DISPOSAL OF INFECTIOUS MATERIAL: Blood/body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

One step cleaner and disinfectant that kills Clostridium difficile spores. A 5 minute contact time is required to kill HIV and other organisms listed on the label. Reapply as necessary to ensure that the surface remains wet for entire contact time.

DISINFECTION:

DIRECTIONS FOR USE:

1. Always use personal protective equipment.

2. Open Gluco-Chlor® packet.

3. Remove pre-saturated 3" x 3" wipe.

4. Apply wipe and wipe desired surface to be disinfected.

5. Allow surface to remain wet for 30 seconds to kill HBV and HCV, for 3 minutes to kill Staphylococcus aureus, Salmonella enterica, Pseudomonas aeruginosa, Trichophyton mentagrophytes, +HIV-1 and +HBV. Preclean prior to disinfecting surfaces for +HCV.

6. Allow surface to air dry and discard used wipe and empty packet (see storage and disposal).

PERSONAL PROTECTION: When handling items soiled with blood or body fluids, use disposable gloves, gown, masks and eye protection.

SOILED WITH BLOOD/BODY FLUIDS.

CAUTION:

Hazards to humans and domestic animals

Keep out of reach of children

Point-of-Care Equipment, Digital Screens, on Plastics, Glazed Porcelain, Stainless Steel, Formica, Vinyl, and Rubber Surfaces.

Medical, Dental and Laboratory Counters, Exam Tables, Blood Glucose Meters, Carts, Patient Care Equipment, Point-of-Care Equipment, Digital Screens, on Plastics, Glazed Porcelain, Stainless Steel, Formica, Vinyl, and Rubber Surfaces.

Wastes resulting from the use of this product must be disposed of according to local regulations for infectious waste disposal.

CAUTION:

- Chemotherapy areas
- Blood/Blood products
- Needle and/or the monitors.
- OR/Inpatient surgical centers
- OR, ER, ICU, ICU, NICU/ICN/ICU
- Hematology
- OR/Inpatient surgical centers
- Cardiac, CVICU, NICU/ICU
- OR/Inpatient surgical centers
- Catheterization lab (if used for the bloodstream or normally sterile areas of the body.

FIRST AID:

Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing.

PRECAUTIONARY STATEMENTS:

KEEP OUT OF REACH OF CHILDREN

CAUTION

Storage and Disposal:

Do not store at high temperatures. Store at room temperature in a cool, dry area protected from direct sunlight. Keep away from open flame.

Keep the turbulence minimum at all times as uncontrolled air may cause the contents to be removed from the bottle. Do not use as a substitute for barrier protection. Keep out of reach of children.

Microbiological testing was conducted by Analytical Testing Laboratories, Westlake, Ohio. The testing methods were in accordance with standard procedures for disinfectants and disinfectant processes.

Gluco-Chlor® meets the CMS guidelines for Tag F441 in 42 CFR 483.65 for disinfection of blood glucose meters.

Gluco-Chlor® meets the CDC guidelines for disinfection of blood glucose meters.

Gluco-Chlor® meets OSHA blood borne pathogen standards in 29 CFR 1910-1030 for disinfection of blood glucose meters.

Gluco-Chlor® is a one-step cleaner and disinfectant that is sporicidal and kills +HIV-1, +HBV, +HCV.

Gluco-Chlor® is a one-step cleaner and disinfectant that is sporicidal and kills +HIV-1, +HBV, +HCV.

+HIV-1 and +HBV. Preclean prior to disinfecting surfaces for +HCV.

Gluco-Chlor® meets the CDC guidelines for disinfection of blood glucose meters. This product is one of a limited number of products approved for disinfecting medical devices prior to sterilization or high level disinfection.

This product cannot be used to clean or disinfect any surface or instrument that (1) is introduced directly into the human body, (2) either into or in contact with the bloodstream or normally sterile areas of the body, (3) penetrates the blood barriers or otherwise enter normally sterile areas of the body.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, (2) either into or in contact with the bloodstream or normally sterile areas of the body, (3) penetrates the blood barriers or otherwise enter normally sterile areas of the body.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, (2) either into or in contact with the bloodstream or normally sterile areas of the body, (3) penetrates the blood barriers or otherwise enter normally sterile areas of the body.
