SIL-100
Organosilicone Surfactant

Principal Functioning Agents: Polyether-polymethylsiloxane-copolymer, polyether...100%

All ingredients are exempt from a tolerance under 40 CFR 160.

WARNING
KEEP OUT OF REACH OF CHILDREN
AVISO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

Precautionary Statements
May be fatal if absorbed through skin. Causes substantial but temporary eye injury. Harmful if swallowed or inhaled. Do not get in eyes, on skin, or on clothing. Avoid breathing vapors or spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Personal Protective Equipment: Wear protective eyewear (goggles or face shields), chemical-resistant gloves (such as nitrile or latex), coveralls worn over short-sleeved shirt and short pants, and chemical-resistant footwear plus socks.

First Aid
If swallowed: Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

General Information
SIL-100 is a nonionic organosilicone surfactant for use with crop protection materials and foliar nutrient sprays. SIL-100 has a surface tension of 22.5 dynes at critical micelle concentration of 0.0056% solution (0.71 fluid ounce per 100 gallons of water).

Precaution
SIL-100 may lose wetting activity when mixed in solution below pH 5 or above pH 9. Exceeding label rates may result in severe crop damage, excessive runoff of the spray solution and spotting of fruit or foliage.

Treat a small area and observe effects prior to application to soft skinned fruits and sensitive vegetables under conditions of moisture deficit, increasing temperatures, or when mixed with two or more pesticides or foliar nutrients.

Storage and Disposal
Do not contaminate water, food, or feed by storage or disposal.

Storage: Store above 32°F. Store away from heat or open flame and oxidizing materials.

Disposal: Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

Triple rates (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.wacrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

Use Directions
SIL-100 may be applied by t.i.r. or ground concentrate or dilute. Do not exceed 1.5 ounces of SIL-100 per 100 gallons of water when mixed with two or more pesticides or foliar nutrients to cover sprays on sensitive crops such as leafy vegetables, soft skinned fruits, strawberries or grapes. Do not apply with Glyphosate or Acid spray, reapply to other crops. When used in pesticide applications intended to control marketable plant parts, such as cover sprays with systemic, fungicides, plant growth regulators and foliar nutrients, use 1 to 4 ounces of SIL-100 per 100 gallons of water. When used in sprays not intended to control marketable plant parts, such as post emergence herbicide or contact herbicide applications, use 4 to 8 ounces per 100 gallons of water. Debit cards and disinfectants, use 4 to 8 ounces of SIL-100 per 100 gallons of water.

Decisive Crops (Domestic and Exported Domestic): Apply up to 8 ounces of SIL-100 per 100 gallons of water. In aerial applications, apply up to 16 ounces of SIL-100 per 100 gallons of water. Weeds For applications prior to 100% bud break, use up to 64 ounces of SIL-100 per 100 gallons of water. For applications post 100% bud break, use rates described in Directions For Use.

Notice—Read Carefully
TERMS AND CONDITIONS OF SALE. Seller warrants that the product conforms to the chemical description and specification fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. In neither this warranty nor any other warranty of merchantability of fitness for a particular purpose applies expressed or implied, extends to the use, storage or handling of the product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. The National Agricultural and Food Research and Development Councils, Inc. (NAFREC) through its National Research Extension of plants, crops and animals to which the pesticide is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury.
