Medline Micro-Kill™ will clean and disinfect hard, non-porous, surfaces of: bed railings, cabinets, carts, chairs, counters, exam tables, gurneys, isoletes, IV poles, stethoscopes, stretchers, tables, telephones, toilet seats, toilets, bathtubs, bathroom fixtures, shower stalls, sinks, tiles, vanity tops, hospital beds, traction devices, MRI, CAT, scales, paddles, wheelchairs, ultrasound transducers and probes.

TO OPEN PACKAGE: Flip open dispensing cap and remove lid by pulling out at an angle. Snap lid down when finished, to retain moisture. Dispose of used wipes in trash. Do not flush.

ACTIVE INGREDIENTS
Alkyl (60% C₁₄, 30% C₁₆, 5% C₁₂, 5% C₁₈) dimethyl benzyl ammonium chlorides .............................................. 0.105%
Alkyl (68% C₁₄, 32% C₁₆) dimethyl ethylbenzyl ammonium chlorides.............................................................. 0.105%
INERT INGREDIENTS .......................................................... 99.790%
Total................................................................................. 100.000%

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

CLEANING: Use one wipe to completely remove surface of all gross debris from surfaces to be treated.

DISINFECTING: To disinfect hard, non-porous surfaces, thoroughly wet the surface to be treated. Treated surface must remain visibly wet for disinfection:
- For surfaces to be treated against Type 1 (HIV-1) (associated with AIDS).
- For surfaces to be treated against HIV-1, Densovirus (Norwalk Virus) and Feline calicivirus when the treated surface is allowed to remain wet for 10 minutes. Use additional wipes if needed to assure continuous 10 minute wet contact time. Let air dry.
- For surfaces to be treated against Bloodborne Pathogens (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of inanimate surfaces/others with blood or body fluids, and in which the surfaces/others likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

PERSONAL PROTECTION: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks, and eye coverings.

CLEANING PROCEDURES: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product. Medline Micro-Kill™ wipes can be used for this purpose.

CONTACT TIME: Thoroughly wet surface with a new wipe. Allow surface to air dry. Although efficacy at 2 minute contact time has been shown to be adequate against HIV-1, use the contact time for the disinfection of other organisms listed on this label.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in an area inaccessible to children.
CONTAINER STORAGE/DISPOSAL: Wipes: Dispose of wipe in trash after use. Do not flush. Canister: Tightly close lid between uses to retain moisture. Nonrefillable container. Do not reuse or refill this canister. Offer empty canister for recycling if available or discard in trash.

KILLS HIV-1 ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of inanimate surfaces/others with blood or body fluids, and in which the surfaces/others likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

See side panel for additional precautionary statements.
Medline Micro-Kill® will clean and disinfect hard, non-porous, surfaces of:

- bed railings, cabinets, carts, chairs, counters, exam tables, gurneys, isolation gowns, IV poles, stethoscopes, stretchers, tables, telephones, toilet seats, toilets, urinals, enemas, emesis basins, examination tables, utility carts, sinks, switches, handles, and walls.

**ACTIVE INGREDIENTS**

Alkyl (60% C₁₂, 30% C₁₄, 5% C₁₅, 5% C₁₆) dimethyl benzyl ammonium chlorides 0.105%

**INERT INGREDIENTS**

99.90%

**NET CONTENTS:** 60 Pre-measured Wipes

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION:**

- Keep out of the reach of children in sealed canisters or in a closed, tamper-evident container in a cool, dry place. Do not open or reclose container. Do not dispense liquid onto surfaces or into drains. Do not store in the vicinity of detergents or cleansers. Do not use on critical or semi-critical medical device surfaces.

**DIRECTIONS FOR USE:**

1. **CLEANING PROCEDURES:**
   - For Ultrasound Transducers and Probes: Use only on external surfaces of ultrasonic transmission probes and transducers. Thoroughly wet transducers with a new wipe. Transducer must remain wet for 10 minutes. Use additional wipes if needed to assure the treated surface remains visibly wet for the prescribed time.
   - For White and Painted Surfaces: Follow disinfection procedures described in the PRECAUTIONARY STATEMENTS section.
   - For Plastic and Painted Surfaces: Spot test on an inconspicuous area before use. For heavily soiled surfaces, clean before following disinfecting procedures.
   - Treated surface must remain visibly wet for disinfection: To disinfect against Escherichia coli (E. coli), allow the treated surface to remain wet for 10 minutes. A portable water source is required for surfaces in direct contact with food. For plastic and painted surfaces, spot test on an inconspicuous area before use. For heavily soiled surfaces, clean before following disinfecting procedures.

**CONTACT TIME:**

- Virucidal Activity: Medline Micro-Kill™ is an effective virucide on hard, non-porous surfaces against Human Immunodeficiency Virus Type 1 (HIV-1). Effective contact time is required for disinfection. Norovirus (Norwalk Virus) and Feline calicivirus when the treated surface is allowed to remain continuously wet for 2 minutes. Norovirus/ Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain visibly wet for 2 minutes. Norovirus/Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain wet for 10 minutes. A portable water source is required for surfaces in direct contact with food.

**INSTRUCTIONS:**

- Use one wipe to completely remove surface debris from surfaces to be treated.

