Do not eat in or near paint solvents. Avoid breathing vapor. Do not swallow. Avoid exposure to skin or eye contact. Wash thoroughly with soap and water after handling. Remove contaminated clothing and shoes. Avoid breathing vapor. Avoid eating or drinking. Avoid skin or eye contact.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge containing this product into lakes, streams, ponds, aquacultures, or other waters without in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge containing this product to sewers without previously notifying the local sewage treatment plant authorities. For guidance, contact your State Water Board or Regional Office of the EPA.

STORAGE AND HANDLING

AQUACO GA 50 Water Treatment Microbiocide is incompatible with many commonly used materials of construction such as steel, galvanized iron, aluminum, copper, and brass. When applying, do not allow to contact painted, glazed, or enameled surfaces and do not allow to contact metal, glass, or plastic containers, pipes, or equipment. This product should be stored and handled in a closed, chemically inert, steel, polyethylene, stainless steel, or fiberglass storage tank. This liquid is hazardous to the environment and must be stored and handled in accordance with applicable federal and local regulations. If spilled into the environment, avoid harming the aquatic ecosystem. If spilled, prevent further contamination of surface waters by covering the spill, then collect in an impermeable container. Correct spills in accordance with guidelines from the National Oceanic and Atmospheric Administration. Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage times (up to about 1 month), temperatures at 100°F (37°C) can be tolerated but the maximum storage temperature is about 80°F (27°C).

It is safe to pump the chemical through a stainless steel filtration system but the stainless steel can be affected adversely by the chemical. This pump is not recommended for use with the chemical. This pump is not recommended when in use with the chemical.

LIMITED WARRANTY AND DISCLAIMER

Seller warrants that the product conforms to its chemical description as contained on the label in accordance with the Sportfish, 1975, Section 119, Title 40, U.S. Code, and all applicable poison and registration labels. Seller warrants that the product is free from defects in material and workmanship against the product and are made express or implied representations. The warranty is limited to the effective period of the label, and no implied warranties of merchantability or fitness for a particular purpose and all other express or implied warranties, representations and warranties. NO LIABILITY WHATSOEVER TO THE USE OF THE PRODUCT.
