GENERAL: MSO® Concentrate with Leci-Tech® is a spray adjuvant formulated to enhance activity of post-applied herbicides. Post-applied herbicides such as, but not limited to, Pursuit®, Accent® and Poast® have demonstrated improved performances when used with methylated seed oil. Refer to pesticide label being used regarding specific adjuvant use recommendations. MSO Concentrate with Leci-Tech is designed to replace petroleum-based crop oils and other esterified oil adjuvants. MSO Concentrate with Leci-Tech is formulated from agriculturally derived oil. MSO Concentrate with Leci-Tech contains high-quality surfactants and emulsifiers for easy mixing in spray solutions. For tank mix compatibility concerns, conduct a jar test of the proposed mixture to ensure compatibility of all components. Mix components in the same ratio as the proposed tank mix.

DIRECTIONS FOR USE: Fill spray tank ½ full with water and begin agitation. Add pesticides, as directed by label, while maintaining agitation. After pesticides are thoroughly mixed, add MSO Concentrate with Leci-Tech at recommended rate. The rates listed are suggested use rates. Refer to pesticide label being used regarding specific adjuvant use recommendations. The higher rate should be used if plants are stressed at the time of treatment. MSO Concentrate with Leci-Tech may be mixed with UAV solutions when directed by the pesticide label. Do not add adjuvant at a level that would exceed 5% of the finished spray volume unless otherwise specified by the pesticide label.

THIS PRODUCT CAN BE USED IN THE FOLLOWING SETTINGS: AGRICULTURAL, AQUATIC (WETLANDS)*, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, ORNAMENTAL, RIGHTS-OF-WAY AND TURF. *(NOT FOR AQUATIC USE IN CALIFORNIA AND WASHINGTON.)

SUGGESTED USE RATES: 1 to 2 pints per acre MSO Concentrate with Leci-Tech
