Chaser® 2 Amine

ACTIVE INGREDIENT(S):
- 2,4-dichlorophenoxyacetic acid, dimethylamine* ........................................... 34.2%
- Triclopyr: 3,5,6-trichloro-2-pyridinyl-oxyacetic acid, as the triethylamine salt** .................. 15.2%
INERT INGREDIENT(S): ........................................................................................................ 50.6%
TOTAL ................................................................................................................................. 100.0%

Isomer Specific by AOAC Method, Equivalent to:
* 2,4-dichlorophenoxyacetic acid .. 28.4% - 2.78 lb./gal.
** Triclopyr acid .................. 10.9% - 1.07 lb./gal.

FOR THE CONTROL OF UNWANTED TREES AND BRUSH, AS WELL AS ANNUAL AND PERENNIAL BROADLEAF WEEDS ON RANGELAND, PASTURES, FENCEROWS, NON-IRRIGATION DITCHBANKS, ROADSIDES, OTHER NON-CROP AREAS, RIGHTS-OF-WAY, ORNAMENTAL TURF AND SOO FARMS.

KEEP OUT OF REACH OF CHILDREN
DANGER — PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.) Refer to inside of label booklet for Precautionary Information, First Aid and Directions For Use, including STORAGE AND DISPOSAL. Notice: Read the entire label. Use only according to label directions.

<table>
<thead>
<tr>
<th>FIRST AID</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>If in eyes:</strong></td>
</tr>
<tr>
<td>• Hold eye open and rinse slowly and gently with water for 15 - 20 minutes.</td>
</tr>
<tr>
<td>• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</td>
</tr>
<tr>
<td>• Call a poison control center or doctor for treatment advice.</td>
</tr>
</tbody>
</table>

| **If on skin or clothing:** |
| • Take off contaminated clothing. |
| • Rinse skin immediately with plenty of water for 15 - 20 minutes. |
| • Call a poison control center or doctor for treatment advice. |

| **If swallowed:** |
| • Call a poison control center or doctor immediately for treatment advice. |
| • Have a person sip a glass of water if able to swallow. |
| • Do not induce vomiting unless told to do so by the poison control center or doctor. |
| • Do not give anything by mouth to an unconscious person. |

| **If Inhaled:** |
| • Move person to fresh air. |
| • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. |
| • Call a poison control center or doctor for further treatment advice. |

*Note to physician: Probable mucosal damage may contraindicate use of gastric lavage.*

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT, CALL: 1-866-944-9565.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

EPA REG. NO. 34704-930
EPA EST. NO. 34704-MS-001
NET CONTENTS 2% GALS. (9.46L)
Personal Protective Equipment (PPE):
Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category “A” on an EPA chemical-resistance category selection chart.

All mixers, loaders, applicators, flaggers and other handlers must wear:
• Coveralls over short-sleeved shirt and short pants,
• Chemical-resistant footwear plus socks,
• Goggles or face shield,
• Chemical-resistant gloves,
• Chemical-resistant apron when mixing, loading, cleaning equipment and
• Chemical-resistant headgear for overhead exposure.

See Engineering Controls for additional requirements.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. After each day of use, clothing or PPE must not be reused until it has been cleaned.

For containers of over 1 gallon, but less than 5 gallons: Mixers and loaders who do not use a mechanical system (such as probe and pump) to transfer the contents of this container must wear coveralls or a chemical resistant apron in addition to other required PPE.

Engineering Controls Statements:
Enclosed Cockpits
Pilots must use an enclosed cockpit that meets the requirements listed in the WPS for agricultural pesticides [40 CFR 170.240(d)(6)].

