proclear™

Installation:
Before opening your filter, please refer to the spa owner's manual for complete installation instructions.

STEP 1
Twist and remove filter cap.

STEP 2
Match up tabs on proclear™ with tabs on Jacuzzi® filter lid.
Twist proclear™ gently until it locks securely on the lid.

STEP 3
Slide the entire device into the core of your Jacuzzi® filter cartridge.

STEP 4
Lock cap into place.

For Customer Assistance:

Keep out of reach of children.

Contact your Jacuzzi® Dealer.

For more information about Nature2®, please contact your Jacuzzi® Dealer.

Just dip and swirl the test strips. See accurate results on the back of Mps.

Natural2® Spa Test Strips:

Designed only for residential portable spas.
AquaClear Mineral Spa Sanitizer is used with your Jacuzzi®.
It's compatible - proclear can even be used with chlorine.
Enhanced bacteria control.
Reduced potential for unpleasant odor.
Best chlorine blend on the market.
End chlorine residue when used in combination with Mps.
Additional chlorine when used in combination with Mps.

Important: Spa Owners save this manual with the spa owner's manual.

Owner's Manual

Mineral Spa Sanitizer

proclear™
MINERAL SPA SANITIZER

PRECAUTIONARY STATEMENT
Hazards to Humans and Domestic Animals.

CAUTION
In the unlikely event that a cartridge breaks, mineral media should not be ingested by humans or animals as it may cause gastric distress.

FIRST AID
If Ingested: Call Poison Control Center or doctor immediately for treatment advice.

Proclear™ has been designed to sanitize spas up to 500 gallons.

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

LOW-CHLORINE RECIPE
- Proclear™
- Non-chlorine oxidizer (potassium peroxymonosulfate)
- Nature2® Spa Test Strips or equivalent (*MPS, pH, total alkalinity)
- pH, hardness, and total alkalinity adjusting chemicals
- Dichlor**, EPA registered source

PROCLEAR™ COMPATIBILITY

ATTENTION
Not to be used with product containing biguanides. If biguanide or bromine products are being used, be sure to drain and refill with fresh water.

START-UP
Before starting up a new proclear, clean debris and algae out of the spa and spa equipment.

IMPORTANT: Do not install the new proclear until the spa water is clean and chemically balanced.
Balance spa water before installing proclear.

<table>

<td>200-400 ppm</td>
</tr>
<tr>
<td>Total Alkalinity (TA)</td>
<td>80-120 ppm</td>
</tr>
</tbody>
</table>

INSTALL PROCLEAR™
Add 1 ½ tablespoons of dichlor** to spa per 250 gallons (approx. 1000 liters). Note: 1 ½ tablespoons is approximately ½ oz or 24 grams. Do not enter the spa if the free available chlorine residual is over 5ppm.

WHEN:     WHAT TO DO:

EVERY DAY: Run spa according to recommendations supplied to you by the manufacturer of your spa.

BEFORE EACH USE: Test the water with the Nature2® Spa Test Strip (or equivalent). If the MPS* level is low, add
1 tablespoon of MPS* to spa per 250 gallons (approx. 1000 liters).
(Note: 1 tablespoon is approximately ½ ounce or 16 grams)
Use the Nature2 Spa Test Strip (or equivalent) to test the spa water after each addition of MPS.*
If the test strip indicates levels below the OK range, add 1 tablespoon MPS* to spa per 250 gallons and re-test. Enter spa only after test strip indicates a sufficient level of MPS.*

AFTER EACH USE: Add 1 tablespoon of MPS* to spa per 250 gallons (approx. 1000 liters)

ONCE PER WEEK: Adjust the pH, total alkalinity and hardness as needed. A convenient way to test pH and total alkalinity is the use of the Nature2® Spa Test Strip.

EVERY 4 WEEKS: Drain and refill your spa. Replace proclear, repeat sanitizer start-up.

AS NEEDED: Shock treat with 1.5 tablespoons of an EPA registered source of dichlor** per 250 gallons (approx. 1000 liters) to remedy problems which may occur when bathing loads are high, when successive MPS** test strip reading indicate high demand, when water appears hazy or dull, when unpleasant odors or eye irritation occur, after heavy wind and rainstorms or if foam develops.

NOTE: As an alternative to MPS*, an EPA registered source of dichlor** may be substituted: 1 tablespoon dichlor**= approximately 3 tablespoons MPS.*

IMPORTANT: Perform start-up procedures for spas which have been unused or unattended. The proclear™ is not to be used with products containing biguanides. If biguanide or bromine products are being used, BE SURE TO DRAIN AND REFILL SPA WITH FRESH WATER WHEN USING THE LOW CHLORINE RECIPE.

REPLACEMENT INTERVALS - FOR PROCLEAR
A cartridge lasts four (4) months. The cartridge should not be used longer than four (4) months.

STORAGE/DISPOSAL:
Storage – store in areas inaccessible to small children. Disposal – After four (4) months of use, discard proclear™ in household trash. Do not save the cartridge for re-use. The cartridge is manufactured with the mineral media sealed inside. In the unlikely event a cartridge breaks, remove it and vacuum out any media introduced into the spa.

* potassium peroxymonosulfate
** sodium dichloroisocyanurate dihydrate
