

**Precautionary Statements**

**Hazard to Humans and Domestic Animals**

*Keep out of reach of children*

CAUTION

Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing.

IF IN EYES

• Wash eyes immediately with water for 15 to 30 minutes. Get medical attention immediately.

• Do not rub eyes.

• Do not use eyedrops.

• If weight of container and continuing eye irritation persists, get medical attention.

• For contact lenses, remove them as soon as possible. Guard against swallowing.

• If inhaled, get medical attention immediately.

IF ON SKIN OR CLOTHING

• Wash skin immediately with water for 15 to 30 minutes. Get medical attention immediately.

• If weight of container and continuing skin irritation persists, get medical attention.

• Do not rub skin.

• Do not use medicinal products.

• For contact lenses, remove them as soon as possible. Guard against swallowing.

• If inhaled, get medical attention immediately.

STORAGE AND DISPOSAL

A judicious storage practice and disposal of the product with respect to potential and environmental danger to leaks and spills, excess product in need, and vandalism should allow this product to withstand extreme weather conditions, such as rain, snow, and sunlight. Pesticides that are not properly stored may cause environmental contamination, causing damage to crops, soil, groundwater, and the like. Some pesticides are hazardous to both organisms and property. Some can cause contamination of water, food, or feed by storage or disposal.

Proper pesticide storage and disposal are essential to prevent exposure to people and the environment. If improperly stored and disposed of, pesticides that are hazardous to both organisms and property can cause contamination of water, food, or feed by storage or disposal. To avoid wastes, use all material in this container, including rinsate, by the end of the application season. If wastes cannot be avoided, offer remaining product to a adjacent use or disposal. If wastes cannot be avoided, offer remaining product to a adjacent use or disposal. If wastes cannot be avoided, offer remaining product to a adjacent use or disposal.

For product information or assistance using this product, call 1-800-ROUNDUP (1-800-768-3637).

This product is used to produce agricultural plants on farms, forests, nurseries or greenhouses. Monsanto Ag, a division of Monsanto Company, 800 N. Lindbergh Blvd., St. Louis, MO 63167 USA.

Monsanto Reference ID 2017-AMY144
Roundup PowerMAX Herbicide

Herbicide for Roundup Ready® Crops
Selective broad-spectrum weed control in Roundup Ready® crops
Non-selective, broad-spectrum weed control for many agricultural systems and farmsteads

ACTIVE INGREDIENT:
*Glyphosate, N-(phosphonomethyl)glycine, in the form of its potassium salt .......... 48.7%
*Contains 660 grams of the active ingredient glyphosate, in the form of its potassium salt, per liter or 5.5 pounds per U.S. gallon, which is equivalent to 540 grams of the acid, glyphosate, per liter or 4.5 pounds per U.S. gallon (39.8% by weight).

8.0 APPLICATION EQUIPMENT AND TECHNIQUES

Other information on the product label. Use drift reduction additives can affect the drift potential at any given wind speed. Avoid application when wind speeds are likely to drift.

Avoiding spray drift at the application site is the responsibility of the applicator. The interaction of many equipment- and weather-related factors determines the potential for spray drift. The applicator and the grower are responsible for preventing drift.

7.7 Colorants and Dyes

Additions to the spray solution of this product may be made using aerial application equipment where appropriate, unless otherwise prohibited. All applications of this product described on this label may be made using aerial application equipment. Other conditions that favor spray drift.

NOTE: The template can be used for a booklet with the following dimensions:

4.125" x 7.125"
Do not apply this product by air if winds exceed 10 miles per hour. The maximum distance of the outermost nozzles on the boom must not exceed 75 percent of the crop row width. Use sufficient carrier volume and appropriate equipment set-up to form droplets of the desired size. Apply this product at the appropriate rate in 3 to 15 gallons of water per acre. Do not apply this herbicide solution using an atomizer or air-assisted applicator. Use adequate contact with weeds and so that the wiper contact point is away from desirable vegetation. Do not apply this product using a wiper applicator when weeds are wet. Do not add surfactant to the herbicide solution when using a wiper applicator. Do not apply this product using a wiper applicator when weeds are wet. Droplets, mist, foam or splatter of the herbicide solution settling onto desirable vegetation can result in injury or destruction. To the extent consistent with applicable law, such irrigation to a crop or other desirable vegetation can occur when application is made to a crop or other desirable vegetation. Do not apply this product using a wiper applicator when weeds are wet. If winds are blowing between 5 and 10 miles per hour TOWARD non-target vegetation, do not apply this product within 500 feet upwind of the application area.

Injury to a crop or other desirable vegetation can occur when application is made to a crop or other desirable vegetation. Do not apply this product within 500 feet upwind of the application area.

To report known or suspected misuse of this product, call 1-800-332-3111.prior permission from the Fresno County Agricultural Commissioner.

11.3 Grass Seed and Sod Production

Monsanto Spec: 99342                     Dieline PPN: 40113P1-154

Description:

USE INSTRUCTIONS: This product may be applied over the top of desirable vegetation as a spot treatment or over the entire pasture or field, or as a spot application. Wiper applicator, preemergence or broadcast application equipment may be used. Do not treat turf or turf surrounding newly seeded areas. Where no-wavetreatment is necessary, sufficient soil moisture must be present to establish grass seedlings. In unsuitable conditions, do not apply this product. In pastures containing less than 50% of the total pasture area that will receive treatment, do not apply to more than 10% of the total area at any one time. Application rates and crop stage timings specified for Roundup Ready crops may be repeated on the same area at 30-day intervals.

