**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Application Directions**

**Use Sites:** In and around residential, multi-family, commercial, industrial, municipal, institutional, research, recreational, health care, educational, daycare, hospitality and agricultural buildings and other man-made structures; garages, transport vehicles, sewers, animal feed and housing establishments; food handling; and food processing establishments, poultry houses and new building construction.

**Application Rates and Method:** As a dust: Apply using a bellows or other appropriate dusters at a rate of 1 lb per 1000 sq ft. As a liquid: Mix 1 lb per gallon of water and apply at a rate of 1 quart of solution per 1000 sq ft. Make up only the amount of solution to use that day. As a foam: Mix as for liquid and add the appropriate amounts of foaming agent. Apply foam in sufficient quantities to bat treated woods. As a mop solution: As a supplemental treatment, mix one cup of product per gallon of mop water. Make up only enough for current application and replace as needed. Remove or brush any powder visible after treatment into cracks and crevices. After mopping, up to a quart of mop solution can be poured into each floor drain to control drain flies.

**Indoor Applications:** Ensure that no powder is visible in living areas after application. If any powder is left visible, it should be brushed into cracks and crevices or removed. Apply only in areas inaccessible to children and pets. Do not contaminate food or feedstuffs. For food area application, see directions below.

Apply in attics, crawl spaces, trash closets, utility closets, around the perimeter of dropped ceilings, under and behind appliances and vending machines, in wall voids and voids under and behind cabinets, sinks and tubs, in drawer walls, garbage chutes, pipe chases, elevator pits, around drains, around electrical conduits and in cracks and crevices where insects may larvae. Focus application in areas where insects or their signs are seen.

**Application tips for certain use sites follow:**

- In attics, be sure to get powder near the eaves and vent pipes where insects often first enter or as any pipes or potential access points between the attic and the main area.

- When treating cabinet areas, if there is no gap between the cabinets and the laminate, then small holes can be drilled to access the voids. Econo-drench is clearing around pipes can also be pulled back to allow access to voids.

- The bottom drawers in kitchens and bathroom cabinets can be removed and powder dusted into the drawer wells. No powder should be left exposed when the drawers are replaced.

- Electrical switch plates covers can also be removed to allow access to voids, but powder should not be applied directly in electrical boxes.

- If there are cracks between baseboards, cabinets, doorframes, hinges, counters or trim, and where these areas can be lightly touched without product, these areas may be used to help prevent future problems.

- Insect need moisture; so kitchen and bath areas and areas immediately surrounding them, and any other deep areas should be carefully inspected and treated if necessary. As a sequence matter from the use of this product, it is submitted to fix any leaks to minimize structural damage and color, and to prevent potential pest insect problems.

**Food Processing, Handling and Service Establishment Application:** Pleas other than private residences where exposed food is held, processed prepared or served, be careful to avoid depositing product onto exposed surfaces or introducing the product into the air. Do not contaminate food or food processing surfaces.

---

**Applications of this product in the food area of food handling establishments other than as a crack and crevice treatment are not permitted. Apply sparingly into cracks and crevices, such as along baseboards and between construction elements. Do not treat surfaces likely to be contacted by food. Do not apply near food in operation or when food is exposed.**

**Serving Areas:** Areas such as dining rooms where prepared food is served, but not preparation and holding areas. Apply as a spot treatment into cracks and crevices, such as along baseboards and between construction elements. Do not treat surfaces likely to be contacted by food. Do not apply near food in operation or when food is exposed.

**Non-food Areas:** Areas such as kitchen, storage areas, office areas, circulation areas, recreation areas, hallways, offices, garages, closets and storage areas after cleaning or dusting. Apply along baseboards, around pipes and beneath sinks, pallets, lockers, equipment and other areas where insects may hide or enter.

**Sewers:** Apply with a power duster or portable blower at a rate of not more than 0.5 lb per 1000 square feet.

**New Construction Pre-Treatment:** For the prevention of drywood termites and ants, apply at a rate of 4 lb per 1000 square feet. Apply around the edges of attics near the eaves and around vent stacks. Also apply along baseplates and in plumbing walls.

**Personal Protective Equipment:** In California: wear normal work clothing (e.g., long sleeve shirt, long pants, shoes plus socks) and a NIOSH/MSHA approved dust mask respirator.

