FUNGICIDE

MAINSAIL™ WDG

Turf and Ornamental Fungicide (82.5% Water Dispersible Granules)

ACTIVE INGREDIENT:
- Chlorothalonil (tetrachlorothiophthalimide) .............................................. 82.5%
- Other Ingredients: .................................................................................. 17.5%

TOTAL: ................................................................................................. 100.0%

EPA Reg. No. 72112-5
EPA Est. No. 070999-AR-001

KEEP OUT OF REACH OF CHILDREN
DANGER PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

FIRST AID

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Rinse eye only with water. Do not put eye drops, drugs, or ointments in eyes unless specifically recommended by a medical doctor or poison control center.
- Call a poison control center or doctor for treatment advice.

IF INHALED:
- Move person to fresh air.
-_if person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage; chemical adsorbents are recommended to reduce adsorption of the product.
Persons suffering with temporary allergic skin reactions may respond to treatment with oral antihistamines and topical or oral steroids.
If in eyes, the upper and lower lids should be retracted and irrigated, and any particulate matter should be carefully removed from the conjunctival fornix.
Irrigation should be continued until the conjunctival sac is neutral on pH testing with universal indicator paper. Fluorescein staining is required to reveal the extent of corneal or conjunctival epithelial loss. Topical antibiotic ointments are indicated when corneal epithelial damage is identified. Use of steroid eye drops is not advocated unless expressly requested by an Ophthalmologist.

Manufactured for:
PROKÖZ, Inc.
100 North Point Center E.
Suite 330
Alpharetta, GA 30022

Mainsail is a trademark of PROKÖZ, INC.

For PRECAUTIONARY STATEMENTS:
See Inside Booklet.

For PRODUCT USE Information Call 1-770-619-9832.

FOR CHEMICAL SPILL, LEAK, FIRE, OR EXPOSURE,
CALL CHEMTREC (800) 424-9300

Net Weight: 5 lbs.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER/PELIGRO
Corrosive. Causes irreversible eye damage. May be fatal if inhaled. Causes skin irritation. Do not get in eyes, on skin, or on clothing. Do not breathe dust. Protracted or frequently repeated skin contact may cause allergic reactions in some individuals.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Mixers, loaders, applicators and all other handlers must wear:
- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material – Category A (such as barrier laminate, butyl rubber, neoprene rubber, natural rubber, polyethylene, polyvinyl chloride (PVC) or riot
- Chemical-resistant foot wear plus socks
- Protective eyewear
- Chemical-resistant headgear for overhead exposure
- Chemical-resistant upper body if clear plastic is being cleaned, rinsed, mixing, or loading
- A NIOSH-approved respirator with any N, R, P or HE filter
- For exposures in enclosed areas, such as a greenhouse, applicators and other handlers must wear a NIOSH-approved respirator with an organic vapor (OV) cartridge or canister with any N, R, P or HE pre-filter.
- Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/improperly of PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS STATEMENT
When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Work Protection Standard (WPS) for agricultural pesticides (40 CFR 170 170.240(4)-(6), the handler PPE requirements may be reduced or modified as specified in the WPS.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, or pets, either directly or through drift. Only professionals may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard (40 CFR Part 170). This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, health and/or medical certification, and emergency assistance. It also contains specific health and/or medical certifications pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry interval (REI). No REIs are required in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
- Coveralls over short-sleeved shirt and short pants
- Chemical-resistant gloves made of any waterproof material – Category A (such as barrier laminate, butyl rubber, neoprene rubber, natural rubber, polyethylene, polyvinyl chloride (PVC) or riot
- Chemical-resistant footwear plus socks
- Protective eyewear
- Chemical-resistant headgear for overhead exposure

Special Eye Imitation Provisions: This product is a severe eye irritant. Although the restricted entry interval expires after 12 hours, for the next 3-6 days, entry is permitted only when the following safety measures are provided:
1) At least one container designed specifically for flushing eyes must be available in operating condition at the WPS required decontamination site intended for workers entering the treated area.
2) Workers must be informed, in a manner they can understand:
   a) That flushing the treated area may be highly irritating to their eyes
   b) That they should take precautions, such as refraining from rubbing their eyes, to keep the residue of the product from entering their eyes
   c) That if they do get residues in their eyes, they should immediately flush their eyes using the eyewash container that is located at the decontamination site or using other readily available running water and
   d) How to operate the eyewash container

NON-AGRICULTURAL USES
For use to control diseases on turf on golf courses, lawns around institutional, public, commercial and industrial buildings, parks, recreational areas, and athletic fields.

