STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store unused product in original container only in a dry, temperature-controlled, secure place.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse or equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY AND LIMITATION OF DAMAGES

CONDITIONS OF SALE: To the extent consistent with applicable law, Sipcam Agro USA, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to Sipcam Agro USA, Inc. Sipcam Agro USA, Inc. DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, TO THE EXTENT CONSISTENT WITH APPLICABLE LAW Sipcam Agro USA, INC. SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, AND Sipcam Agro USA, INC. SOLE LIABILITY AND BUYER’S AND USER’S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE, BUYER AND USER ACKNOWLEDGE AND ASSUME ALL RISKS AND LIABILITY FOR THE CONSEQUENCES OF ANY USE OF THE PRODUCT, WHETHER IN CONFORMITY WITH THE LABEL OR OTHERWISE, AND Sipcam Agro USA, INC. DOES NOT AUTHORIZE ANY AGENT OR REPRESENTATIVE TO MAKE ANY OTHER WARRANTY, GUARANTEE OR REPRESENTATION CONCERNING THIS PRODUCT.
This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and other places of agricultural production. It requires notification, and emergency assistance. It also contains specific instruction and exceptions pertaining to use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not exercise or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: 
- Gloves
- Chemical-resistant gloves
- Shoes with socks
- Chemical-resistant gloves
- Long-sleeved shirt and long pants
- Shifts or pants

Follow manufacturer's instructions for cleaning/keeping PPE. If no such instructions for washables, delineate and hot water. Keep and wash PPE separately from other laundry.

AGRICULTURAL USE REQUIREMENTS (continued)

The statements on this label about personal protective equipment (PPE) and restricted-entry interval. The products are covered by the Worker Protection Standard. Do not exercise or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: 
- Gloves
- Chemical-resistant gloves
- Shoes with socks
- Chemical-resistant gloves

Follow manufacturer’s instructions for cleaning/keeping PPE. If no such instructions for washables, delineate and hot water. Keep and wash PPE separately from other laundry.

EMINENT 125SL

Crops other than sugarbeet must not be grown within 120 days following the last application of EMINENT. Do not make more than two (2) applications of EMINENT. Alternated with a non-triazole fungicide which is registered for use on sugarbeets. If the alternate fungicide is known to provide protection for up to 14 days, applications of EMINENT should be no longer than 28 days apart. Do not mix or alternate EMINENT with other DM fungicides.

AGRICULTURAL CROPS:

<table>
<thead>
<tr>
<th>Crop</th>
<th>Diseases Controlled</th>
<th>Rate per Acre</th>
<th>Preharvest Interval</th>
<th>Application Directives</th>

</thead>
<tbody>
<tr>
<td>Sugarbeets</td>
<td>Cercospora leafspot, powdery mildew, Rhizoctonia leafblotch</td>
<td>15 fluid ounces</td>
<td>14 days</td>
<td>Apply EMINENT at intervals of 21 to 29 days, when becoming favorable for Cercospora leafblotch or powdery mildew. Applications of EMINENT must be alternated with a non-triazole fungicide.</td>
</tr>
</tbody>
</table>
PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Caution

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

PERSONAL PROTECTIVE EQUIPMENT (PPE):

Some materials that are chemical-resistant to this product are barrier laminate, butyl rubber > 14 mils, neoprene rubber > 14 mils, polyvinyl chloride (PVC) > 14 mils, and viton > 14 mils. If you want more options, follow the instructions for category C on an EPA chemical-resistance category selection chart.

Applicators and other handlers must wear:

- Long sleeve shirt and long pants
- Shoes plus socks
- Chemical-resistant gloves

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

GENERAL USE INFORMATION

Apply EMINENT in water carried by conventional irrigation systems that are intended to be protected from disease. To obtain adequate coverage of typical agricultural crops, total spray volume usually will range from 20 to 100 gallons per acre (200 to 1600 liters per hectare for duster sprays), and 5 to 10 gallons per acre (50 to 100 liters per hectare) for concentrate ground sprays and aircraft applications. Both ground and aircraft methods of application are recommended.

