AlgaeControl

Controls Green Water & String Algae

Directions for Use

peel back here for directions
Directions for Use (Continued)

CALCULATE POND GALLONS using following formula:
Length (ft.) x Width (ft.) x Average Depth (ft.) = cubic feet
Cubic feet x 7.5 = pond gallons

DOSAGE:
- 10 ml for every 120 gallons of pond water (Use top of supplied screw cap. One capful = 5ml)
- 1/4 Cup (60ml) for every 720 gallons of pond water
  (Dedicate use of the measuring cup to algaeicide applications only)

DILUTE the proper dosage in a bucket of water. POUR diluted mixture into the pond or fountain evenly along the edges. DO NOT over dose. Ensure the pond/fountain is well aerated. TREATMENT may be repeated if needed every three days up to three total doses. REMOVE DEAD ALGAE from pond.

WARM WEATHER CAUTION: Before adding TetraPond AlgaeControl be sure to provide adequate aeration from a fountain, waterfall or air pump. Keep pump(s) running 24 hours a day when using this product, especially in the warmer months.

NOTE: Do not use in ponds established for less than three months.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION:
Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

FIRST AID:

<table>
<thead>
<tr>
