ProSpray™ wipes

Disinfectant Towelettes

with Lemon Scent

KILLS HIV on PRECIPITATED ENVIRONMENTAL SURFACES/ OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS: In clinical care settings or other settings in which there is an expected likelihood of contact with contaminated surfaces or objects contaminated with blood or body fluids and in which the surfaces or objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus (HIV), Type 1 and Type 2 human T-cell leukemia viruses (HTLV-1 and HTLV-2), and hepatitis B virus (HBV) and hepatitis C virus (HCV), the following directions should be followed:

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV ON SURFACES/ OBJECTS SOILED WITH BLOOD/BODY FLUIDS:

PRECAUTIONS TO PROTECT: When handling items soiled with blood or body fluids or when performing procedures which might lead to contact with blood or body fluids, always wear protective gloves, protective eyewear, a mask, and coveralls. Use disinfecting procedures to clean surfaces and objects before applying the disinfectant.

DISPOSAL OF INFECTIOUS MATERIAL: Blood and other body fluids should be autoclaved and disposed of according to current guidelines for infectious waste disposal.

CAUTION: Use only as directed. For cleaning and disinfection purposes. Do not use undiluted. Use within 30 minutes of preparation. Do not apply to intact skin. Not for use on patients with skin allergies to hypochlorites. Do not use in areas of the body. This product may be used to disinfect or decontaminate critical or semicritical medical devices prior to sterilization or high-level disinfection.
