GENERAL INFORMATION

CENTAUR® WG insect growth regulator contains the active ingredient, buprofezin. It is effective against the nymph stages of whiteflies, scales, psylla, mealybugs, planthoppers, and leafhoppers by inhibiting chitin biosynthesis, suppressing reproduction of adults, and reducing viability of eggs. Treated susceptible pests may remain alive on the plant for 3-7 days, but feeding damage during this time is typically very low.

CENTAUR® WG insect growth regulator is not disruptive to beneficial insects and mites.

Good coverage is essential. Apply by ground or air in sufficient water volume. Orient nozzles to assure good coverage. Use of higher volume of water will assure better coverage, especially under adverse conditions such as hot, dry weather and/or a dense canopy. The entire field should be treated.

Apply when economic infestations occur based on local information.

CENTAUR® WG insect growth regulator is not for sale, sale into, distribution, or use in Nassau and Suffolk counties of New York state.

RESISTANCE MANAGEMENT

CENTAUR® WG insect growth regulator is classified by IRAC in Group 16 – chitin synthesis inhibitors and is not known to be cross-resistant to other classes of insecticides. However, insect pests are known to develop resistance to products used repeatedly.

Because resistance development cannot be predicted, the use of this product should conform to resistance management strategies established for the crop and use area. Such strategies may include rotating with insecticides with different modes of action.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

If Inhaled
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

If on Skin or Clothing
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in Eyes
- Hold eye open and rinse slowly and gently with water for 15-30 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If Swallowed
- Call poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor or
Precautionary statements
Hazards to humans and domestic animals

Caution

Harmful if swallowed. Wash thoroughly with soap and water after handling. Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if inhaled. Avoid breathing spray mist. Avoid contamination of clothing and wash before reuse.

Personal protective equipment (PPE)
Applicants and other handlers must wear:
- Long-sleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User safety recommendations
Users should Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Engineering controls statement
When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170, 240 (d), (a-66), the handler PPE requirements may be reduced or modified as specified in the WPS.

Environmental hazards
For terrestrial uses, do not apply directly to water, or to areas through which surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of equipment washwater.

Important: Read the entire Directions for Use and Disposal of Containers before using this product.

Directions for use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a manner that will affect workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Agricultural use requirements
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and specifications pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plow, hoe, or water, is:
- Coveralls over long-sleeved shirt and long pants
- Waterproof gloves
- Socks and chemically resistant footwear

Resistence management
CENTAUR WDG insect growth regulator is classified by FIFAC in Group 16 - cholinesterase inhibitors and is not known to be cross-resistant to other classes of insecticides. However, insect pests are known to develop resistance to products used repeatedly. Because resistance development cannot be predicted, the use of this product should conform to resistance management strategies established for the crop and use area. Such strategies may include rotating with insecticides with different modes of action. Consult your local pest control advisor or extension office for details. If resistance to this product develops in your area, it may not provide adequate control. If you experience difficulty with control, and resistance is likely cause, consult your state university entomological specialist or local agricultural authorities for the best alternative method of control. To preserve the usefulness of CENTAUR WDG insect growth regulator, do not make more than two consecutive applications. Prior to subsequent applications, use an alternative chemistry with a different mode of action. Always consult your local crop advisor for the most appropriate control decision for your area. Resistance management strategies advise against applying rates lower than those recommended on the label.

Mixing, loading, and handling instructions
Specific mixing instructions
CENTAUR WDG Insect Growth Regulator Alone: Fill spray tank with 3/4 of the amount of water needed for the intended application and then turn on agitation. Pour recommended amount of product on surface of water in the spray tank. Add the balance of the water to the spray tank with agitation running. Keep agitation running during filling and spraying operations. If spraying is stopped before emptying the sprayer, resume agitation before spraying the remainder of the load.

CENTAUR WDG Insect Growth Regulator Tank Mixtures: Follow all use directions as listed above under CENTAUR WDG Insect Growth Regulator Alone with the following exception: after the CENTAUR WDG insect growth regulator is thoroughly mixed and the tank is 3/4 full, add the recommended amount of wettable powder, soluble powder, flowable, emulsifiable concentrate, or soluble liquid product, while maintaining agitation. If a spray additive is needed, add a liquid fertilizer, surfactant, or crop oil concentrate to the spray tank at this time. Then continue adding water to the tank to achieve the desired level, while maintaining agitation.

CENTAUR WDG Insect Growth Regulator Tank Mixtures with Products in Water-soluble Packaging: Follow all use directions as listed above under CENTAUR WDG Insect Growth Regulator Alone with the following exception: add the desired number of water-soluble bags to the tank (if allowed by their label instructions) at the same time the CENTAUR WDG insect growth regulator is added. Note: If using products in water-soluble packaging, do not tank mix with products that contain iron, chromiun, or other micronutrients.

Application directions
Applications should be made immediately after the spray solution is prepared. Thorough spray coverage is essential for effective control. Applications may be made with high or low volume spray equipment that provides thorough coverage of the crop. Apply with properly calibrated spray equipment. For best results, apply when pest populations are beginning to build, before reaching economic thresholds. Consult your local agricultural advisor, state cooperative extension service, or regional Nixtaco America representative for recommendations.

Use restrictions
Do not apply this product through any type of irrigation system.

Crop pestical restrictions:

| Almonds   | Mealybugs, Including Gift, Mealylbug Scales | 34.5 to 46.0 oz/A (2.156 to 2.875 lbs/A) | USE RESTRICTIONS  
- Apply by ground application using a minimum of 100 gallons of water per acre.  
- Do not make more than 1 application per growing season.  
- Do not apply within 60 days of harvest.  
RECOMMENDATIONS  
- Mealybugs: Application should be applied when peak crawler emergence occurs. Consult local or State Agricultural authorities for details.  
- Scales: Application can be made at delayed dormant (or when San Jose scale is at the white or black cap stage) or in-season at peak crawler stage.  
- Good coverage is essential. |
| Pistachios| Leaffoppers            | 9.0 to 12.0 oz/A (0.56 to 0.75 lbs/A) | USE RESTRICTIONS  
- Apply by ground application using a minimum of 20 gallons of water per acre.  
- Do not make more than 1 application per growing season.  
- Do not apply more than 34.5 oz (2.156 lbs) per acre per growing season.  
- Do not apply within 14 days of harvest.  
RECOMMENDATIONS  
- San Jose scale: Application can be made at delayed dormant, pink, and petal fall when the scale is at white or black cap stage or at peak crawler emergence in-season.  
- Other scales: Apply at peak crawler emergence.  
- Mealybugs: Application should be applied when peak crawler emergence occurs. Consult local or State agricultural authorities for details.  
- Good coverage is essential. |

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container; unopened, in a cool, dry place.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirculate for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then, offer for recycling if available, or recondition, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT: READ BEFORE USE

By using this product, user or buyer accepts the following conditions, warranty, disclaimer of warranties, and limitations of liability.

CONDITIONS: The directions for use of this product are believed to be accurate and must be followed carefully. However, because of extreme weather and soil conditions, use methods and other factors beyond the control of Nichino America, Inc.
