PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING. Eye irritation may cause temporary eye injury or skin irritation. Harmful if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Avoid direct food contact. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. Precautionary text is for concentrate and not for diluted product.

FOLLOW THE DIRECTIONS FOR USE ON THE PESTICIDE LABEL WHEN APPLYING THIS PRODUCT.

HARD SURFACE CLEANING AND SANITIZING SOLUTION

When prepared and used as directed, this solution can be used on hard, non-porous surfaces: countertops, sinks, drain boards, garbage cans, faucets, under sinks, pet areas, floors and telephones. It is specifically designed to be used on pre-cleaned food contact surfaces in kitchens or related food preparation environments.

This solution makes it easy to clean or pre-clean, hard non-porous surfaces on which food is routinely handled and prepared, since these surfaces do not require a rinse after the application of the solution.

NOTE: Use the bottle until empty. Do not add additional water. Do not reuse sleeves. This bottle should not be used with any other product.

KEEP OUT OF REACH OF CHILDREN

READ DIRECTIONS AND PRECAUTIONARY STATEMENTS ON PRODUCT LABEL.

Sanitizing solution is harmful if absorbed through the skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling.

FIRST AID: If on skin, wash with plenty of soap and water. Get medical attention.

DIRECTIONS FOR USE:

To clean or pre-clean hard surfaces: Spray solution on hard surfaces and wipe dry. Repeat until surfaces are clean.

To treat hard surfaces: Use on countertops, storage cabinets, refrigerators, appliances, sinks, under sinks, sink tops, faucets, garbage cans, pet areas, telephones and doorknobs. Thoroughly spray surfaces with the sanitizing solution and leave wet for at least 60 seconds before wiping or allowing to air dry. Sanitized surfaces do not have to be rinsed with water after use of the solution.

To deodorize: Spray on hard surfaces, as needed.

STORAGE AND DISPOSAL

Store solution in areas that are inaccessible to small children. Dispose of solution before cleaning and refilling the spray bottle. Dispose of used spray bottle in trash.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING. Dry sneeze causes substantial but temporary eye injury or skin irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses). Avoid direct food contact. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID:
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional medical advice, call the following emergency phone number: 1-800-328-0026.

STORAGE AND DISPOSAL
Store Sleevelets in dry area that is inaccessible to small children. Dispose of used sleevelets and empty box in trash.

SPRAY BOTTLE CLEANING AND SANITIZING SLEEVES

These spray bottle sleeves are pretreated with cleaning and sanitizing chemicals for use in restaurants and other food service establishments to sanitize the following hard, non-porous food contact surfaces: stainless steel, chrome, vinyl, tile, glass and other plastics. When activated in water, as directed, they create a sanitizing solution for use on cleaned and rinsed hard non-porous food contact surfaces: tanks, cutting surfaces, slicing or chopping machines, utensils and countertops. Just slip dip tube of sprayer assembly into a sleeve, labeled for use with the 32 oz. spray bottle. Extract sleeve from package and insert into the same size spray bottle of water with up to 500 ppm hardness (CaCO3), with sprayer assembly and seal cap, as directed. Shake 10 times to activate the 200 ppm sanitizing solution to be used on prewashed food contact surfaces, as directed. These pretreated sleeves create a formulation for cleaning and sanitizing hard non-porous surfaces in homes, schools, nursing homes, food service and food processing establishments, kitchens, related food preparation environments and non-medical areas of hospitals, and retirement homes where sanitization is of prime importance in controlling cross contamination on treated surfaces.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Prepare a 200 ppm active quaternary sanitizing solution by slipping dip tube into a treated sleeve, labeled for use with a 32 oz. spray bottle. Extract sleeve from package and placing sprayer assembly back into the correct size spray bottle filled with water up to 500 ppm hardness (CaCO3). Shake the filled and capped spray bottle 10 times or until the limiting sleeve turns white to activate the cleaning and sanitizing solution which, used as directed, will sanitize the following prewashed hard, non-porous surfaces: stainless steel, chrome, tile, glass, vinyl and other plastics which are incorporated into countertops, table tops, storage cabinets, refrigerators, appliances, stove tops, microwaves, food processing equipment, slicing machines, work tables, food preparation surfaces, cooking and eating utensils, dishware, sinks, sink tops, countertops, drain boards, garbage cans, faucets, under sinks, pet areas, floors, telephones, and doorlatches. Contact Time: 60 seconds.

Remove all gross food particles and soil from surfaces to be sanitized by a pre-flush, pre-soak or pre-scrape treatment. Clean surfaces thoroughly with this solution or a compatible cleaner:

To sanitize immovable items: tanks, cutting surfaces, slicing or chopping machines, appliances and countertops, flood all surfaces completely with the sanitizing solution, allowing the surface to remain wet for at least sixty seconds. Drain used solution after 60 seconds and allow surfaces to dry. Sanitized surfaces do not have to be rinsed with water after use of the solution.

To clean or pre-clean hard surfaces:
Spray solution on hard surfaces and wipe dry. Repeat until surfaces are clean. Refill instructions:
Do not remove the sleeve from the spray bottle until the spray bottle is to be cleaned, rinsed and refilled. Dispose of the used sleeve in the trash. Do not reuse sleeves. Prepare a fresh container of solution as directed above.

This product is an effective food contact sanitizer against Escherichia coli, Staphylococcus aureus, Salmonella enterica, Listeria monocytogenes, and Klebsiella pneumoniae.

WISCONSIN STATE DIVISION OF HEALTH DIRECTIONS FOR EATING ESTABLISHMENTS

1. Scrape and pre-wash utensils and glasses whenever possible.
2. Wash with a good detergent or compatible cleaner.
3. Rinse with clean water.
4. Sanitize in a solution as prepared. (200 ppm active quaternary). Immerse utensils for at least two minutes or for contact time specified by governing sanitary code.
5. Place sanitized utensils on a rack or drainboard to air dry.
6. Fresh sanitizing solution should be prepared at least daily or when visibly soiled or diluted.

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 156.13 of the Wisconsin Administrative Code.
