BEST® 19-4-12 WITH 0.20% DIMENSION®

19-4-12 with 0.20% Dimension® is a herbicide that provides control of listed annual grasses and broadleaf weeds in ornamental landscape areas, established lawns, and ornamental turf, including golf course fairways, roughs, and tee boxes. This product also provides postemergence crabgrass control up to the 4-leaf stage.

Not for use on plants being grown for sale or for other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in interior plant vehicles, ornamental gardens, or parks, or on golf courses or lawns and grounds. In New York State, this product may only be used by Professional Applicators at no more than 250 lbs. per acre (9.74 lbs./1,000 sq. ft.), (0.5 lb. active ingredient per acre) per year and is prohibited from use in Nassau and Suffolk Counties.

ACTIVE INGREDIENT:
Dithiopyr, 3,5-pyridinedicarboxylic acid, 2-(difluoromethyl)-4-(2-methylpropyl)-6-(trifluoromethyl)-S,S-dimethyl ester ................................................................. 0.20%

OTHER INGREDIENTS: ........................................................................................................................................... 99.80%

TOTAL .................................................................................................................................................................. 100.00%

Read the Entire Label Before Using This Product. Use Only According to Label Instructions.

Product: Pesticide No. 4,030,004. Other patents pending. EPA REG. No. 7621-374

EPA EST. No. 61042-CA-1

NOTICE: Before using this product, read the entire Precautionary Statements, Conditions of Sale, and Warranty, Directions for Use, Use Restrictions, Storage and Disposal Instructions. If the Conditions of Sale and Warranty are not acceptable, return the product unopened within thirty days of purchase to the place of purchase.
KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID: IF IN EYES—Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF INHALED—Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER—Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Information Center at 1-800-858-7378 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION! CAUSES EYE IRRITATION. HARMFUL IF INHALED. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters.

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

GENERAL INFORMATION FOR TURF USE

This product is a herbicide that provides control of crabgrass and other annual grasses and broadleaf weeds in established lawns and ornamental turfs including golf course fairways, roughs and tee boxes. This product also provides post-emergent crabgrass control up to the 4-leaf stage. This product will not harm nearby established ornamentals when used according to label directions.

USE PRECAUTIONS

Turfgrass Safety: This product may be used on seeded, sodded or sprigged lawns and ornamental turfs that are well established. The grass must have developed a good root system and a uniform stand, and have received at least two mowings following its seeding, sodding or sprigging before it can receive its first application of this product. Use of this product on lawns and ornamental turfs that are not well established, or on those that have been weakened by weather-, pest-, disease-, chemical-, or mechanical-related stress, may increase the chances for turf injury.

This product only should be applied to lawns and ornamental turfs that are composed of the following turfgrass species that have been determined to be tolerant to applications of this product. When applied as directed under the conditions described, the following turfgrasses are tolerant to this product:

COOL-SEASON GRASSES: Bentgrass, creeping' (Agrostis palustris), Bluegrasses, Kentucky (Poa pratensis), Fescue, fine' (Festuca rubra), Fescue, tall (Festuca arundinacea), Ryegrass, perennial (Lolium perenne).

WARM-SEASON GRASSES: Bahiagrass (Paspalum notatum), Bermudagrass (Cynodon dactylon), Buffalograss' (Buchloe dactyloides), Carpetgrass (Axonopus affinis), Centipedeagrass (Eremochloa ophiuroides), Kikuyuagrass (Pennisetum clandestinum), St. Augustinegrass (Stenotaphrum secundatum), Zoysiaagrass (Zoysia japonica).

DO NOT apply this product to Colonial bentgrass (Agrostis tenuis) varieties.

