Shortstop®

Plant Growth Regulator for Trees

ACTIVE INGREDIENT:
Paclorizin ((2R*,2'E)-(R*,R')-3-(4-chlorophenyl) methyl)-2-
(1,1-dimethylethyl)-1H-1,2,4-triazole-1-ethanol) ........ 22.3%
OTHER INGREDIENTS .............................................. 77.7%
TOTAL ...................................................................... 100.0%
Shortstop® contains 2 lbs. active ingredient per gallon.

KEEP OUT OF REACH OF CHILDREN

CAUTION

Precautionary Statements
Hazards to Humans and Domestic Animals
Harmful if swallowed, inhaled, or absorbed through the skin.
See the Label Booklet for First Aid and Additional Precautionary Statements

EPA Reg. No.: 80697-4-82866
EPA Est. No.: 069845-CIN-002

Net Volume: 2 quarts

Manufactured by:
Zhejiang Tide CropScience Co., Ltd.
21 Hubble, Irvine, CA 92868, USA

Manufactured for:
Greenleaf Chemical LLC
Henderson, NV 89022, USA

SHAKE WELL BEFORE EACH USE

FIRST AID

If swallowed

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in eyes

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If inhaled

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-702-324-2403 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist.
PERSONAL PROTECTIVE EQUIPMENT

Personal Protective Equipment (PPE)
Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category F on an EPA chemical resistance category selection chart.
Applicators and other handlers must wear:
- Long-sleeved shirt and long pants.
- Chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride or viton
- Shoes plus socks
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washable, use detergent and hot water. Keep and wash PPE separately from other laundry.
Wash PPE after each day’s use.

USER SAFETY RECOMMENDATIONS
Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning equipment or disposal of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS
Do not use or store near heat or open flame.

DIRECTIONS FOR USE
Failure to follow directions and precautions on this label may result in plant injury or poor disease control.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Read all label directions carefully before use.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry interval. The requirements in this label only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.
PPE required for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
- Overalls
- Chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride, or viton
- Shoes plus socks
GENERAL INFORMATION

Shorestop® is a systemic plant growth regulator that slows vegetative growth by inhibiting gibberellin biosynthesis for use on trees. For trees, Shorestop® reduces the above ground vegetative growth and changes specific morphological characteristics of the tree plant. Shorestop® is most effective when applied to the soil near the base of the tree either by soil injection or with basal drenches.

TREES

Shorestop® as tree growth regulator is a xylem mobile plant growth regulator that slows vegetative growth by inhibiting gibberellin biosynthesis. Shorestop® reduces vegetative growth thereby reducing the volume of woody growth that must be removed from trees when trimming occurs and may extend the trimming cycle. Shorestop® is equally effective when applied as a basal soil drench or by soil injection.

Shorestop® can be used on lined trees found in areas such as utility right-of-way, urban environments, residential areas and other non-crop areas.

Symptoms of Growth Regulation

Shorestop® demonstrates little or no phloem mobility. Activity occurs following root uptake and xylem translocation throughout the tree canopy. Symptoms of growth regulation may not be visible for up to 10 months following application of Shorestop®. Initial effects of Shorestop® may be observed as intense greening of foliage with no resulting phytotoxicity. At the time when normal vegetative growth cessation should occur, trees treated with Shorestop® will exhibit shortened internodes which are somewhat thickened. Smaller leaf size and enhanced flowering may also be observed in some species.

USE DIRECTIONS

Application Timing

Applications can be made throughout the year, weather permitting, except when soil is frozen or saturated with water.

Note: Shorestop® is absorbed by plant roots and translocated to the growing tissues in response to evaporative water loss (transpiration). If applications are made after fall leaf drop, uptake of Shorestop® will not occur until development of new leaves in the spring and remobilization of transpiration.

Mixing Directions

Mix 317 ml (10.7 fl oz) of Shorestop® with water to make one gallon of diluted mixture. One gallon of Shorestop® will make 12 gallons of diluted mixture. To improve the handling characteristics of the diluted mixture, the addition of a suspension aid is recommended such as, anionic and organosilicone surfactants.

