USE: Indoors as a spot treatment and outdoors.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Contact with product may result in transient tingling and reddening of the skin. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

Environmental Hazards

This product is extremely toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

Physical or Chemical Hazards

Do not apply this product in or on electrical equipment due to the possibility of shock hazard.

Do not use in commercial food handling establishments, restaurants or other places where food is commercially prepared or processed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not allow children or pets to contact treated surfaces until spray has dried.

Application is prohibit the direct treatment of food or contacting of food or food contact surfaces. A cabinet and doors, and to any area that might be a potential food source for insects. Do not allow the product to enter any drain, sink or storage areas. A cabinet and doors, or to any area that might be a potential food source for insects. Do not allow the product to enter any drain, sink or storage areas.

BEFORE USE

• Remove all exposed food and cooking utensils.

OUTDOORS

Do not water the treated area to the point of run-off. Do not make applications in the rain. All outdoor applications must be limited to spot or crack-and-crevice treatments only. For the following permitted uses:

1. Treatment to soil or vegetation around shrubs.

2. Applications to lawns, turf, and other vegetation.

3. Applications to building foundations, up to a maximum height of 5 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches, and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications only.

Outdoor use as an aid in controlling listed insects only.

Point the sprayer away from face. Hold sprayer on a slight downward angle, approximately 12 inches from the surface to be sprayed. Spray with wind if breeze is blowing.

Do not contaminate fish ponds or apply directly to water. Do not use on edible crops.

PESTS ON OUTSIDE SURFACES OF BUILDINGS:

For control of building infestation to Ants (including Caribbean crazy ants), Clover Mites, Cockroaches, Centipedes, Crickets, Silverfish and Sewbugs (Pillbugs). Spray foundation of building where insects are active and may enter up to a height of 2 to 3 feet. Apply to outside surfaces of buildings where insects tend to congregate. Spray along railings (but not limited to), screens, window frames, sashes, porches, patios, garages and refuse dumps. Repeat treatment at least once every 2 weeks.

CRANES

Ants (including Caribbean crazy ants), May Ants, Cockroaches (including Asian Cockroaches), Centipedes, Crickets, Mole Crickets, Water Bugs and Silverfish. Paint sprayer 12 to 10 inches from surface to be treated and spray in infested areas, areas where insects are active. Spray to lightly moisten the surface. Also spray legs of table and chairs.

Ants (including Caribbean crazy ants): Spray freely around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris. Repeat as necessary but not more than once per week.

Lone Star Ticks, Dog Ticks, Crickets and Fleas: Apply thoroughly to infested areas, grass or weeds. Not for use on plants grown for sale or other commercial use.

Termites, Carpenter Ants and Carpenter Bees: (for localized control only). Apply to voids or channels in damaged wood of a structure, or to cracks, crevices, and spaces in and between wooden portions of a structure or between wood and the foundation, in locations vulnerable to attack such as crawl spaces.

For Termites: The use of such applications is to kill workers or winged forms which may be present in the treated areas at the time of application. Not recommended for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. For active infestation, get a professional inspection.

INDOORS

Hold container upright. Do not spray up into air. Apply in surfaces only as a spot and crack & crevice treatment. Hold approximately 12 inches from surface to be sprayed.

Cockroaches (Including Adult and Immature Stages Of Both Non-Resistant and Organophosphate and Carbamate Resistant Strains), Ants, Brandeys, Bees, Centipedes, Crickets, Dermaptera, Firebrats, Flies, Palmetto Bugs, Silverfish, Sewbugs, Ticks and Waterbugs. Apply to areas where these pests crawl and hide, especially in hidden areas around sinks and storage areas, behind baseboards, around doors and windows, and behind refrigerators, cabinets, sills and stoves. Apply to undersides of shelves, drawers, books, and similar areas. For Ticks, spray surfaces until moist. Repeat as necessary but not more than once per week.

Ants (including Caribbean crazy ants): Spray ants trails and around doors and windows and other places where ants enter the house.

Carpenter Ants: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter the premises and where they crawl and hide. Spray into infested wood through existing openings.

Ticks (Including Ticks That May Transmit Lyme Disease) and Fleas ON SURFACES: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters until moist. Adult Flies and larvae contacted by spray will be killed. Put fresh bedding down once spray has dried. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are bad. Delicate fabrics should be tested for staining in an inconspicuous area prior to use.

Spiders: Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas on which these pests may crawl.

Centipedes, Ground Beetles, Pillbugs, Sewbugs, Scorpions and Ticks: Apply around doors and windows and other places where these pests may enter premises. For Ticks, spray for up to 1 month.

PANTRY PESTS — Grain Beetles (Rusty, Merchant and Saw-Toothed), Flour Beetles (Red and Confused), Mecina Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Emelia Bees, Rice Weevils, Lesser Grain Borer, Spider Beetles and Tobacco Moths: Treat exposed stages. Remove all food stuffs, utensils and shelf paper from area to be treated. Discard used shell paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow to dry prior to replacement of shelf paper, food and utensils. Wash any exposed food handling surfaces and utensils before use.

Bed Bugs: Remove linens and wash before use. Lightly spray mattresses, especially tufts, folds and eddies. Apply to the interior of the frame. Allow to dry before making bed.
