**INTRODUCTION:**

Flea Control for Cats & Kittens. Spot On® Flea Control for Cats & Kittens is a product marketed for the treatment of fleas on cats and kittens. It is a growth regulator specifically formulated for cats and kittens, which prevents flea eggs from hatching into adults. A single application of this product will last for up to 1 month. The active ingredient in this product is (S)-methoprene, which is a growth regulator that prevents the development of flea eggs into adult fleas. This product is most effective when used as part of a total program aimed at reducing fleas in the cat's environment. Be sure to treat the cat's bed, and any indoor or outdoor drains where flea populations may be located. For maximum effectiveness, treat the home, cat's bed, and yard with traditional flea products approved for use on cats/kittens, around the home (such as home sprays, foggers), or in your yard. As with all flea products, this product is most effective when used at least 1 week prior to a flea问题是, or at least 1 week after a flea incident. It is important to use this product in a manner consistent with its labeling. 

**DIRECTIONS FOR USE:**

1. Read the entire label before use. 
2. Use only on cats over 2.5 lbs and over 12 weeks of age. Do not use on cats less than 2.5 lbs. Do not apply to cats less than 12 weeks old. Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivity may occur after using any indoor or outdoor drain. 

**HAZARDS TO DOMESTIC ANIMALS – CAUTION:**

Do not use on kittens less than 12 weeks old. Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivity may occur after using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivity may occur after using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivity may occur after using this product on debilitated, aged, medicated, pregnant or nursing animals. Sensitivity may occur after using any indoor or outdoor drain.
