Lighter Needed to Operate.

REFILLS AVAILABLE
DIRECTIONS FOR USE

For best results allow 10-30 minutes, depending upon area, for product to take effect. Product works well in outdoor areas where there is air movement, such as decks, porches, patios, and backyards. It is also great for camping. Place one lantern per each 250 square feet in area 1 x 10 or 15." element. The lantern is not made for larger areas. Do not expose lantern or mat to rain. Cover on or remove all exposed parts. Do not use lantern, stand, or tripod in windy conditions. The lantern is not waterproof.

Lantern provides light and repels mosquitoes. Start with the switch in "ON" position. The lantern will be in a "test" mode with the light off. Place the lantern on a flat, stable surface and one meter (3') from the wall or other objects of any kind. When using the lantern, the opposite side of the wall or objects of any kind should be at least 0.5 meters (1') away from the lantern. This will ensure proper airflow and prevent damage to the lantern.

The lantern is designed for use as a mosquito repellent with or without the light being on. Remember, it is not a light or a light on a tabletop. It is a light that can be used for protection. Do not use in areas where children or pets can access the lantern or mat. The lantern is not designed for use in areas where children or pets can access the lantern or mat.

DIRECTIONS FOR USE

To turn on lantern light, push the switch located on the back of the lantern. Push the switch to "ON" for high light. Push the switch to "OFF" to turn off the light. If lantern light does not turn on, replace batteries.

The lantern may be used as a mosquito repellent indoors or without the light being on. However, for the best mosquito repellent performance, have the light on. If indoor insects, the mosquito repellent must be activated. To activate the mosquito repellent, slide the ON/OFF button to the "ON" position. The gas will begin to flow.

Wait approximately 5 to 15 seconds and then depress the START button three to five times in rapid succession.

Verify that the mosquito repellent is activated, look inside the vents located at the top of the lantern, and the light will glow. If there is no change, check to make sure that the lantern is "ON" and the ON/OFF button is depressed. If there is no change, the lantern is not working. Repeat the steps above.

Turn on lantern light by pushing the switch located on the back of the lantern. Push the switch to "ON" for high light. Push the switch to "OFF" to turn off the light. If lantern light does not turn on, replace batteries.

STORAGE AND DISPOSAL:

Do not remove minor flange or crimping found at the base of lantern. Replace lantern globe in case. Thermacell" lantern globe contains glass and should be disposed of according to local regulations.

Storlre unused units in original packaging in a cool, dry place inaccessible to children and pets. Store lantern and unused cartridges in a cool, dry place away from sources of heat. If cartridge is empty or used, discard it safely. Never place unused units down any indoor or outdoor stair.
