BARDAC® LF 18-50 WT
 Twin-Chain Quaternary Ammonium Compound Concentrate Low Foam Water Treatment Microbiocide For Building and Industrial Cooling Water Systems and Decorative Fountains

**KEEP OUT OF REACH OF CHILDREN**

BARDAC, a Lonza trademark is registered in the USA.

The presence of foam in building and industrial cooling water systems and decorative fountains impairs the performance and aesthetics of the unit loads of heat transfer and pressure fluctuations are two of the problems encountered when foam is present in the recirculating water system.

One of the possible causative agents is the microbead added to control algae and microbial slimes. Bardac LF 18-50 WT, by design, is a low foaming microbead. When used as directed, Bardac LF 18-50 WT will control algae and microbial slimes found in building and industrial cooling water systems and decorative fountains and not introduce a foam problem.

Bardac LF 18-50 WT helps keep clean and brown slime delimes from cooling system and decorative fountain surfaces. Product addition will only make a small amount and may not be continuous or on an intermittent basis depending on the degree of system fouling and relative time. Product must be added at a point in the system where it will be uniformly mixed and distributed throughout the system.

**DIRECTIONS FOR USE**

**ENVIRONMENTAL HAZARDS**

The pesticide is toxic to fish and aquatic invertebrates. Do not discharge excess containing the product into streams, ditches, septic systems, cesspools or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Open pumping is prohibited. Store in original container in a secure in accessible to children. Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide spray residue or rinse is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, consult your State or local Solid Waste Management Office for disposal methods. Do not use this container for any other purpose.