When handlers use enclosed cabs or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

<table>

<tr>
<th>USER SAFETY RECOMMENDATIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.</td>
</tr>
<tr>
<td>Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. If pesticide gets on skin, wash immediately with soap and water.</td>
</tr>
<tr>
<td>Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>ENVIRONMENTAL HAZARDS</th>
</tr>
</thead>
<tbody>
<tr>
<td>This pesticide may be toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or rinsate.</td>
</tr>
<tr>
<td>This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.</td>
</tr>
<tr>
<td>Mixing and Loading: Most cases of groundwater contamination involving phenoxy herbicides such as 2,4-D have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-D pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.</td>
</tr>
</tbody>
</table>

CHASER® 2 AMINE  
EPA REG. NO. 34704-930

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
- Coveralls,
- Chemical-resistant gloves made of any waterproof material,
- Shoes plus socks and
- Protective eyewear.

### NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

**Restricted Entry Interval:** Do not enter or allow people or pets to enter the treated area until sprays have dried.

### PRODUCT INFORMATION

Chaser® 2 Amine herbicide is for use on Fence Rows, Non-Irrigation ditchbanks, Roadsides, other Non-crop Areas, Industrial sites, Rights-of-way.

### USE PRECAUTIONS

Be sure that use of this product conforms to all applicable regulations.

**Restrictions on Retreatment:** Do not apply more than 2 broadcast applications per year per treatment site.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

Do not apply Chaser 2 Amine directly to, or otherwise permit it to come into direct contact with, cotton, grapes, tobacco, vegetable crops, flowers, fruit or ornamental trees, or other desirable broadleaf plants and do not permit spray mists containing it to drift onto them. Very small amounts of spray drift may injure susceptible plants, including ornamental trees or shrubs.

Do not use for manufacturing or formulating.

**Do not apply to exposed roots of shallow rooted trees or shrubs.**

Do not apply on ditches used to transport irrigation water. Do not apply where runoff or irrigation water may flow onto susceptible crops as injury may result.

**Chemigation:** Do not apply this product through any type of irrigation system.

### SPRAY DRIFT MANAGEMENT

A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application (e.g., ground, aerial, airblast, chemigation) can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

**Droplet Size**

When applying sprays that contain 2,4-D as the sole active ingredient, or when applying sprays that contain 2,4-D mixed with active ingredients that require a Coarse or coarser spray, apply only as a Coarse or coarser spray (ASAE standard 572) or a volume mean diameter of 385 microns or greater for spinning atomizer nozzles.

When applying sprays that contain 2,4-D mixed with other active ingredients that require a Medium or more fine spray, apply only as a Medium or coarser spray (ASAE standard 572) or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles.

**Wind Speed**

Do not apply at wind speeds greater than 15 mph. Only apply this product if the wind direction favors on-target deposition and there are not sensitive areas (including, but not limited to, residential areas, bodies of water, known habitat for nontarget species, nontarget crops)
within 250 feet downwind. If applying a Medium spray, leave one swath unsprayed at the downwind edge of the treated field.

**Temperature Inversions**
If applying at wind speeds less than 3 mph, the applicator must determine if: a) conditions of temperature inversion exist, or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

**Susceptible Plants**
Do not apply under circumstances where spray drift may occur to food, forage, or other plantings that might be damaged or crops thereof rendered unfit for sale, use or consumption. Susceptible crops include, but are not limited to, cotton, okra, flowers, grapes (in growing stage), fruit trees (foliage), soybeans (vegetative stage), ornamentals, sunflowers, tomatoes, beans, and other vegetables, or tobacco. Small amounts of spray drift that might not be visible may injure susceptible broadleaf plants.

**Other State and Local Requirements**
Applicators must follow all state and local pesticide drift requirements regarding application of 2,4-D herbicides. Where states have more stringent regulations, they must be observed.

**Equipment**
All aerial and ground application equipment must be properly maintained and calibrated using appropriate carriers or surrogates.

**Additional requirements for aerial applications:**
The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter. Release spray at the lowest height consistent with efficacy and flight safety. Do not release spray at a height greater than 10 feet above the crop canopy unless a greater height is required for aircraft safety. This requirement does not apply to forestry or rights-of-way applications. When applications are made with a crosswind, the swath will be displaced downwind. The applicator must compensate for this by adjusting the path of the aircraft upwind.