**DISINFECTING:**

- To disinfect hard, non-porous surfaces, thoroughly wet the surface to be treated. Thoroughly wet surfaces may reduce virucidal effectiveness against Disseminated Neutropenic Fungal Encephalitis (DNFE), Staphylococcal septicaemia, Vibriosis, and Salmonella. For Hard, Non-Porous Surfaces: Thoroughly wet the treated surface to remain wet for 2 minutes. Norovirus/Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain wet for 2 minutes. Norovirus/Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain wet for 10 minutes. A portable water source is required for surfaces in direct contact with food. For plastic and painted surfaces, spot test on an inconspicuous area before use. For heavily soiled surfaces, clean before following disinfecting procedures.

**PRECAUTIONARY STATEMENTS:**

**CAUTION:**

- If product contacts eyes or face, wash with water or soap and water after handling and before eating, drinking, chewing gum or using tobacco.

**STORAGE AND DISPOSAL:**

- Do not contaminate water, food or feed by storage or disposal.

- Pesticide Storage: Store in an area inaccessible to children.

- Container Storage/DISPPOSAL: Wipe surface of trash containers before placing in disposal. For sharps, use your sharps disposal container. Do not recycle or refill this container. Offer empty container for recycling if available or discard in trash. Do not reuse or refill this canister. Offer empty canister for recycling if available or discard in trash.

**TO OPEN PACKAGE:**

- Push finger through opening. Replace lid. Do not flush.

**KILLS HIV-1**

- On pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings (Hospitals, Nursing Home) or other settings in which there is an expected habitual contact of surfaces with body fluids and food, and inanimate objects that surface contact transmission of Human Immunodeficiency Virus Type 1 (HIV-1) can occur.

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:**

- Personal Protection: When handling items soiled with blood or body fluids, adequate disposable non-sterile gloves, gowns, masks, and eye coverings.

- Cleaning Procedures: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product. Medline Micro-Kill™ wipes can be used for this purpose.

- Cleaning Procedures and Time:
  - Virucidal Activity: Medline Micro-Kill™ is an effective virucide on hard, non-porous surfaces against Human Immunodeficiency Virus Type 1 (HIV-1). Effective contact time is required for disinfection. Norovirus/Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain continuously wet for 2 minutes. Norovirus/Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain visibly wet for 2 minutes. Norovirus/Norwalk Virus and Feline calicivirus when the treated surface is allowed to remain visibly wet for 10 minutes. A portable water source is required for surfaces in direct contact with food.

- Thoroughly wet surface with a new wipe. Allow surface to air dry. Although efficacy at a 2 minute contact time has been shown to be adequate against HIV-1, use the contact time for the disinfection of other organisms listed on this label.

- Disposal of Injections/blood products: Blood and other body fluids should not be aerosolized and disposed of according to local regulations for infectious waste disposal.

- Disposal of needles/Sharps: Needles and other sharps should be contained and disposed of according to local regulations for infectious waste disposal.

**FIRST AID:**

- Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

- If in Eyes:
  - Rinse eyes immediately with water. If too sensitive to water, use saline solution. Do not rub. If irritation persists, consult a physician.

**COMPATIBILITY:**

- The product is compatible with all hard, non-porous, surfaces except those soiled with blood or body fluids, and surfaces that are sensitive to alkyl quaternary ammonium chlorides.

- The product is not recommended for use on mirrors.

**LATEX-GLOVE COMPATIBILITY:**

- The product is compatible with all latex gloves.

**CONTAINER STORAGE/DISPOSAL:**

- Do not contaminate water, food or feed by storage or disposal.
Medline Micro-Kill™ will clean and disinfect hard, non-porous surfaces of: bed railings, cabinets, carts, chairs, contact lenses if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice. You may contact 1-800-MEDLINE. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

### DIRECTIONS FOR USE:

**CLEANING:** Use one wipe to completely remove surface of all gross debris from surfaces to be treated.

**DISINFECTING:** To disinfect hard, non-porous surfaces, thoroughly wet the surface to be treated. Treated surface must remain visibly wetter for disinfection: To disinfect against Escherichia coli (E. coli), Escherichia coli (E. coli) CFT074 (Pseudomonas aeruginosa), Salmonella (intestinal minus), Vancomycin Resistant Enterococcus faecium (VREF), Staphylococcus aureus (Methicillin-Resistant and Staphylococcus aureus (MRSA), allow the treated surface to remain wet for 10 minutes. A portable water source is required for surfaces at least contact with food. For plastic and painted surfaces, spot test on an inconspicuous area before use. For heavily soiled surfaces, clean before following disinfecting instructions.

**VIRUCIDAL ACTIVITY:** Medline Micro-Kill™ is an effective virucide on hard, non-porous surfaces. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**

**CAUTION:** Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum or using tobacco.

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS:**

- **When handling items soiled with blood or body fluids, use disposable non-latex gloves, gowns, masks, and eye coverings.
- **For Ultrasound Transducers and Probes:** Use one or more disposable non-latex gloves and new disposable tissue to clean the transducer or probe before application of this product. Thoroughly wet surfaces with a new wipe. Thoroughly wet surface with a new wipe. Wipe treatment must remain wet for 10 minutes. Use additional wipes if needed to assure continuous 10 minute wet contact time. Let air dry.

**RESISTANT ENTEROCoccus faecalis (VRE), Staphylococcus aureus (MRS), Mycobacterium bovis BCG (Tuberculosis) and Vancomycin Intermediate Resistant Staphylococcus aureus (VISA).**

To open package: Flip open dispensing cap and remove lid by pulling upward. Throat center wipe corner through slits in lid container. DO NOT PUSH FINGER THROUGH OPENING. Replace lid. Dispense wipes by pulling out at an angle. Snap lid flaps down when finished, to retain moisture. Dispose of used wipes in trash. Do not flush.