*Use of this product on certain varieties of creeping bentgrass, such as "Carmen", "Chansley", or "Seaside" and "Washington" may result in undesirable turf injury. Not all varieties of creeping bentgrass have been tested. **Use of this product on certain varieties of fine fescue may result in undesirable turf injury. The following fine fescue varieties have been found to be sensitive to this product: "Atlantic", "Banner", "Beauty", "Bilgard", "CF-2", "Entroy", "HF-93", "Highlight", "Ivalo", "Jamestown", "Kokair", "Majestic", "Mary", "Penlaw", "Piccard", "Saratoga", "Turf 6", "Walker", and "Walker". Not all varieties of fine fescues have been tested. *DO NOT use this product on seedling buffalo grass in the spring or the first year of establishment until the turfgrass is fully green and has established new roots.

NOTE: It is not possible to evaluate all turfgrass varieties for tolerance to 19-4-12 with 0.20% Dimension. It is suggested that the user evaluate the responses of turfgrass varieties to this product on a limited area, at recommended use rates, prior to initiating large-scale use.

Reseeding, Overseeding, or Sprigging: Re-seeding, overseeding, or sprigging of treated areas with this product should be delayed until 12 weeks from the time of application. Re-seeding, overseeding or sprigging before 12 weeks after application may prevent establishment of desirable turfgrasses. When re-seeding or overseeding, proper cultural practices such as soil cultivation, irrigation and fertilization should be followed. Overseeding with perennial ryegrass in the fall, overseed 8 weeks or later after a single application. For best results, use mechanical or power seeders equipment (seeders) designed to give good seed-to-soil contact.

Other Use Precautions: The early post-emergence crabgrass control described below is limited. Post-emergence applications are only effective on crabgrass if applied before crabgrass has developed its fifth leaf or first tiller. For best results, cultural practices that disturb the soil such as core, spike, or hydro-aeration and verticutting, should be done before application of this product. DO NOT apply this product until grass has recovered from these cultural practices. DO NOT use clippings from treated turf for mulching around vegetables or fruit trees. Keep children and pets out of treated areas until dust has settled.
APPLICATION DIRECTIONS – Control of Crabgrass

Preemergence and Early Postemergence Control
- This product provides “preemergence” control of crabgrass (including the large, smooth and southern species) when applied prior to the emergence of crabgrass from the ground in established lawns and ornamental turfs.
- It can also provide “early postemergence” control of crabgrass. Postemergence crabgrass control will be obtained only when this product is applied prior to the tillering of crabgrass, which generally corresponds to the time when you can first see the crabgrass plants in the lawn or turf. The practical benefit of this product’s early postemergence activity is that it can give the user a 2-4 week longer period of time to make applications to control crabgrass.

Application Frequency and Timing:
- This product may be applied as a single application or as a split application for crabgrass control in the spring, summer or fall.
- DO NOT apply more than 5.74 lb. of this product/1,000 sq. ft. per application, and no more than 13.7 lbs. of this product per 1,000 sq. ft. per year. In New York State, this product may only be used by Professional Applicators at no more than 250 lbs. per acre (5.74 lbs./1,000 sq. ft.) (0.5 lb. active ingredient per acre) per year, and is prohibited from use in Nassau and Suffolk Counties.

Spring Applications:
- For single applications made in the spring or early summer, this product should be applied at the appropriate rate corresponding to one of the control programs listed in Table 1 below, depending on the user’s location, the turfgrass mowing height, and whether the use is preemergence or early postemergence at the time of application. The duration of weed control provided by this product is directly related to the total rate applied, but will vary somewhat depending on weather, weed pressure, turfgrass competitiveness, and the user’s location within a region.
- Use Program 1 for preemergence control at sites where the turfgrass is cut high (e.g., homeowner lawns). This program provides 3-5 months of preemergence crabgrass control. This program should not be used for early postemergence crabgrass control.
- Use Program 2 for preemergence control at sites where (a) turfgrass is cut low (e.g., golf fairways), and (b) turfgrass maintenance or weed control has not been conducted during the previous year. This program provides 4-6 months of preemergence crabgrass control.
- Use Program 3 for preemergence control at sites where (a) turfgrass is cut low (e.g., golf fairways) and (b) turf maintenance or weed control has not been conducted during the previous year. This program provides 4-6 months of preemergence crabgrass control. This program may also be used for early postemergence control at sites where turfgrass is cut low (e.g., golf fairways).
- For sequential or sequential applications, this product should be applied at the same rate as required for the initial application, with a minimum interval of 6-8 weeks between applications.
- Where split fertilizer applications are recommended, the rates in Table 1 may be applied in two applications made 6-8 weeks apart and prior to crabgrass emergence.