**Additional requirements for ground boom applications:**
Do not apply with a nozzle height greater than 4 feet above the crop canopy.

**USE PRECAUTIONS**
Foliar sprays should be applied during warm weather when brush and weeds are actively growing. Application under drought conditions may provide less than desirable results.

With aerial applications use a drift control system such as Microfoil or Thru-Valve booms®, or high quality drift control additive. Keep spray pressures low enough to provide coarse spray droplets. Spray booms should be no longer than ⅜ of the rotor length. Do not use a thickener agent with the Microfoil or the Thru-Valve booms, or other systems that cannot accommodate thick sprays. Spray only when the wind velocity is low (follow state regulations). Avoid calm conditions which may be conducive to air inversions.

**NOTE:** Do not use spray equipment for other applications to land planted, or to be planted to susceptible crops or desirable plants, unless it has been determined that all phytotoxic herbicide residue has been removed by thorough cleaning of the equipment.

**APPROVED USES**

**Grazing Restrictions**
If site is used for grazing:
Apply a maximum of 1 lb per acre Triclopyr (1 gal. of Chaser 2 Amine) per application.
Do not make more than one application per year.
Do not graze lactating dairy cattle until the next growing season after application.
Remove meat animals from treated areas 3 days prior to slaughter.

**Non-Irrigation Ditchbank application**
**Postemergence:** Limited to 2 applications per season. Maximum of 2.0 lbs ae 2,4-D per acre per application. Minimum of 30 days between applications. Spot treatment permitted.
Do not use on small canals with a flow rate less than 10 cubic feet per second (CFS) where water will be used for drinking purposes. CFS may be estimated by using the formula below. The approximate velocity needed for the calculation can be determined by observing the length of time that it takes a floating object to travel a defined distance. Divide the distance (ft.) by the time (sec.) to estimate velocity (ft. per sec.). Repeat 3 times and use the average to calculate CFS.

Average Width (ft.) x Average Depth (ft.) x Average Velocity (ft. per sec.) = CFS.

For ditchbank weeds: Do not allow boom spray to be directed onto water surface. Do not spray across stream to opposite bank.
For shoreline weeds: Allow no more than 2 foot overspray onto water.

**Fallowland (crop stubble on idle land, or past harvest to crops, or between crops)**
Plant only labeled crops within 29 days following application. Limited to 2 applications per year. Maximum of 2.0 lbs ae 2,4-D per acre per application. Minimum of 30 days between applications.

**Forestry (forest site preparation, forest roadsides, brush control, established conifer release, Christmas trees, reforestation areas)**
**Broadcast application:** Limited to 1 broadcast application per year. Maximum of 4.0 lbs ae 2,4-D per acre per broadcast application.
CHASER® 2 AMINE
EPA REG. NO. 34704-930

Basal spray, Cut Surface - Stumps, and Frill: Limit of one basal spray or cut surface application per year. Maximum of 8.0 lbs ae 2,4-D per 100 gallons of spray solution.
Injection: Limit to one injection application per year. Maximum of 2 ml of 4.0 lbs ae 2,4-D formulation per injection site.

Non-Cropland (fencerows, hedgerows, roadsides, ditches, rights-of-way, utility power lines, railroads, airports, and industrial sites)
Postemergence (annual and perennial weeds): Limited to 2 applications per year. Maximum of 2.0 lbs ae 2,4-D per acre per application. Minimum of 30 days between applications.

Postemergence (woody plants): Limited to 1 application per year. Maximum of 4.0 lbs ae 2,4-D per acre per year. Applications to non-cropland areas are not applicable to treatment of commercial timber or other plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.

