A water-based formulation.

ACTIVE INGREDIENTS:
- Sumithrin® - 3-Phenoxycyclene(R)-3RL, 1RL, 3SR, 2SR)-2, 2-Dimethyl-3-(2-Methylpropanoyl-1-ethyl Cyclopropane-carboxylate 10.00%
- Permethrin Techrect® 10.00%
- OTHER INGREDIENTS 30.00%

* Equivalent to 0.005% (2,2-dibromo-2-chloro-N,N,N-trimethylamphetamine) and 0.005% related compounds.
Contains 0.047 pounds of Technical SUMITHRIN® per Gallon and 0.047 pounds Technical Permethrin Techrect®

KEEP OUT OF REACH OF CHILDREN

CAUTION
- Flammable
- Keep out of direct sunlight
- Do not store near heat
- Do not store near open flame
- Do not store near water
- Keep out of reach of children

PRECAUTIONARY STATEMENTS
- HAZARDS TO HUMANS AND DOMESTIC ANIMALS
  CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.
- ENVIRONMENTAL HAZARDS
  This product is toxic to aquatic organisms, including fish and aquatic invertebrates. Runoff from treated areas or deposition of spray droplets into a body of water may be hazardous to fish and aquatic invertebrates. Do not apply over bodies of water (lakes, rivers, permanent streams, oxbow lakes, commercial fish ponds, swamps, marshes or estuaries), except when necessary to treat areas where adult mosquitoes are present, and weather conditions will facilitate movement of applied material away from the water. Do not contaminate bodies of water when disposing of equipment rinsewater or washwater.
- SEE WARNINGS. This product is toxic to beneficial insects. Do not apply to or allow drift onto blooming crops or weeds where bees are visiting the treatment area, except when applications are made to prevent or control a threat to public or animal health determined by a state, tribal or local health or vector control agency on the basis of documented evidence of disease causing agents in vector mosquitoes or the occurrence of mosquito-borne disease in animal or human populations, or if specifically approved by the state or tribe during a natural disease recovery effort.

DIRECTIVES FOR USE
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For use only by federal, state, tribal or local government officials responsible for public health or vector control, or by persons certified in the appropriate category or otherwise authorized by the state or tribal lead pesticide regulatory agency to perform adult mosquito control applications, or by persons under their direct supervision.

Before making the first application in a season, it is advisable to consult with the state or tribal health agency for primary responsibility for pesticide registration to determine if other regulatory requirements exist.

In California: This product is to be applied by County Health Department, State Department of Health Services, Mosquito and Vector Control or Mosquito Abatement District personnel only.

Throughout the longer day length and longer nights, aquatic species can be killed.

AquaAva™ cannot be mixed with oil. Use only clear water.

Shake or agitate thoroughly before use. Diluted product must be thoroughly agitated before use. Avoid excess diffusion in equipment.

USE AREAS: For use in mosquito abatement programs involving outdoor residential and recreational areas where adult mosquitoes are present in annoying numbers, and in vegetation surrounding ponds, wooded areas, swamps, marshes, or other relatively still water reservoirs. For termite control, apply when mosquitoes are most active and meteorological conditions are conducive to keep the spray cloud dense to the ground. Application in calm air conditions is essential. Apply only when ground wind speed is greater than 1 mph. Air temperature should be greater than 50°F when conducting all types of applications.

RATES TO USE AQUAAVA UNILITED (1 TO 2 DILUTION RATIO) AQUAAVA™ FOR MOSQUITO CONTROL:

| Pounds | a/a, Ace. | Finished Spray | Flow rates in fluid oz / minute at truck speeds of |
|--------|----------|---------------|---------------------------------------------------|-------|-------|-------|-------|
| Sumithrin® PRD | AquaAva | at truck speeds of |
| 0.0036 | 0.0036 | 1.63 | 4.9 | 9.9 | 14.9 | 19.5 |
| 0.0045 | 0.0045 | 1.69 | 5.3 | 10.1 | 14.9 | 19.7 |
| 0.0051 | 0.0051 | 1.75 | 5.7 | 10.6 | 15.3 | 20.0 |

AquaAva™ may be applied with non-thermal, portable, motorized backpack equipment approved by AMP’s Technical Committee. Use 0.18 to 0.54 fl. oz. of the unlabeled spray per acre (equal to 0.0112 to 0.0368 lbs/Acre) as a 50 ft (15.2 m) swath while walking at a speed of 2 mph (3.2 kph).

AquaAva™ may be applied for urban or urban mosquito control. For control of resting or flying adult mosquitoes, biting flies and biting midges in areas such as utility tunnels, sewers, storm drains and catch basins, pipe chases, underground basements, underground passages, parking decks, crypted spaces or unlighted buildings. AquaAva™ may be applied using mechanical hoppers, fan-inlet or tank mounted equipment, thermal foggers or other spray equipment available for this application. Apply AquaAva™ at rates up to but not exceeding 0.002 pounds summithrin per acre per twenty-four hour period (not to exceed 1.0 pounds summithrin per acre in any site in any year).

AERIAL APPLICATION: AquaAva™ may be applied at rates of 0.18 to 0.54 fluid ounces per acre, per fly or aircraft equipped with suitable UAV application equipment. AquaAva™ may also be diluted with water and applied by aerial ULV equipment so long as the 0.54 fluid ounces per acre of AquaAva™ is not exceeded. Application rates may be up to 275 feet to 300 feet for rotary aircraft and up to 300 feet for fixed-wing aircraft.

In Florida: Do not apply by aircraft unless approved by the Florida Department of Agriculture and Consumer Services.

STORAGE AND DISPOSAL
- Do not contaminate water, food or feed by storage or disposal.
- PESTICIDE STORAGE: Store in a cool, dry place. Keep container closed.
- PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
- CONTAINER DISPOSAL: Reutilize container. Refill container with pesticide only. Do not reuse this container for any other purpose. Cleaning before refilling is the responsibility of the mixer. To the container before final disposal, empty the remaining contents from this container into application equipment or a clean tank. Fill the container about 10% full with water. Add 10% concentrated detergent to the water for 2 minutes. Pour or pump mixture into a waste collection system. Repeat this rinsing procedure two more times. Offer for recycling if available or reconditioning if inadequate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