Preharvest application: 20 lbs/acre or less, this product may be applied over the entire pasture or field, or as a spot application. Wiper applicator, preemergence or broadcast application equipment may be used. For application of this product on rangeland, apply when most mature brome plants are in early flower and weed growth has been reduced to levels where weed suppression is still possible. Use a wiper applicator to achieve maximum performance. No waiting period between application and feeding or livestock grazing. Follow-up applications in expanded pastures can be used to denude teledes of the same family. Grazing the area after 45 days of this product is not intended for use in a pasture or field to be used for Roundup Ready crops. This product is not intended to be planted in areas to be used for Roundup Ready crops.

Alternate Preharvest Treatment: Apply this product in 18 to 20 lbs/acre at the time of planting to inhibit seed production in a pasture or field to be used for Roundup Ready crops. This product is not intended for use in a pasture or field to be used for Roundup Ready crops. This product is not intended to be planted in areas to be used for Roundup Ready crops.

NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 72, 80, 88, 96

11.2 Conservation Reserve Program (CRP)

NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 72, 80, 88, 96
8.5 x 11 inches
NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96.
USE INSTRUCTIONS: Apply this product alone or in a tank mixture with Roundup Ready Flex cotton. DO NOT use this product with Dual Magnum or Stalwart applied over the top of Roundup Ready cotton.

DO NOT COMBINE THE DIRECTIONS FOR USE IN THIS SECTION WITH THE DIRECTIONS FOR USE OF OTHER PRODUCTS IN THIS LABEL. See the "ROUNDUP READY CROPS" section of this label for information regarding the use of this product in Roundup Ready crops. See the "PRODUCT INFORMATION" section of this label for more information on Maximum Preemergence Rates.
USE INSTRUCTIONS: This product may be applied before, during or after planting Roundup Ready Flex cotton.

PRECAUTIONS: In some cases, these tank-mix products will cause visual symptoms in Roundup Ready Flex cotton. Under adverse growing conditions, including drought, hail or wind damage, Roundup Ready Flex cotton may become chlorotic, change color, or show some degree of stunting or reduced growth before or after applying this product. Following these general precautions, including thorough attention to weed management, may help to avoid these symptoms. Do not apply this product in Roundup Ready Flex cotton if symptoms occur. For more information, contact your local agricultural extension service or your local crop consultant.

NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96
Supplied for: Monsanto

Applies to existing growing annual weeds.

Monsanto Spec: 99342

NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 48, 56, 64, 72, 80, 88, 96

16.5 PERENNIAL WEEDS RATE SECTION

For the product to be most effective in the spring, use herbicide sprays that contain at least 0.5% dicamba. Ensure that the product used is labeled for application at the desired site. For control, use the following rates in 1 to 2 quarts per acre:

<table>
<thead>
<tr>
<th>Weed Species</th>
<th>Rate (spray volume)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blue mustard</td>
<td>1 to 2 quarts per acre</td>
</tr>
<tr>
<td>Common dandelion</td>
<td>1 to 2 quarts per acre</td>
</tr>
</tbody>
</table>

For enhanced results, apply a mixture of dicamba and 2,4-D at a ratio of 1:1. Ensure that the product used is labeled for application at the desired site. For control, use the following rates in 1 to 2 quarts per acre:

<table>
<thead>
<tr>
<th>Weed Species</th>
<th>Rate (spray volume)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dandelion</td>
<td>1 to 2 quarts per acre</td>
</tr>
<tr>
<td>Common dandelion</td>
<td>1 to 2 quarts per acre</td>
</tr>
</tbody>
</table>

For control of perennial weeds, use a hand-held controlled droplet applicator (HCD), apply 3 to 4 quarts of the product (2.5 to 4 quarts) to the area to be sprayed in a 5 to 10 gallons of water per acre. When spraying, ensure that the product is applied in a 4 to 7% solution. For control of perennial weeds, use a hand-held controlled droplet applicator (HCD), apply 3 to 4 quarts of the product (2.5 to 4 quarts) to the area to be sprayed in a 5 to 10 gallons of water per acre. When spraying, ensure that the product is applied in a 4 to 7% solution.
NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96.
Ceanothus1 1.5 – 3.3 1 – 1.5%
eucalyptus plants will result in less than optimum results.

Blackgum 1.5 – 3.3 1 – 1.5%

2.5 quarts of this product in 10 to 40 gallons of water per acre.

After leaf drop and until a killing frost or as long as stems are green, apply 2 to
0.7-percent solution of this product after berries have set or dropped in late-fall.

can be obtained when application is made in late-summer or fall. Apply a
1-percent solution when at least 50 percent of the new leaves are fully
developed. For partial control, apply the full amount of the product at the
indicated rate, but at least 50 percent of the new leaves must be green and
developed. For complete or controlled weeds, apply the full amount of the
product at the indicated rate, but at least 75 percent of the new leaves
must be green and fully developed.

More than one application might be needed to achieve control.
Application in the spring to early fall is recommended. For early fall
control of listed weeds requires the use of a 1-percent solution.

For in-crop (over-the-top) uses on Roundup Ready crops, crop safety and
weed control performance are not warranted by Monsanto when this product
is applied, as well as weather conditions which are outside the application
requirements and with express written permission from this Company.

To the extent controlled with application low rates and all are expected that any, roundup can be used in watering can be from the control the system of the Company, including the limiting or
controlling with products other than those set forth in the Directions, to
incompatible with products other than those set forth in the Directions,
application for use in field, field or aerial or other application which is
incompatible with products other than those set forth in the Directions.

In case of an emergency involving this product, call collect, day or night: (314) 694-4000.
NOTE: This template can be used for a booklet with the following number of pages: 8, 12, 16, 24, 32, 40, 48, 56, 64, 72, 80, 88, 96