Pasture and Rangeland (established grass pastures, rangeland, and perennial grasslands not in agricultural production): Maximum of two applications per year. Maximum of 4.0 lbs ae 2,4-D per acre per year. Minimum of 30 days between applications. Do not cut forage for hay within 14 days of application.
Postemergence: For susceptible annual and biennial broadleaf weeds: Use 1.0 lbs ae 2,4-D per acre per application.
For moderately susceptible biennial and perennial broadleaf weeds: Use 1.0 to 2.0 lbs ae 2,4-D per acre per application.
For difficult to control weeds and woody plants: Use 2.0 lbs ae 2,4-D per acre per application.
Spot treatment: Use 2.0 lbs ae 2,4-D per acre. If grass is to be cut for hay, Agricultural Use Requirements for the Worker Protection Standard are applicable.

If grass is to be cut for hay, Agricultural Use Requirements for the Worker Protection Standard are applicable.

Turf, ornamental (golf courses, cemeteries, parks, sports fields, turfgrass, lawns and other grass areas)
Postemergence: Limited to 2 applications per year. Maximum of 1.5 lbs ae 2,4-D per acre per application. The maximum seasonal rate is 3.0 lbs ae 2,4-D per acre, excluding spot treatments.

Turf, grown for seed or sod: Limited to 2 applications per year. Maximum of 2.0 lbs ae 2,4-D per acre per application. Minimum of 21 days between applications.

Easy-To-Control Species: Use 1.5 gal/acre broadcast application or 1 to 1.5% solutions for high-volume foliar applications.

Alder
Ash
Beech
Birch
Blackberry
Black Locust
Boneset
Cascara
Ceanothus spp.
Cherry (except black)
Cottonwood
Dogwood
Elderberry
Hawthorn
Honeysuckle
Maples (except bigleaf and vine*)
Multiflora Rose
Poison Ivy
Poison Oak
Sassafras (top growth)
Scotch Broom
Sumac
Sycamore
Tamarack
Wax Myrtle (top growth)
White Oak
Wild Grape
Willow

*basal or dormant stem application only

Harder-To-Control Species: High-volume applications, 1.5% solution, conventional basal or dormant stem applications are recommended. A broadcast rate of 2 to 4 gal/acre will increase the degree of control of these species. See grazing restrictions when rates of application greater than 1.5 gal/acre are used.

Buckbrush
(Common Persimmon (suppression))
Common Persimmon (suppression)
Elm (except winged elm)
Hazel
Honeysuckle (suppression)
Pine (suppression)
Russian olive
Salmonberry (suppression)
Sweetgum
Trumpet creeper (suppression)
Virginia Creeper (suppression)

Preparing the Spray
Add about one-half the desired amount of clean water to spray tank. Add Chaser 2 Amine and complete addition of water with agitation running. Mix thoroughly and continue moderate agitation while spraying.

Size of Sprayer (Gallons) | 1% Solution | 1.5% Solution | 4% Solution
---|-------------|---------------|---------------|

20 | 2 quarts | 3 quarts | 2 gallons |
100 | 1 gallon | 1.5 gallons | 4 gallons |

APPLICATION INSTRUCTIONS

Turf
Broadcast Treatment of Ornamental Turf and Sod Farms
Apply 1 to 2 quarts (.69 to 1.39 lb ae 2,4-D) of Chaser 2 Amine in enough water to make 20 to 200 gallons total spray per acre to control broadleaf weeds growing in perennial bluegrass, tall fescue, or perennial ryegrass. Do not use on other grass species, such as bentgrass or St. Augustinegrass, unless injury can be tolerated. Apply from early spring through fall when weeds are actively growing. Broadleaf weed species germinate at different times. Only emerged weeds present at time of application are controlled. Additional applications should be made four weeks apart to minimize grass injury. Newly seeded turf should be mowed two or three times before being treated. Do not water for 24 hours after application. Do not reseed for 3 weeks after application.

Spot Treatment of Ornamental Turf Using Portable Sprayers
Mix 1 to 2 fluid ounces (.02 to .04 lb ae 2,4-D) of Chaser 2 Amine in enough water to make 3 gallons of spray (1 to 2 quarts per 100 gallons of spray) and apply at any time broadleaf weeds are susceptible by wetting foliage of undesirable plants to point of runoff.
STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store above 28°F or agitate before use.