</table>

*DO NOT apply more the 5.74 lbs. of this product/1,000 sq. ft. per application, and no more than 17.22 lb. of this product/1,000 sq. ft. per year. In New York State, this product may only be used by Professional Applicators at no more than 250 lbs. per acre (5.74 lbs./1,000 sq. ft.) (0.5 lb. active ingredient per acre) per year, and is prohibited from use in Nassau and Suffolk Counties. Postemergence control is limited; see “Crabgrass Control” and “Precautions” sections above. Regions include areas listed below.

North: All other areas.
Transition: DE, KS, KY, MD, MO, NJ, VA, southeastern PA, southern areas of IL, IN, OH & coastal areas of CT, NY, & RI.
South: AL, AR, AZ, CA, GA, LA, MS, NC, NM, NV, OK, SC, TN, & TX.
Coastal South: HI, FL, & southern coastal areas of AL, GA, LA, MS, NC, SC, & TX.

Fall Applications:
- Use as directed in the fall at the Program 3 rates listed in Table 1 to control winter weed species and for crabgrass control through the early part of next spring.
- The fall application should be followed by an appropriate spring application to provide season-long control.

Tips for Improved Control:
- For best results, apply this product within a few days after mowing and delay mowing again for a few days after the application.
- When treated lawn or ornamental turf areas are watered or receive significant rainfall within a few days after application of this product, improved weed control may result.
- Use of split (half-rate) applications spaced 6-8 weeks apart may provide improved weed control.

Control of other Grass and Broadleaf Weeds

Spring Applications:
Used as directed for crabgrass control in the spring, this product will also control (at the Program 3 rates) or suppress (at the Program 2 rates) the following weeds when applied prior to their emergence: barnyardgrass, bluegrass (annual, roughstalk), crowsfoot, foxtail (green & yellow)*, goosegrass, kikuyugrass, lespedezas (common), oxalis (buttercup, creeping & yellow wood sorrel), purslane (common), ryegrass (annual & perennial), smutgrass, speedwell (corn), spurge (prostrate & spotted).*

*Also controlled at the Program 2 rates.

Fall Applications:
Used as directed at the Program 3 rates) or suppress (at the Program 2 rates) the following weeds when applied prior to their emergence: bluegrass (annual, roughstalk), bittercress, chickweed, henbit, geranium (Carolina), parsley-piert, pineappleweed, shepherd’s purse.

APPLICATION EQUIPMENT AND INSTRUCTIONS
Apply this product with drop or rotary-type spreaders designed to apply granular herbicides. Avoid the use of spreaders that would apply this product in narrow rows or concentrated bands. Before each application, calibrate the spreader according to the equipment manufacturer’s directions for adjusting the spreader settings such that the spreader delivers the appropriate application rate recommended above. Apply this product uniformly over the lawn or ornamental turf area. A more uniform application can be made by spreading half of the required amount over the area and then applying the remaining half at a right angle to the previous direction. Avoid streaking, skips, or overlaps during application. Check equipment frequently to ensure equipment is functioning properly and applying uniform distribution of granules.