NOTE: Use of this product on home lawns (turf) is prohibited.

For use to control diseases on turf on golf courses and landscapes around residential, institutional, public, commercial and industrial buildings, parks, recreational areas and athletic fields.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.
Do not enter or allow others to enter into treated areas until sprays have dried.

GENERAL INFORMATION
Mainsail WDG is an excellent disease control agent when used according to label directions for control of a broad spectrum of plant diseases. Mainsail WDG is recommended for use in programs which are compatible with the principles of integrated Pest Management (IPM), which include the use of disease resistant crop varieties, cultural practices, pest scouting and disease forecasting systems that reduce unnecessary applications of pesticides.

Resistance Management
Mainsail WDG is effective for strategic use in programs that attempt to minimize disease resistance to fungicides. Some other fungicides that are at risk from disease resistance exhibit a single-site mode of fungicidal action. Mainsail WDG, with a multi-site mode of action, may be used to delay or prevent the development of resistance to single-site fungicides. Consult with your federal or state Cooperative Extension Service representatives for guidance on the proper use of Mainsail WDG in programs which seek to minimize the occurrence of disease resistance to other fungicides.

GENERAL PRECAUTIONS AND RESTRICTIONS
Use of this product on home lawns is prohibited.

Agricultural Use Sites Only (soil, farms, farms, forests, nurseries and greenhouses). This product must be applied within 150 ft. for aerial applications) or 25 ft. for ground applications of marine/reservoir water bodies unless there is a untreated buffer area of that width between the area to be treated and the water body.

Do not combine Mainsail WDG with spray tank with pesticides, surfactants or fertilizers, unless prior use has shown the combination physically compatible, effective, and nonirritating under your conditions of use. Do not combine Mainsail WDG with OleoLan 8-100% or Lanolin Al 8-100%. Include specific information for the use of herbicides, agricultural pesticides, and other chemicals that may be in the area.

The required amount of Mainsail WDG should be added slowly into the spray tank during filling. When using concentrate sprays, premix the required amount of Mainsail WDG in a clean cleaner and add to the spray tank as it is being filled. Keep agitator running when filling spray tank and during spray operations.

Spray Drift Precautions
Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many environment-weather-related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.

The following drift management requirements must be followed to avoid off-target drift movement from aerial applications to agricultural field crops. These requirements do not apply to forestry applications, public health uses or to applications using dry formulations.
1. The distance of the outermost nozzles on the boom must not exceed 3/4 of the length of the wingspan or rotor.
2. Nozzles must always point backward parallel with the air stream and never be pointed downward more than 45 degrees.

When states have more stringent regulations, they should be observed.

The applicator should be familiar with and take into account the information covered in the Aerial Drift Reduction Advisory Information.

Aerial Drift Reduction Advisory Information
This section is advisory in nature and does not supersede the mandatory label requirements.

INFORMATION ON DROPLET SIZE:
The most effective way to reduce drift potential is to apply large droplets. The best drift management strategy is to apply the largest droplets that provide sufficient coverage and control. Applying larger droplets reduces drift potential, but will not prevent drift if applications are made improperly, or under unfavorable environmental conditions (see Wind, Temperature).

CONTROLLING DROPLET SIZE:
- Volume - Use high flow rate nozzles to apply the highest practical spray volume. Nozzles with the highest flow rates produce larger droplets.
- Pressure - Do not exceed the nozzle manufacturer's recommended pressures. For many nozzle types lower pressure may increase drift.
- Number of nozzles - Use the minimum number of nozzles that provide uniform coverage.
- Nozzle Orientation - Orienting nozzles so that the spray is released parallel to the airstream produces larger droplets than other orientations and is the recommended practice. Significant decreases in drift reduction from horizontal to upward increase droplet size and increase drift potential.
- Nozzle Type - Use a nozzle type that is designed for the intended application. With most mist nozzles, narrower spray angles produce larger droplets. Consider using low-drift nozzles. Solid stream nozzles oriented straight back produce the largest droplets and the lowest drift.

BOOM LENGTH: For some use patterns, reducing the effective boom length to less than 3/4 of the wingspan or rotor length may further reduce drift without reducing swath width.