EMINENT should be applied to the spray tank while filling with water. Keep the agitator running when filling the spray tank and during spray operations. Combinations in the spray tank with pesticides, fertilizers, or surfactants are not recommended unless prior use has shown the combination to be physically compatible, effective, and nontoxic under your conditions of use. EMINENT contains a stearol demethylation inhibitor (sterol DMI) fungicide. EMINENT should be applied in tank mix or in alternate applications with non-DMI fungicides as a resistance management strategy. Do not mix or alternate EMINENT with other DMI fungicides.

AGRICULTURAL USE REQUIREMENTS

The statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves
- Shoes plus socks

GENERAL CHEMIGATION INSTRUCTIONS:

Apply this product only through one or more of the following types of systems: sprinkler including center pivot, lateral move, and move, side (lateral move), traveling, brigades, or ground move with or without a set or handheld irrigation system. Do not apply this product through any other type of irrigation system.

Sprinkler Chemigation:

The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the intake side of the injection pump and connected to the system interconnection to prevent fluid from bypassing the supply tank when the irrigation system is either automatically or manually shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor if the water pressure decreases to the point where pesticide distribution is adversely affected. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock. Do not apply when wind speed facies drift beyond the area intended for treatment. When mixing, fill nurse tank half full with water. Add EMINENT 125SL, should be added through a traveling irrigation system continuously or at the last 30 minutes of solid set or hand moved irrigation systems. Agitation is recommended.

In order to mitigate certain reproductive effects to endangered bird and mammal species which may occur incidentally in sugared growing areas, you are required to ascertain through the state Department of Agriculture, or Cooperative Extension Service, whether the treatment area may contain habitat of Federally listed bird and mammal species; if so, treatment must be avoided in these areas.

Sprinkler Chemigation:

A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.
**ACTIVE INGREDIENTS:**

- Tetraconazole {1-[2-(2,4-dichlorophenyl)-3-(1,1,2,2-tetrafluoroethoxy) propyl]-1H-1,2,4-triazole} \( \text{11.6\%} \)

**OTHER INGREDIENTS:**

- \( \text{88.4\%} \)

**TOTAL:** \( \text{100.0\%} \)

Contains 1 lb. active ingredient (tetraconazole) per gallon.

**KEEP OUT OF REACH OF CHILDREN**

Pesticide Storage:

- Store unused product in original container only in a dry, temperature-controlled, secure place.

Pesticide Disposal:

- Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

**CONDITIONS OF SALE:**

To the extent consistent with applicable law, Sipcam Agro USA, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in accordance with the directions under normal conditions of use. This warranty does not extend to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to Sipcam Agro USA, Inc. Sipcam Agro USA, Inc. DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, TO THE EXTENT CONSISTENT WITH APPLICABLE LAW. Sipcam Agro USA, INC. SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, AND Sipcam Agro USA, INC. SOLE LIABILITY AND BUYER’S AND USER’S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE. BUYER AND USER ACKNOWLEDGE AND ASSUME ALL RISKS AND LIABILITY OF HANDLING, STORAGE AND USE OF THIS PRODUCT.

Sipcam Agro USA, Inc. does not authorize any agent or representative to make any other warranty, guarantee or representation concerning this product.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**FIRST AID**

- In case of contact:
  - Remove contaminated clothing and shoes.
  - Rinse with clean water for 15-20 minutes.

- In eyes:
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

**DISABLED VEHICLE OR FOODSTUFFS**

- Do not induce vomiting unless told by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

- Call a poison control center or doctor immediately for treatment advice.

**ON SKIN OR CLOTHING**

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.

**IN EYES**

- Hold eye open and rinse slowly and gently with plenty of water for 15-20 minutes.

**ON INJURY**

- Call a poison control center or doctor for treatment advice.

**SAFETY DATA SHEET**

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE:

Store unused product in original container only in a dry, temperature-controlled, secure place.

PESTICIDE DISPOSAL:

Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER DISPOSAL:

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.
