CALCIUM HYPOCHLORITE TABLETS
FOR USE IN SMALL TABLET AND
BRIQUETTE FEEDERS

for commercial pool use • disinfectant • kills bacteria
controls algae • for multi-purpose chlorinating uses

ACTIVE INGREDIENT: Calcium Hypochlorite 58%
OTHER INGREDIENTS: 32%
TOTAL: 100%
Available Chlorine 69%

KEEP OUT OF REACH OF CHILDREN
DANGER
CONTAMINATION MAY CAUSE FIRE OR EXPLOSION! MIX ONLY INTO WATER

FIRST AID:
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.

IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN: Preliminary medical damage may contraindicate the use of gastric lavage.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS. FIRE OR EXPLOSION COULD RESULT FROM IMPROPER USE. DO NOT USE THIS PRODUCT IN ANY FEEDER, SKIMMER OR OTHER CHLORINATING DEVICE IN WHICH ANY OTHER CHLORINATING COMPOUND HAS BEEN USED.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. When handling, wear rubber gloves and goggles or face shield and use only thoroughly clean and dry utensils. Inhaling to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or public water supplies in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without first notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: DANGER: STRONG OXIDIZING AGENT. Add only into water. Use clean, dry utensils. Contamination may start a chemical reaction with generation of heat. Exclusion of hazardous gases, and possible fire and explosion. Avoid any contact with flammable or burning material, such as a lighted cigarette. Do not contaminate with moisture, water, dirt, organic matter, chemicals, including pool chemicals, pool chlorinating compounds, household products, cyanuric acid pool water stabilizers, soap products, paint products, solvents, acids, alcohol, beverage, oil, pine oil, mineral oil or any other foreign matter. Do not use this product in any automatic chlorinating device other than calcium hypochlorite tablet or briquette feeder systems. Do not use chorine dioxide tablets or any other chlorinating compound in systems that use this product. Do not add this product to any dispensing device containing remnants of any other product. Such improper use may cause a violent reaction leading to fire or explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Avoid contact with water if necessary.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and use directions.

SWIMMING POOL WATER DISINFECTING
Calcium hypochlorite tablets are designed for use with calcium hypochlorite tablet or briquette feeder systems. When used according to the instructions contained with the feeder, this product provides a steady supply of available chlorine while the pool filtration system is operating. Available chlorine controls the growth of algae and effectively kills many bacteria.

1. Read the Installation and Operations Manual for your calcium hypochlorite tablet or briquette feeder system.
2. Start the filter pump and check for available chlorine residual with a reliable test kit.
3. Fill the feeder hopper with this product. Adjust valve to an appropriate setting according to the operation instructions in the manual. Use calcium hypochlorite tablets only in calcium hypochlorite tablets or briquette feeder systems.
4. After 24 hours, check the chlorine residual. 1.0 to 3.0 ppm do not change the feed rate setting. If below 1.0 ppm, increase the feed rate. Allow sufficient time (e.g. one day) after changing the feed rate setting for the chlorine residual to adjust. 1.0 ppm should not be used until the 1.0 to 3.0 ppm free chlorine residual is established.
5. Always maintain pH between 7.2 and 7.6 by using a suitable pH adjustment product according to the product's label directions.
6. If stabilizer (cyanuric acid) is used to protect chlorine residual from breakdown by sunlight, follow label application directions for the stabilizer product and maintain the chlorine residual at 1.0 to 3.0 ppm as determined by a test kit.

Note: If algae develops, adjust pH to 7.2 - 7.4. Fill the feeder hopper with this product throughout clean pool by brushing surface of algae growth and vacuum to waste. Increase the feed rate setting until 1.0 to 3.0 ppm free chlorine residual is maintained. If algae persists, establish and maintain a 5.0 to 10.0 ppm free chlorine residual for at least 4 hours or until algae is visually eliminated. Residency is prohibited above 3.0 ppm chlorine due to risk of body injury. Alternative EPA registered algicides may be used according to those products' label directions.

WATER BALANCE: For best product performance, swimmer comfort and crystal clear water, maintain pH in the 7.2 - 7.6 range. Maintain total alkalinity in the 80 - 120 parts per million (ppm) range. Maintain calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Use Vantage to make adjustments. Follow label directions for each product.

SUPERCHLORINATION: For pools stabilized with cyanuric acid, periodic superchlorination is necessary to provide sufficient free available chlorine to control algae, destroy unfiltered organic contaminants, minimize odor and keep your water sparkling clear. Superchlorinate with a suitable product following directions on that product's label. Superchlorinate every 14 days when the temperature is below 80°F. Treatment every 7 days is recommended when the temperature is higher, bathing loads are heavy, pool water appears dull or hazy, an unpleasant chlorine-like smell is present, excessive eye irritation occurs, or after heavy rains. Check the level of residual chlorine with a reliable test kit. Residency is prohibited above levels of 4 ppm chlorine due to risk of body injury.

HOW TO CALCULATE POOL CAPACITY

Shape of Pool: Rectangular: Length x width x avg. depth x 7.5

Volume (gal) = Diameter x x avg. depth x 5.9

Gal with straight sides: Long dimension x short dimension x avg. depth x 8.7

STORAGE AND DISPOSAL
Keep this product dry in tightly closed container when not in use. Store in cool, dry and well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before disposing in container. Do not reuse empty container but place in trash container. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

Note: Buyer assumes all responsibility for safety and use not in accordance with directions.