SWATH ADJUSTMENT: When applications are made with a crosswind, the swath will be displaced downwind. Therefore, on the up and down eddies of the field, the applicator must consider the displacement and adjust the path of the aircraft. Safe swath Adjacent distance should increase, with increasing drift potential (higher wind, smaller drops, etc.)
A. Center Pivot, Motorized Lateral Move and Traveling Gun Irrigation Equipment

For injection of pesticides, these continuously moving systems must use a positive displacement injection pump, of either diaphragm or piston type, constructed of materials that are compatible with pesticides and capable of being fitted with a system int lock and capable of injection at pressures approximately 2-3 times those encountered within the irrigation water line. Venturi applicators cannot be used on these systems.

Fill chemical supply tank of injection equipment with water. Operate system for one complete revolution or run across the field, measuring time required, amount of water injected, and acreage covered. Thoroughly mix recommended amount of Mainsail® WDG for acreage to be covered into same amount of water used during calibration and inject into stream continuously for one revolution or run. Mixture in this chemical supply tank must be continuously agitated during the injection run. Shut off injection equipment after one revolution or run, but continue to operate irrigation system until Mainsail® WDG has been cleaned from last sprinkler head.

B. Solid Set and Portable (Wheel Move, Side Roll, End Tow, or Hand Move) Irrigation Equipment

With stationary systems, an effectively designed in-line Venturi applicator is preferred which is constructed of materials that are compatible with pesticides; however, a positive-displacement pump can also be used.

Determine acreage covered by sprinkler. Fill tank of injection equipment with water and adjust flow to use contents over a time to forty-five minute period. Mix desired amount of Mainsail® WDG for acreage to be covered with water so that the total mixture of Mainsail® WDG plus water in the injection tank is equal to the quantity of water used during calibration, and operate entire system at normal pressures recommended by the manufacturer of injection equipment used, for amount of time established during calibration. Ablation is recommended. Mainsail® WDG can be injected at the beginning or end of the irrigation cycle or as a separate application. Stop injection equipment after treatment is completed and continue to operate irrigation system until Mainsail® WDG has been cleaned from last sprinkler head.

APPLICATION DIRECTIONS

Turf

Group A. Golf Course Fairways, Sand Fills, Lawns (around institutional, public, commercial and Industrial buildings), and Other Turfgrass (parks, recreational areas and athletic fields) and Ornamental Turfgrass.

NOTE: Use of this chemical on home lawns is prohibited.

Golf Course Tees and Greens:

Golf Course Tees: Do not apply more than 63 pounds Mainsail® WDG (62 lbs. a.i.) per acre per growing season. The minimum re-treatment interval for single application rates up to 8.8 pounds Mainsail® WDG (7.3 lbs. a.i.) per acre is 7 days. The minimum re-treatment interval after an application of a rate greater than 8.8 pounds Mainsail® WDG (7.3 lbs. a.i.) per acre is 14 days. Do not apply more than two applications of a rate greater than 8.8 pounds Mainsail® WDG (7.3 lbs. a.i.) per acre per growing season.

Golf Course Greens: Do not apply more than 88.5 pounds Mainsail® WDG (73 lbs. a.i.) per acre per growing season. The minimum re-treatment interval for single application rates up to 8.8 pounds Mainsail® WDG (7.3 lbs. a.i.) per acre is 7 days and the minimum re-treatment interval for single application rates greater than 8.8 pounds Mainsail® WDG (7.3 lbs. a.i.) per acre is 14 days. Do not apply more than two applications of a rate greater than 8.8 pounds Mainsail® WDG (7.3 lbs. a.i.) per acre per growing season.

Apply Mainsail® WDG in an adequate amount of water to provide complete coverage. This amount may vary from 90 to 450 gallons per acre. See below for suggested rates and timing. Under severe disease conditions, use the high rate and apply on a 7-day schedule. Do not mix or water after treatment until spray deposited on turfgrass is thoroughly dry. Mainsail® WDG should always be used in conjunction with good turf management practices.
### Diseases Controlled*  
<table>
<thead>
<tr>
<th>Time Period</th>
<th>Pre-Disease Rates*</th>
<th>Post-Disease Rates*</th>
</tr>
</thead>
</table>

#### Pre-Disease Rates:  
- oz. product/1000 sq. ft.  
- lbs. product/acre  
- lbs. acre

#### Post-Disease Rates:  
- oz. product/1000 sq. ft.  
- lbs. product/acre  
- lbs. acre

*Group A Turf: Limit one application per season at rates greater than 7.3 lbs/acre (8.8 lbs/acre or 3.35 oz./1000 sq. ft.) of MainSail® WDG.  
*Group B Turf: Limit two applications per season at rates greater than 7.3 lbs/acre (8.8 lbs/acre or 3.35 oz./1000 sq. ft.) of MainSail® WDG.  
*Low rate is not effective on intensive mowed turf grasses such as golf course tees and greens.