**Pesticide Disposal:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate, is a violation of Federal law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**Container Disposal:** Nonrefillable container. Do not reuse this container to hold materials other than pesticides or dilute pesticides (rinsate). After emptying and cleaning, it may be allowable to temporarily hold rinsate or other pesticide-related materials in the container. Contact your state regulatory agency to determine allowable practices in your state. Once cleaned, some agricultural plastic pesticide containers can be taken to a container collection site or picked up for recycling. To find the nearest site, contact your chemical dealer or manufacturer, or contact The Agricultural Container Recycling Council (ACRC) at www.acrcycle.org.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

**For packages up to 5 gallons:** Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. **Pressure rinse as follows:** Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

**For packages greater than 5 gallons and less than 56 gallons:** Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. **Pressure rinse as follows:** Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

**For packages greater than 56 gallons:** To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

**For refillable containers:** Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

**For help with any spill, leak, fire or exposure involving this material, call day or night CHEMTREC - 1-800-424-9300.**

CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

**BEFORE BUYING OR USING THIS PRODUCT,** read the entire Directions for Use and the following Conditions of Sale and Limitation of Warranty and Liability. By buying or using this product, the buyer or user accepts the following Conditions of Sale and Limitation of Warranty and Liability, which no employee or agent of LOVELAND PRODUCTS, INC., or the seller is authorized to vary in any way.

Follow the Directions for Use of this product carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop or other plant injury, ineffectiveness, or other unintended consequences may result from such risks as weather or crop conditions, mixture with other chemicals not specifically identified in this product’s label, or use of this product contrary to the label instructions, all of which are beyond the control of LOVELAND PRODUCTS, INC., and the seller. The buyer or user of this product assumes all such inherent risks.

Subject to the foregoing inherent risks, LOVELAND PRODUCTS, INC., warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use when the product is used in strict accordance with such Directions for Use under normal conditions of use. EXCEPT AS WARRANTED IN THIS LABEL AND TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THIS PRODUCT IS SOLD "AS IS," AND LOVELAND PRODUCTS, INC. MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ELIGIBILITY OF THIS PRODUCT FOR ANY PARTICULAR TRADE USAGE.

**IN THE UNLIKELY EVENT THAT BUYER OR USER BELIEVES THAT LOVELAND PRODUCTS, INC. HAS BREACHED A WARRANTY CONTAINED IN THIS LABEL AND TO THE EXTENT REQUIRED BY APPLICABLE LAW, BUYER OR USER MUST SEND WRITTEN NOTICE OF ITS CLAIM TO THE FOLLOWING ADDRESS: LOVELAND PRODUCTS, INC., ATTENTION: LAW DEPARTMENT, P.O. BOX 1288, GREELEY, CO 80632-1288.**
CHASER® 2 AMINE
EPA REG. NO. 34704-930

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE BUYER’S OR USER’S EXCLUSIVE REMEDY FOR ANY INJURY, LOSS, OR DAMAGE RESULTING FROM THE HANDLING OR USE OF THIS PRODUCT, INCLUDING BUT NOT LIMITED TO CLAIMS OF BREACH OF WARRANTY OR CONTRACT, NEGLIGENCE, STRICT LIABILITY, OR OTHER TORTS, SHALL BE LIMITED TO ONE OF THE FOLLOWING, AT THE ELECTION OF LOVELAND PRODUCTS, INC. OR THE SELLER: DIRECT DAMAGES NOT EXCEEDING THE PURCHASE PRICE OF THE PRODUCT OR REPLACEMENT OF THE PRODUCT, TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, LOVELAND PRODUCTS, INC. AND THE SELLER SHALL NOT BE LIABLE TO THE BUYER OR USER OF THIS PRODUCT FOR ANY CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES, OR DAMAGES IN THE NATURE OF A PENALTY.
