FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

Onager Miticide

EMULSIFIABLE CONCENTRATE FOR AGRICULTURAL USE ONLY
EPA Reg. No. 10163-277, EPA SLN No. WA-060021

This label for Onager Miticide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2015.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
- This labeling must be in the possession of the user at the time of pesticide application.

<td>ALFALFA GROWN FOR SEED</td>
<td>Twospotted Spider Mite</td>
<td>12 – 16</td>
<td>Onager is active against all immature stages of spider mites, including freshly laid eggs. Therefore, it is important to apply Onager prior to adult mite buildup. Scout and apply early when mites first begin colonizing the upper 1/3 to 1/2 of the plant canopy. An early application timing and thorough coverage are essential for acceptable control. Apply Onager by ground in a minimum of 20 gallons of water per acre at a minimum of 35 psi to insure optimum coverage.</td>

RESTRICTIONS / PRECAUTIONS

- Do not use current year's treated seed crop for hay or forage.
- Do not graze current year's treated seed crop.
- Do not use seed harvested from alfalfa treated with Onager under this SLN for sprouting.
- Do not enter treated area without label prescribed Personal Protective Equipment for 12 hours after application.
- All alfalfa seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the director immediately upon request. Conditioner disposal records shall consist of documentation of on-farm disposal, disposal at a controlled dumpsite, incinerator, composter or other equivalent disposal site and shall include the lot numbers, amount of material disposed of, the grower(s), and the date of disposal.
- No portion of the alfalfa seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes. Alfalfa seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed. Alfalfa seed may not be distributed for human consumption or animal feed.
- If Onager Miticide is tank mixed with another product that is hazardous to bees, then follow the more restrictive label use directions, precautions, and restrictions to protect bees.
- Refer to the federally registered label for precautionary statements and statement of practical treatment.
- Do not apply within 4 weeks of harvest.
- Do not make more than one application per year.
- For use under this SLN label do not apply this product through any type of irrigation system.

AQUATIC ADVISORY: This pesticide is toxic to fish and aquatic invertebrates. Onager Miticide should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.
**WSDA Container Disposal Guidance:** Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at [http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx](http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx). Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.
