NOTE ON PESTICIDE EFFICACY EFFECTS

VINTRE may increase the response of translaminar, systemic and growth regulators, herbicides and nutrients. Users and or applicator should therefore evaluate this response prior to widespread usage and read the entire label before using.

DIRECTIONS FOR USE AND PRECAUTIONS

Prior to use, read all the directions on this label and on the labels of the manufacturer's insecticides, miticides, fungicides, herbicides, PGRs and/or nutrients being used with this product. The manufacturer's labels for specific usage and restrictions has precedence over directions for use referred to on the VINTRE label. Test for compatibility prior to mixing and application with other chemicals. Always test new tank-mix combinations before widespread use. If unsure, check with the manufacturers To ensure thorough mixing, it is suggested that you recirculate mini tanks and bulk tanks or shaker containers before using. Pre-raise to the rinse, spray lines or containers thoroughly before adding VINTRE as VINTRE contains surfactants. VINTRE should not be added to tanks, spray lines, or containers which may contain additional surfactant adjuvants. Coatings on interior tanks that have previously cleaned, sprayed may be dissolved by VINTRE, thereby releasing it into the mix about to be sprayed. In field, as directed, add 20 gals of VINTRE to 20 gals of water circulate through system for 20 minutes, spray to waste. Increasing tank mix compounds will increase phyto-rhiz deadline temperatures (150º F) with some tank mixes, may increase phyto-rhiz death and should be tested and observed before widespread use. THEREFORE, mix as prescribed for regular spraying under similar conditions. Spray up to the point before sunlight or an excessive runoff may accumulate tank mix chemicals underneath fruit. Treat a small area and observe results. If the results are satisfactory, proceed with a further application.

CAUTION:

Do not apply to fruiting stages of POME FRUIT, CHERRIES, TABLE GRAPES or other sensitive or stressed crops without first consulting your Oro Agri or Distributor representative.

Use CAUTION when combining in tank mixes with EC products, Copper and/or Chlorothalonil on sensitive crops.

CAUTION: VINTRE reduces dew formation for up to 7 days and therefore, may increase the risk of frost damage in frost prone areas.

NOT FOR AQUATIC USE IN WASHINGTON

MIXING DIRECTIONS

1. Fill tank one-half full of water.
2. Add the required amount of other tank mix products while agitating.
3. Add remainder of the water.
4. Add the recommended amount of VINTRE last and continue agitation until completion of spraying.

- Additives may be used to control VINTRE foam.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Store out of reach of children. Keep container closed when not in use. Avoid temperatures below 34ºF (1ºC) and above 100ºF (40ºC). DISPOSAL:_if empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

4. WARNING / AVISO

SI Usted no entienda la etiqueta, busque a alguien para que se la explique a Usted en detalle. Si you do not understand the label, find someone to explain it to you in detail.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

Causes substantial but temporary eye injury. Harmful if absorbed through skin or inhaled. Do not get in eyes or on clothing. Avoid contact with skin. Wear goggles, face shield or safety glasses. Avoid breathing spray mist. Wash hands before eating, drinking, chewing gum; using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

What to do in case of contact:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

US HOT LINE NUMBER: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

For Chemical Emergency (spill, leak, fire or accident). Call CHEMTREC (800) 424-9300