**In Poultry Houses:** For dusting beetle control, remove birds prior to application or apply at a rate of 1 lb per 1000 square feet over the soil surface or over the old litter. Before re-introducing birds, apply fresh litter at least 4 inches deep to all floor areas. Powder should also be applied to wall voids, furring and insulation of the house. Do not apply directly to manure piles or pits. For ongoing control, re-apply powder each time the house is cleaned or after each grow-out period.

**Storage and Disposal:**

- Do not contaminate water, food or feed with this material.
- Storage: Store in a dry place. Do not store where children or animals may gain access. Refillable container: Refill this container with BorActin Insecticide Powder only. Do not reuse this container for any other purpose.
- Disposal: If美术空品中 at trash or offer for recycling if available. If improperly filled: Call your local solid waste agency or 1-800-CLEANUP which is managed as a public-private partnership.

**Manufactured by:** Rockwell Labs Ltd.

---

**BorActin Insecticide Powder**

**Kills:** Roaches, Palmetto Bugs, Waterbugs, Ants (Excluding Carpenter Ants), Silverfish, Firebrats, and Darkling Beetles

**New Construction: Preventative Treatment for Roaches and Drywood Termites**

**Long-Lasting, Odorless Powder**

**Active Ingredients:** Ortho-Phenylene 99.9%

**Other Ingredients:** 1%

**Total:** 100%

**Net Covers:** 1 lb

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals:**

**CAUTION:** Harmful if swallowed. Causes skin irritation. Avoid contact with eyes or clothing. Avoid breathing dust. Wash hands after handling. Keep out of reach of children.

**First Aid:**

- If Swallowed: Call a doctor or go to your nearest hospital emergency center. Do not attempt to induce vomiting or give any internal chemical agents. Do not give an induced vomit if there is any chance of choking. Do not give anything by mouth if the person is unconscious. Do not give anything by mouth if there is any chance of choking. Do not give anything by mouth if there is any chance of choking.
- If Inhaled: Remove the person from exposure and get fresh air. If the person is not breathing, give artificial respiration. Do not give anything by mouth if there is any chance of choking.
- If Skin Contact: Wash the exposed area with soap and water. Do not use soap that contains anything that might irritate the skin. In case of accidental ingestion, see precautions. If the person is not breathing, give artificial respiration. Do not give anything by mouth if there is any chance of choking.

**Storage:** Store in a cool, dry place out of the reach of children. Do not store near any heat source or other material that could cause a fire.

**Disposal:** If美术空品中 at trash or offer for recycling if available. If improperly filled: Call your local solid waste agency or 1-800-CLEANUP which is managed as a public-private partnership.

**Long-Lasting, Odorless Powder**

Active Ingredient: Orthoboric Acid.....99%

Other Ingredients:..........................1%

Total:......................................100%

**Directions for Use**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

**Application Directions**

**Use** Bites: In and around residential, materially, commercial, industrial, institutional, municipal, recreational, health care, educational, clerical, hospitality and agricultural buildings and other non-residential structures, garages, transport vehicles, owners, animal nurseries and handling establishments, food handling and food processing establishments, poultry houses and new building construction.

**Application Rates:** As a dust: Apply using 2-3 leaves or other appropriate dust at a rate of 1 lb per 1000 sq ft. As a liquid: Mix 1 lb per gallon of water and apply as a rate of one gallon per 1000 sq ft. Mix up only the amount of solution to use that day. As a foam: Mix or use liquid and add the appropriate amount of foaming agent. Apply foam in sufficient quantities to fill into voids. As a fog: As a supplemental treatment, use one cup of product per gallon of water. Mix up only enough for current application and apply as needed. Remove or treat any powdery substance after treatment to cracks and crevices. After treatment, up to a quarter of a cup of powder can be poured into each floor drain to control drain fly.

**Indoor Application:** Ensure that no powder is visible in living areas after application. If powder is left visible, it should be brushed into cracks and crevices or removed. Apply only in areas inaccessible to children and pets. Do not contact food or food products. For food area applications, see directions below.

Apply in areas, crawl spaces, attic, utility areas, around perimeter of dropped ceilings, under and behind appliances and vending machines, in wall voids and voids under and behind electrical panels, walls, cabinets, and in electrical conduits and in cracks and crevices where insects may occur. Focus applications in areas where termites or their signs are seen.