### ORNAMENTAL PLANTS

#### Diseases Controlled with MainSail® WDG

- **Flowering Plants and Shrubs**
  - **Breadth Shrubs and Trees**
    - Antheroe (Pericallis) (2)
    - Acanthus (1)
    - Azalea (1)
    - Babia (1)
    - Buddleja (1)
    - Crape myrtle (1)
    - Dogwood (1)
    - Euonymus (1)
    - Fothergilla (1)
    - Flowering Almond (1)
    - Flowering Cherry (1)
    - Flowering Peach (1)
    - Flowering Plum (1)
    - Flowering Quince (1)
    - Hawthorn (1)

- **Foliage Plants**
  - **Foliage Possibilities**
    - Acer (1)
    - Aesculus (1)
    - Ardisia (1)
    - Crape myrtle (1)
    - Euonymus (1)
    - Fothergilla (1)
    - Geum (1)
    - Gleditsia (1)
    - Hydrangeas (1)

- **Use 2.5 pounds of MainSail® WDG (2.1 lbs. a.i.) per 100 gallons of water.**

### Diseases Controlled with MainSail® WDG

1. **Leaffoots/Flower Flies**

2. **Flower Spots/Flies**

3. **Cylindrocladium stem rot**

4. **Phytophora leaf blight, dieback**

5. **Powdery Mildews**

6. **Rusts**

7. **Tan Lines**

---

*Fruits and other structures, which may be shown on treated plants, MUST NOT BE EATEN.

---

*MainSail® WDG may be used in greenhouses. Do not use on broccoli or high-pressure spray equipment when applying materials of MainSail® WDG in greenhouses.

Use of MainSail® WDG is recommended for control of fungal diseases referred to by numbers in parentheses following each ornamental. Ornamentals listed on this label have been tested and found to tolerate applications of MainSail® WDG at the recommended rates. The user should test for possible phytotoxic responses, using recommended rates on ornamental plants on a small area prior to commercial use. Applications made during blossom formation may influence flowering and/or fruit yield.

### ORENNAMENTAL RECOMMENDED FOR TREATMENT WITH MAINSAIIL® WDG

- **Broadleaf Shrubs and Trees**
  - Antheroe (Pericallis) (2)
  - Acanthus (1)

</table>

**NOTE:** Do not apply Mainesall™ WDQ to easter green or variegated Pittosporum or to Schellia, as multiple applications have been demonstrated to cause phytotoxic effects.

**TREE AND ORCHARD CROPS**

Apply Mainesall™ WDQ in sufficient water and with proper calibration to obtain uniform coverage of the tree canopy. Application with ground equipment is preferable to aerial application because ground applications generally give better coverage of the tree canopy. If application with ground equipment is not feasible, Mainesall™ WDQ may be applied with aircraft using at least 20 gallons of spray per acre. When concentrate sprays are used or when treating non-bearing or immature trees, the lower rate of Mainesall™ WDQ may be used.

Do not apply to livestock to graze in treated areas. The following spray volumes are recommended as gallons of spray per acre:

<table>

STORAGE AND DISPOSAL
Do not contaminate waste, food, or feed by storage or disposal.
PESTICIDE STORAGE: Store in a dry place.
PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. It burned, stay out of smoke.

CONDITION OF SALE AND LIMITATION OF WARRANTY AND LIABILITY
NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.
The Directions for Use of this Product should be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather presence of other materials or other influencing factors in the use of the product, which are beyond the control of PROKIZ, INC., or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold PROKIZ, INC. and Seller harmless for any claim relating to such factors.
PROKIZ, INC. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or PROKIZ, INC., and Buyer and User assume the risk of any such use. PROKIZ, INC. MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.
To the extent permitted by law, neither PROKIZ, INC. nor Seller shall be liable for any incidental, consequential or special damages resulting from the use or handling of this product. THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF PROKIZ, INC. AND SELLER FOR ANY AND ALL CLAIMS, LOSS, INJURIES OR DAMAGES INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF PROKIZ, INC. OR SELLER, THE REPLACEMENT OF THE PRODUCT.
PROKIZ, INC. and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of PROKIZ, INC.
