12.5% SODIUM HYPOCHLORITE
ACTIVE INGREDIENT: SODIUM HYPOCHLORITE .......... 12.5%
INERT INGREDIENTS .......... 87.5% TOTAL............... 100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after first 5 minutes, continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If in eyes
- Take off or loosen any clothing that might have caused the injury.
- If on skin or clothing
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If swallowed
- Call a poison control center or doctor for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center doctor.

If inhaled
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, if necessary.

HOT LINE NUMBER
Have the product container or label with you when you call a poison control center or doctor, or when seeking professional treatment.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive, may cause severe burns to skin and eyes. Not for use on skin or on clothing. Wear gloves at all times when handling this product. Wash hands after handling. Hazardously ventilated areas as soon as possible. Do not return until odor has dissipated.

ENVIRONMENTAL HAZARDS
This product is toxic to fish and aquatic organisms. Do not discharge this product into lakes, streams, ponds, ditches, or public waterways unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product into sewage systems without previously testing the sewage treatment plant to ensure it is capable.

For guidance, contact your State Water Board or regional office of the U.S. Environmental Protection Agency.

PHYSICAL AND CHEMICAL HAZARDS
STRENGTHENING AGENT: Use only after cleaning surfaces. Allowing this product with gross filth, such as oils, greases, dirt, or other substances that do not dissolve with water is prohibited.

STORAGE AND DISPOSAL
STORAGE: Store this product in a cool dry area away from direct sunlight and heat to avoid data loss. Do not transport this product by boat. Rigidly follow all local, state, and federal regulations for the storage and disposal of this product.

ENVIRONMENTAL AGENCY: Use only as directed, on specified surfaces. Allow this product to sit on surfaces for 10 minutes before cleaning with water. Do not apply this product to fabrics. For best results, always use this product with the appropriate EPA-approved solution for the surface on which it is applied.

DISPOSAL: Do not flush this product down the toilet. Do not dispose of this product in the trash. Do not mix with other chemicals or waste products.

SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES
RINSE METHOD: A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Properly paint all available chlorine must be stirred and allowed to remain effective for 1 minute before use. To test the solution, add 10 ppm available chlorine to the solution by thoroughly mixing 1.0 of the product with a 10 ppm solution of available chlorine.

Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the surface for at least 2 minutes. If solution contains test kit for 10 ppm available chlorine, as determined by a suitable test kit, either the solution will remain effective and sufficient product will be re-applied to maintain a 200 ppm solution. Do not rinse equipment with water after treatment and do not use equipment overnight.

IMERSION METHOD: A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solution containing an initial concentration of 100 ppm available chlorine must be stored and distributed periodically to ensure that the available chlorine dose drops no longer than 10 ppm below 50 ppm. Properly prepare 10 ppm available chlorine solution by thoroughly mixing 1.0 of this product with a 10 ppm solution of available chlorine. If test fail to 10 ppm available chlorine, prepare a sanitizing solution by thoroughly mixing 1.0 of this product with only 10 ppm solution of available chlorine is required. Do not rinse with water after treatment. Do not use equipment overnight.

Seaweed in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

FLOW/PRESSURE METHOD: Close equipment doors and thoroughly flush all areas. Allow equipment in operating position prior to use. Prepare a volume of 200 ppm available chlorine sanitizing solution equal to 10% of volume of equipment by mixing the solution on a ratio of 1:3, 1:12 of 1 oz. of 10 ppm solution with 10 ppm solution of available chlorine. rally clean and with a water solution. Do not rinse after use. Do not use equipment overnight.

CLEAN-IN-PLACE METHOD: Thoroughly clean equipment after use. Prepare a volume of 200 ppm available chlorine sanitizing solution equal to 10% of volume of equipment by mixing the solution on a ratio of 1:3, 1:12 of 1 oz. of 10 ppm solution with 10 ppm solution of available chlorine. Do not rinse after use. Do not use equipment overnight.

WARRANTY
Sellers warrant that this product conforms to the chemical description on this label and is reasonably fit for a purpose based on the chemical content and quality. This warranty does not extend to the use of this product in unsuitable conditions or inadequate measures, conditions not reasonably foreseeable to the seller.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with this label.

Note: This product contains bleach. Use a chlorine test kit and soil deposit test, as necessary, to determine the required amount of bleach.

This product is a break-down bleach, which may have uses. For the complete list of usage instructions, contact Brenntag Phoenix, Inc. or your Brenntag Phoenix representatives.

SWIMMING POOL WATER DISINFECTION
For a new pool or pool-applied, submerge 2 to 3 oz. of product for each 10,000 gallons of water to yield 5 to 7 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Add a small amount of water to the pool to bring the pH to 7.2 to 7.4. Adjust the pH to bring the pH to 7.2 to 7.4. Adjust and maintain the alkalinity of the pool to 50 to 100 ppm.

To maintain the pool, add manually or by a timer device. 1 oz. of this product for each 10,000 gallons of water to yield a product of 0.3 ppm available chlorine in the pool. Add small quantities of water to bring the pH to 7.2 to 7.4 to maintain the proper pH of the pool.

Maintain the pH to 7.2 to 7.4 by adjusting the amount of available chlorine in the pool. Add small quantities of water to bring the pH to 7.2 to 7.4 to maintain the proper pH of the pool.

WINTERIZING POOLs: While water is still clear and clean, add 1 oz. of this product for each 10,000 gallons of water. Continue to 1 oz. of this product for each 10,000 gallons of water. Continue to 1 oz. of this product for each 10,000 gallons of water. Use available chlorine in the water to bring the pH to 7.0 to 7.2. Use available chlorine in the water to bring the pH to 7.0 to 7.2. Use available chlorine in the water to bring the pH to 7.0 to 7.2. Use available chlorine in the water to bring the pH to 7.0 to 7.2.

HYDROTHREATEN TANKS: Add 1 oz. of this product to each 1,000 gallons of water to yield a chlorine concentration of 1 ppm. As determined by a suitable test kit. Add 1 oz. of this product to each 1,000 gallons of water. Use available chlorine in the water to bring the pH to 7.0 to 7.2. Use available chlorine in the water to bring the pH to 7.0 to 7.2. Use available chlorine in the water to bring the pH to 7.0 to 7.2.
