SANITIZER

BROMINATING TABLETS

BACTERICIDE-ALGICIDE-DISINFECTANT

NET WEIGHT: 50 LB - 22.68 KG
Sold by weight, not volume.
Distributed by GLB Pool & Spa

ACTIVE INGREDIENT:
Bromochloro-5,5-dimethylydantoin.......................... 58%
OTHER INGREDIENTS................................................. 2%
TOTAL .......................................................... 100%

Provides: 61% Available Bromine
27% Available Chlorine

DANGER
KEEP OUT OF REACH OF CHILDREN
CORROSIVE AND STRONG OXIDIZER
See side panels for additional precautionary statements.
MINI SLOW DISSOLVING BROMINATING TABLETS FOR POOLS

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

Keep pH between 7.2 and 7.6 and never allow it to fall below 7.0

The dosage necessary for your pool will change considerably depending upon those factors that burden the disinfection system. Some of the factors that will vary the required dosages are water temperature, bather load, exposure to windblown debris, thunder or rain storms and length of filtration cycle.

WARNING POOLS: In newly filled pools, shock the pool if necessary. Follow directions for use on this label to establish an effective active bromine residual of between 2 and 3 ppm. Feed water frequently using a reliable bromine test kit. Adjust the flow rate through the brominator if necessary, to maintain the active bromine residual. The following dosages are provided as a general rule of thumb. Automatic and floating brominators have use instructions peculiar to their design. Frequently a brominator must be filled to capacity every week—while the adjustments allow the user to erode only the total amount of brominating tablets necessary for proper sanitation. As suggested below, the slow dissolving nature of the chemical combined with the design features of the brominator requires that a greater amount of chemical be exposed to the water.

RESIDENTIAL: Add 17 tablets per 10,000 gallons every 5-7 days or as needed to maintain a bromine residual of 2-3 ppm at all times. Apply weekly dose through the use of a floating tablet feeder such as the Multi-Chlor or an automatic brominator which will allow you to adjust the amount of bromine entering the water.

COMMERCIAL: Add 31 tablets per 10,000 gallons every 5-7 days or as needed to maintain an active bromine residual of between 3 and 5 ppm at all times.

DO NOT SHIP WITH FOODS, FEEDS, DRUGS, OR CLOTHING.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a dark, cool (below 80°F (26°C)), dry, well ventilated area, in well closed original containers, away from energy sources, combustible organic materials, oxidizers, strong bases, and moisture.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse water is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

SPILLS: When handling or dealing with spills, use impact-resistant goggles with side shields, or face shield, body-covering clothes, including impervious rubber or plastic gloves and boots; use a dust respirator if dusting occurs. Sweep up dry spills and dispose of as described for pesticide disposal. If drum contents are contaminated or decomposing, do not reseal container; isolate unsealed drum in the open or in a well-ventilated area; flood with large volumes of water if necessary.

IN CASE OF FIRE: Do not use ammonium phosphate extinguisher near water and GLB Brominating Tablets. Hazardous reactions may occur.

DO NOT SMOKE, DRINK, OR EAT WHEN HANDLING.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE: Causes irreversible eye damage and skin burns. Eye contact may cause loss of vision. Harmful if absorbed through skin. Causes severe damage. May be fatal if inhaled. Do not breathe dust or spray mist. Inhaling to nose and throat. Do not get in eyes, on skin, or on clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear goggles with side-shields, face shield or safety glasses; protective clothing and rubber gloves. Wear a mask or pesticide respirator jointly approved by Mine Safety and Health Administration and the National Institute for Occupational Safety and Health. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.
ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, rivers, streams, canals, ponds, ditches, wells, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit issued prior to discharge. Do not discharge effluent containing this product to sewer systems without first notifying the local sewerage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS:

Strong Devolving Agent. Mix only with water. Use clean dry jugs. Do not add this product to any dispensing device containing remnants of any other product. Such mix may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

SPECIAL PRECAUTIONS PLEASE READ BEFORE OPENING CONTAINER

Hazard may result in serious personal injury requiring hospitalization. Related complications may lead to death.

PREVENTION OF PHYSICAL INJURY:

1. This product emits a powerful bromine gas. Do not open container indoors.
2. Hold away from face when opening to avoid breathing fumes.
3. Mixing with other chemicals may cause a violent and instantaneous chemical reaction. Do not add this product to water in a pool. Do not add water to this product in a pool.
4. Follow label instructions carefully. Do not take advice from others. Do not experiment.

PREVENTION OF PROPERTY DAMAGE: Contact between this product and any unabsorbed vinyl or any other property in or around the pool will result in permanent bleeding of the color.

Pool Gallons/Calculator (all dimensions in feet): Square or Rectangular: Length x Width x Average Depth x 7.5 = Gallons Round or Oval: Length x Width x Average Depth x 5.8 = Gallons Each label weighs 0.70 ounces (19.8 grams)

KEEP CONTAINER TIGHTLY CLOSED WHEN NOT IN USE

FIRST AID:

If In Eyes: Hold eyelids open and rinse slowly with water for 15 - 20 minutes. Remove contact lenses, if present, after 5 minutes then continue rinsing eye. Call poison control center or doctor for treatment advice.

If Swallowed: Call a poison control center or doctor if you swallow this product. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If persons is not breathing, call 911 or an ambulance. Then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

If Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

NOTE TO PHYSICIAN: Prophylactic emetic may contraindicate the use of gastric lavage.

USE WITH ADEQUATE VENTILATION. WASH THOROUGHLY AFTER HANDLING.

WARRANTY:

The manufacturer of this product guarantees that this product conforms to its chemical description and is substantially fit for the ordinary and customary use to which it is accustomed by reasonable consumers under ordinary conditions of use, but neither the warranty nor any other warranty of MERCHANTABILITY OR FITNESS (EXCEPT AS SPECIFIED) is extended to implied warranties as to the use of this product. Consumers are advised that the use of this product may cause injury to label directions, or under abnormal conditions, or under conditions not advised in this manual. The manufacturer is not responsible for any injury to persons or property resulting from any misuse of or failure to follow the directions in this manual.