**Application tips for certain use sites follow:**

1. At sites, be sure to get powder near the walls and vents where insects often first enter, as well as around any pipes or potential access points between the attic and the main structure.
2. When treating cavities or bays, it is best to treat the lower cavities and the backside, then small holes can be drilled to access the voids. Excavation holes around pipes can also be pulled back to allow access to voids.
3. The bottom drawers are kitchen and bathroom cabinets can be removed and powder dusted into drawer wells. No powder should be left exposed when the drawers are replaced.
4. Electrical switch boxes can be removed to allow access to voids, but powder should not be applied directly to electrical boxes.
5. If there are cracks between baseboards, cabinets, doorframes, kegs, counters or sinks, and walls, these cracks can be lightly dusted with product. If practical, these areas can be sealed with insect proofing, but, in order to help prevent future problems, insect need not be immediately treated. Sometimes, dusting these areas immediately surrounding them and any other areas nearby should be carefully inspected and treated if necessary. As a separate matter, from the use of this product, it is advisable to fix any leaks to minimize structural damage and odors and to prevent potential chronic insect problems.

Food Processing, Handling and Service Establishment Applications: Place other than private residences where exposed food is handled, processed, prepared or served. Be careful to avoid depositing product onto exposed surfaces or introducing the product into the air. Do not contaminate food or food processing surfaces.

**Applications of the Product in the Food Areas:** Food handling establishments other than as a crack and crevice treatment are not permitted.

**Application:** Spurting into cracks and crevices, such as along baseboards and between construction elements.

**Food Areas:** Includes: Processing areas, including enclosed systems such as syrup and oil plants, driers, and other areas, including bedding, cleaning, wrapping and baking. Serving areas: Areas, including edible waste storage, and server areas, when served to in-operations and food is exposed.

**Serving Areas:** Areas such as dining rooms where prepared food is served, but not preparation and holding areas. Areas of this type treatment are cracks and crevices such as along baseboards and between construction elements. Do not treat surfaces likely to be contacted by food. Do not apply where food is prepared or in which food is exposed. Non-food areas include: Mechanical rooms, turbine rooms, bathrooms, offices, garages, maintenance rooms, locker rooms, floor drains leading to sewer systems, janitorial closets, and storage areas after cleaning or fumigating. Apply along baseboards, around pipes and beneath sinks, pools, toilets, equipment, and other areas where insects may hide or enter.

**Sweeps:** Apply with a power duster or portable blower at a rate of not more than 6 lbs per 100 square feet.

**New Construction Pre-Treatments:** For the prevention of drywood termites and roaches, apply at a rate of 6 lbs per 1000 square feet. Apply around the edges of eaves and around vent stacks. Apply along baseboards and in planking voids. Personal Protective Equipment: In California wear normal work clothing (long sleeve shirt, long pants, shoes plus socks) and a NIOSH-approved dust mask respirator.

**In Poultry Houses:** For darkling beetle control, remove birds prior to application and apply at a rate of 1-2 lbs per 100 square feet over the floor surface or over the old litter. Before re-introducing birds, apply fresh litter or at least 4 inches deep to all floor areas. Powder should also be applied to wall voids, framing and insulation of the house. Do not apply directly to manure piles or pi. For ongoing control, re-treat powder every time the house is cleared or after each grow-out period.

**Storage and Disposal**

Do not contaminate water food or feed storage or disposal.

Storage: Store in a dry place. Do not store where children or animals may gain access. Disposal: If empty, Non-refillable container. Do not reseal or refill this container. Place in trash or offer for recycling if available. If partly filled, Call your local solid waste agency or 1-800-CLEANUP which is managed in a public/private partnership.

**KEEP OUT OF REACH OF CHILDREN**

CAUTION

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION: Harmful if swallowed or inhaled. Causes moderate eye irritation. Avoid contact with eyes or clothing. Avoid breathing dust. Wash hands thoroughly with soap and water after use and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

First Aid

If Swallowed: Call a doctor or poison control center for treatment advice. Drink 1 to 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting. If In Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If On Skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Have the product or label with you when calling a Poison Control Center or doctor or going for treatment. In case of emergency, for additional information call 800-888-7778.
