**ELECTOR® PSP**

PREMISE INSECT CONTROL AGENT

Control of darkling beetles, hide beetles, house flies (adults and larvae), stable flies, little house flies (*Fannia canicularia*) in and around agricultural animal premises.

Control of northern fowl mites (*Oribatulus sylviah*) infesting poultry.

**ENVIRONMENTAL HAZARDS**

This product is highly toxic to molluscs. Do not apply directly to water.

Areas where surface water is present, or to tidal areas below the mean high water mark. Do not contaminate water when cleaning or disposing of equipment washwaters. Apply this product only as specified on this label.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read all Directions for Use carefully before applying.

Notice: Shake well before use. Avoid freezing.

**MIXING FOR APPLICATIONS THAT REQUIRE DILUTION**

This product is intended to be mixed with water and applied as a coarse or low-pressure spray. Fill the tank of the sprayer with water to about 1/2 of the total spray volume required. Start agitation and add the required amount of product. Continue mixing and agitation while filling the spray tank to the required spray volume. Maintain sufficient agitation during the application to ensure uniformity of the spray. Prepare spray fresh for each use.

**GENERAL NOTICE**

- This product may be applied as a general surface spray or a crack and crevice application. Applications may be made in and around poultry and livestock premises, including but not limited to poultry houses, beef and dairy barns, feedlots, stables, corrals and housing structures.

- This product may be used as a direct treatment to control Northern Fowl mites infesting poultry.

- Control is enhanced when interior and exterior perimeter applications are made in and around livestock and poultry structures. Normal sanitation practices of the structure consistent with good animal husbandry and should be followed to enhance effectiveness of insect control agents.

- Lactating and non-lactating dairy and beef cattle, swine, sheep and poultry may be present at the time of premise treatment. Horses not intended for human consumption may also be present at the time of premise treatment.

- Cover or remove exposed feed and water from the area being treated.

- Do not use in milking rooms.

- Do not apply as a fog or space spray.
Egg Producing Poultry

Northern Fowl Mites: Spray birds in cages (layers) or on the floor (layers/breeders) with a coarse spray. Use a spray of appropriate design that is equipped to effectively apply the spray. Ensure adequate coverage of the vent area of the bird with a direct saturation spray for optimum efficacy. Re-application may occur every 14 days as needed.

Poultry Houses

House Flies (adults and larvae), Stable Flies and Little House Flies: Treat areas where flies rest: pay attention to side walls, the ends of buildings, upper sides of posts, crossbeams, and manure. Spray in early morning when flies are resting. Use enough water in a directed spray to contact flies and their resting surfaces thoroughly, but do not allow run-off to occur. Do not contaminate feedstuffs, water or watering and feeding equipment with premise treatments. Re-application may occur every 7 to 10 days as needed, or when fly populations reach nuisance levels.

Darkling Beetles and Hide Beetles: Apply to floor area, especially to litter around feed and water lines and to walls and support beams, but do not allow run-off to occur. Application should also be made into cracks and crevices around insulation, and where pests have been seen or can find harborage. Reapply after each grow-out or sanitation procedure. Indoor control can be enhanced by making perimeter treatments to the outside of building foundations to prevent migrating adult beetles.
Livestock Housing

House Flies (adults and larvae), Stable Flies and Little House Flies:
Apply to vertical and overhead surfaces where flies may congregate.
Feeders, waterers and feedcarts should be covered before application to prevent contamination. Do not contaminate feedstuffs or water with premix treatment. Pay attention to animal areas including fence railings, alleyways, manure, stanchions, pipes, window and doors, and other areas where flies congregate. Spray in early morning when flies are resting. Re-application may occur every 7 to 10 days as needed, or when fly populations reach nuisance levels.

INTEGRATED PEST AND RESISTANCE MANAGEMENT

This product is a member of a unique class of insect control agents (spinose) with no pre-existing levels of resistance to any other insect control agents and can be rotated with all other classes, such as synthetic pyrethroids and organophosphates. House flies, stable flies, little house flies and other insects have demonstrated the ability to develop resistance to insect control products. Continual exposure of flies and other insects to a single class of insecticide may lead to the development of resistance to that class of insecticide. The following resistance management strategy will help ensure the prolonged usefulness of this product, as well as other conventional insecticides:

- Apply this product and other insect control agents only according to label directions.
- Do not use less than the labeled rate of any insect control product.
- Include multiple control tactics (cultural and/or biological controls) within an Integrated Pest Management Program.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container only, tightly closed in a secure place. Keep out of the reach of children and domestic animals. In case of leak or spill, remove with absorbent materials and dispose of as waste.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank, drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recoup. Shake for 10 seconds. Pour rinseate into application equipment or mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then dispose of empty container in a sanitary landfill, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
INHERENT RISKS OF USE

Elanco Animal Health, Inc., a division of Eli Lilly and Company, makes no warranties or representations of any nature in connection with the use of this product, including, but not limited to, any implied warranties of merchantability or fitness for a particular purpose. In no event shall Elanco Animal Health, Inc. or its affiliates be liable for any incidental, indirect, punitive, special, exemplary, or consequential damages, including, but not limited to, any lost profits or any other damage whether the basis for the claim be contract, negligence, tort, or otherwise. The only warranties in connection with the use of this product are set forth in the applicable product label, which the user shall be deemed to accept and which is an integral part of the agreement between Elanco Animal Health, Inc. and the user.