Follow all label directions and precautions on the product label of the suspension aid.

Application Methods

Shorestop® may be applied as a basal drench or by soil injection. Treat only trees that are well established in their final location. Treatment of trees less than 4 inches in diameter is not recommended.

Basal Drench

Apply the required dose [total ml required for the application rate and tree size (DBH)] uniformly around the base of the tree at the point of contact between the soil and the tree trunk (Figure 1). The diluted mixture of Shorestop® may be carefully poured around the tree or as an applicator which provides a controlled rate of flow may be used. If there is potential for rainfall or irrigation to move surface applied product to non-target plants, apply Shorestop® diluted mixture to the bottom of a shallow furrow around the base of the tree. After applying, refill the furrow with untreated soil.

Soil Injection

The diluted mixture of Shorestop® should be injected approximately 6 inches deep. Use soil injection equipment capable of delivery at 100 to 200 psi. Injection orifices should be extended to release the diluted product horizontally at the point of injection. The required dose should be divided evenly among injection sites spaced as uniformly as possible around the tree trunk. The injection sites should be positioned to release Shorestop® diluted mixture as close as possible to the point of contact between soil and unthickened bark beneath the soil so that the active ingredient may be readily absorbed by the tree (Figure 2). Injection sites should also be located next to bottom roots (Figure 2). For trees less than 5 inches DBH, use at least 4 evenly spaced injection sites per tree.
### Application Rate

**Application Rate Ranges for Diluted Mixture of Shorstop® for Treatment of Various Tree Species**

<table>
<thead>
<tr>
<th></th>
<th>50 to 100 ml (1 to 2 grams a.i.) per inch DBH</th>
<th>100 to 150 ml (2 to 3 grams a.i.) per inch DBH</th>
<th>150 to 200 ml (3 to 4 grams a.i.) per inch DBH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Australian Pine</td>
<td>Basswood, Maple</td>
<td>Beech, Mountain Ash</td>
<td>Alder, Locust, Black Ash</td>
</tr>

### General Precautions

- Apply at recommended rates and follow safety procedures.
- Trees not used for food production that are not specifically listed on this label may be treated if all other label directions are followed.
- Trees which are severely stressed due to moisture, temperature, low soil fertility, or exhibit mechanical or chemical injury should not be treated.
- Do not apply Shortstop® until symptoms from previous applications begin to subside.
- If soil is heavily compacted or a high water table exists, use of a registered tree growth regulator such as Cotinax® Tree Implants may be more satisfactory.

### Storage and Disposal

- Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse container.

**PESTICIDE STORAGE:** Keep container closed when not in use. Do not store near food or feed. Protect from freezing. In case of spill or leak on floor or paved surfaces, soak up with sand, earth or synthetic absorbent. Remove to chemical waste area.

**PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticides, empty mixture, or container is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the hazardous waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, may out of smoke.
LIMITED WARRANTY AND DISCLAIMER

Greenleaf Chemical LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below.

Our recommendations for use of this product are based upon tests believed to be reliable. The use of this product being beyond control of the manufacturer, no guarantee, expressed or implied, is made as to the effect of such use or the results to be obtained if not used in accordance with printed directions and established safe practice. To the fullest extent permitted by law, buyer's exclusive remedy and manufacturer's or seller's exclusive liability for any and all claims, losses, damages or injuries resulting from the use or handling of this product, whether or not based in contract, negligence, strict liability in tort or otherwise shall be limited, at the manufacturer's option to replacement of, or the repayment of the purchase price for, the quantity of product with respect to which damages are claimed.

Inherent Risks of Use
It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperatures, soil conditions, etc.), abnormally conditions (such as excessive rainfall, drought, inundation, fire damage), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Greenleaf Chemical LLC or the seller. All such risks shall be assumed by buyer.

Terms and Conditions of Use
If terms of the Limited Warranty & Disclaimer and Inherent Risks of Use are not acceptable, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, not by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer and Inherent Risks of Use.