GENERAL INFORMATION – LANDSCAPE ORNAMENTALS
- 19-4-12 with 0.20% Dimension provides preemergence control of listed annual grass and broadleaf weeds in landscape ornamentals. It may be applied to soil surfaces or mulch where ornamental plants are grown for aesthetic purposes in ornamental gardens, parks, golf courses and residential properties. Ornamental plants on this label have shown tolerance to 19-4-12 with 0.20% Dimension when applied as directed. It is impossible, however, to evaluate tolerance for all ornamental plant species or varieties or under all possible growing conditions. Under your growing conditions, a limited area involving only a few plants should be treated for tolerance evaluation prior to large-scale applications.
WEEDS CONTROLLED: Used as directed, 19-4-12 with 0.20% DIMENSION® will control or suppress the following annual grass and broadleaf weeds when applied prior to their emergence. This product will not control established grasses (except for crabgrass in early stages of development), and established broadleaf weeds, therefore, the area to be treated should be free of weeds prior to application.

Grasses: barley (Hordeum spp.); barnyard grass (Echinochloa crus-galli); bluegrass, annual (Poa annua); brome (Bromus spp.); crabgrass, large (Digitaria sanguinalis); crabgrass, smooth (Digitaria ischaemum); crabgrass, Southern (Digitaria ciliaris) crownfootgrass (Dactylolotetium aegyptium); dallisgrass (seeding) (Paspalum dilatatum); goosegrass (Eleusine indica); foxtail, green (Setaria viridis); foxtail, yellow (Setaria faber); kikuyugrass (Pennisetum clandestinum) oaks, wild (Avena fatua); ryegrass (annual & perennial) (Lolium spp.); smutgrass (Sporobolus indicus).

Broadleaf Weeds: bittersweet (Cardamine spp.); carpetweed (Mollugo verticillata); chickweed (Stellaria spp.); geranium, Carolina (Geranium carolinianum); henbit (Lamium spp.); knotweed, prostrate (Polygonum aviculare); lespedezas, common (Lespedeza striata); marestail (Corysta canadensis); medic, black (Medicago lupulina); mustard (Brassica spp.); oxalis, buttercup (Oxalis pes-caprae); pinesapweed (Matricaria matricarioides); pigweed, redroot (Amaranthus retroflexus); parsley-piert (Alchemilla viridis); purslane, common (Portulaca oleracea); rocket, London (Sisymbrium irio); shepherd’s purse (Capsella bursa-pastoris); speedwell, corn (Veronica arvensis); spurge, garden (Euphorbia hirta); spurge, prostrate (Euphorbia humistrata); spurge, spotted (Euphorbia maculata); wood sorrel, creeping (Oxalis corniculata); wood sorrel, yellow (Oxalis stricta).

APPLICATION, EQUIPMENT, AND INSTRUCTIONS

Apply this product with drop or rotary-type spreaders designed to apply granular herbicides. Avoid the use of spreaders that would apply this product in narrow rows or concentrated bands. Before each application, calibrate the spreader according to the equipment manufacturer’s directions for adjusting the spreader settings such that the spreader delivers the appropriate application rate recommended above. Apply this product uniformly over the area to be treated. A more uniform application can be made by spreading half the required amount over the area and applying the remaining half at a right angle to the previous direction. Avoid streaking, skips, or overlaps during application. Check equipment frequently to ensure equipment is functioning properly and delivering uniform distribution of granules.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.  

STORAGE: Store this product only in its original container in a dry, cool, secured storage area.  

SPILL: In case of spill, sweep up product and dispose of material according to “product disposal” directions listed below.  

PRODUCT DISPOSAL: Wastes resulting from the use of this product that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticide disposal or in accordance with applicable Federal, State or local procedures.  

EMPTY CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment. Offer for recycling. If available, Dispose of empty bag(s) in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

CONDITIONS OF SALE AND WARRANTY

J.R. Simplot Company warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. To the extent consistent with applicable law, J.R. SIMPLOT COMPANY MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of J.R. Simplot Company and Seller. To the extent consistent with applicable law, risks such as crop injury, ineffectiveness or other unintended consequences resulting from, but not limited to, weather or soil conditions, presence of other materials, disease, pest, drift to other crops or property or failure to follow label directions will be assumed by the Buyer or User. To the extent consistent with applicable law, in no case will J.R. Simplot Company or Seller be held liable for consequential, special or indirect damages resulting from the handling, storage or use of this product.
