INFORMATION
CUT-RATE is a specially formulated blend of reduced rate water conditioning and sequestering agents intended for use with glyphosate and other herbicide spray applications that recommend the use of ammonium sulfate or nitrogen fertilizer as a tank mix additive.

CUT-RATE is a spray grade crystal that readily goes into solution. CUT-RATE improves weed control by conditioning and acidifying the water. Herbicide performance is maximized by CUT-RATE’s ability to neutralize antagonism from water impurities such as iron, calcium and magnesium.

CUT-RATE is compatible with all glyphosate formulations and with separately applied drift retardants and nonionic surfactants and is approved for aquatic use.

KEEP OUT OF REACH OF CHILDREN
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
PRECAUTIONARY STATEMENT
Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment: Wear protective eyewear (goggles or face shield), chemical-resistant gloves, long-sleeved shirt and long pants, shoes plus socks when mixing or applying CUT-RATE.

FIRST AID
If Swallowed
• Call a Poison Control Center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a Poison Control Center.

Skin Irritation
If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15 to 20 minutes.
• Call a Poison Control Center.

If Inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
• Call a Poison Control Center or doctor for further treatment advice.

If in Eyes
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes.
• Call a Poison Control Center or doctor for treatment advice.

Have the product container or label with you when calling a Poison Control Center or doctor, or going for treatment.
