Hy-Grade I™ Basal Oil

Principal Functioning Agents:
Severely Hydrotreated Light Naphthenic Distillate Blend of Aliphatic Hydrocarbon Oils  Total 100%
"Contains Petroleum Distillates"  WA Reg. No. 99924-07001

Net Contents:  

KEEP OUT OF REACH OF CHILDREN
CAUTION

Excessive exposures may cause irritation to eyes, nose, throat. Prolonged and excessive contact may cause moderate irritation to skin. Contact with eyes may cause mild irritation. May be harmful or fatal if swallowed. Pulmonary aspiration pneumonia hazard can occur if swallowed and vomiting occurs. Avoid breathing mist or vapors.

First Aid

Skin Contact: Flush with large quantities of water for at least 15 minutes.
Eye Contact:  Flush with large quantities of water for at least 15 minutes. Seek medical attention.
Ingestion: Do not induce vomiting. Do not give liquids. Call a physician.
Inhalation: If irritation, headache, nausea, or drowsiness occurs, remove to fresh air.

Personal Protective Equipment (PPE)  Rubber solvent-resistant gloves, Safety glasses or goggles, shoes, socks, pants, long-sleeved shirt.

DIRECTIONS FOR USE

Hy-Grade I™ is a low viscosity, non-aromatic / non-carcinogenic diluent. Hy-Grade I™ is designed for basal bark and cut surface brush control applications with Garlon 4 Ultra or other oil soluble herbicides, which are registered for woody plant vegetation control. Hy-Grade I™ is approved for use in industrial Rights-of-Way, Forestry, and other non-cropland applications that require herbicide to be diluted prior to application.

Recommended Use Rates:
Hy-Grade I™ can be used at herbicide:diluent ratios of 1:4 (20%) to 1:1 (50%) when following the herbicide manufacturers label recommendations. Follow recommendations and label rates as outline on the herbicide label.

Environmental Hazards:
Do not spray directly into water or to areas where surface water is present.

Storage and Disposal:
Triple rinse and recycle container at approved site.

"WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the internet from from WSDA at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington."
