It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DIRECTIONS FOR USE**

**Use Restrictions**

When used indoors: Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not enter or allow others to enter the treated area until the sprays have dried. Do not apply to vegetation and other treated areas until the sprays have dried. Do not apply to treated areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served, such as dining rooms but excluding areas where food is commercially prepared or processed. Do not use in serving areas where food is exposed or facility is in operation. Serving areas are areas where prepared foods are served, such as dining rooms but excluding areas where food is commercially prepared or processed. Do not allow the product to enter any drain during or after application. All outdoor applications must be limited to only spot or crack-and-crevice treatments, except for the following permitted uses: 1) Treatment to soil or vegetation around structures; and 2) Applications to building foundations, up to a maximum height of 5 feet. Application is prohibited to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to only spot and crack-and-crevice applications.

When used outdoors: Do not water the treated area to the point of run-off. Do not make applications during rain. Application is prohibited directly into sewers or drains or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application. All outdoor applications must be limited to only spot or crack-and-crevice treatments, except for the following permitted uses: 1) Treatment to soil or vegetation around structures; and 2) Applications to building foundations, up to a maximum height of 5 feet. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to only spot and crack-and-crevice applications.

For Control of Nests of Hornets, Wasps and Yellow Jackets: The best time to spray the nest is in the early morning or early evening, when air temperature is cooler and most insects are in the nest and little activity is observed around the nest opening. Spray only if the air is still. Stand at a safe distance from the nest, not directly under it. Hold container upright at arm’s-length, point the actuator at the nest and first spray in the opening of the nest; then spray the rest of the nest until saturated. Treated insects may fall out of the nest and die. Any insects returning to the nest after treatment will be killed. Wait 48 hours before removing the nest. Hose off foliage of desirable plants that are contacted with spray. This product may stain or adversely affect vinyl, painted and plastic surfaces. Avoid application to asphalt roofing shingles as staining may occur. Before using in areas where spray may contact these surfaces, test in an inconspicuous area and recheck in a few hours.

**Environmental Hazards**

This product is highly toxic to aquatic organisms, including fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to inter-tidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment or disposing of equipment, washer. See Directions for Use for additional precautions and requirements. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain do not blow or wash pesticide off the treatment area. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the area.

**Physical or Chemical Hazards**

Flammable: Contents under pressure. Keep away from heat, sparks and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

**Storage and Disposal**

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage:

Keep Out of Reach of Children

CAUTION

See side panel for First Aid and additional Precautionary Statements.

**Active Ingredients:**

- Tetramethrin (CAS No. 7696-12-0) .................................. 0.200%
- Sumithrin (CAS No. 26002-80-2) .................................. 0.125%

**Other Ingredients** ................................................................. 99.675%

*Contains petroleum distillate 100.000%
