PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Cause eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, showing pets, or caring for animals.

FIRST AID

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If in eyes:
- Rinse eyes open and wide with cool water for at least 15 minutes. If persistent, seek medical attention.
- Remove contact lenses, if present, after first 5 minutes, then continue rinsing eyes.
- Contact a poison control center or doctor for treatment advice.

Note to Physicians: For specific information, consult the patient's examination.

ENVIRONMENTAL HAZARDS

This product is not to be applied in water. Do not apply directly to fish, shrimp or prawns. This product is not to be applied into watercourses or other bodies of water. This product is highly toxic to fish. Do not apply to Dominica Tree & Shrub when bees are active. Apply this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For best results, be sure to read and follow all label directions. Shake well before using.
NOTE:
- Read and follow directions when using.
- Do not spray the product near fish ponds, ponds, streams, or lakes.
- Remove armed feeding devices prior to application.

TREES & SHRUBS

General Information

Dominion Tree & Shrub is for use on outdoor trees and shrubs including broad, nut, and fruit trees, including apple, persimmon, plums, pears, oranges, peaches, walnuts, and other nuts listed in the table below.

Dominion Tree & Shrub quickly disperses in water allowing the insecticide to move through the soil into the plant base. Once in the soil, the insecticide moves up through the tree or shrub providing moving weed protection. Dominion Tree & Shrub will also provide protection to new growth.

NOTE: For complete protection, the insecticide must move through the tree or shrub. The time it takes to do this will depend on the size of the plant that is treated (two weeks to three months for very large trees).

For best results, use 1/2 pt./1000 sq. ft. of Trifluralin as a pre-emergent treatment program before new seed emergence. Dominion Tree & Shrub can be applied anytime except when the ground is saturated or frozen. Hose nozzles will reduce movement of the product down into the roots of the plant. When applying this product during dry periods, generously water the tree or shrub the night before treatment.

NOTE: Trees that are already heavily infested may not receive due to the existing pest damage and the resulting stress.

Application Instructions

Dominion Tree & Shrub is for use to kill the pests listed in the table below on outdoor trees including apple, cherry, persimmon, plum, peach, orange, pomegranate, and plum and shrubs.
How to Apply
1. Fill a bucket or watering can with 1 gallon of water (2 gallons of water for trees with circumference greater than 50"").
2. Place the bottle of Dominion Tree & Shrub™ well in advance of watering.
3. Carefully measure the amount of product needed and pour into the bucket of water.
4. Slowly pour the solution evenly around the tree or shrub. For best results, pour as close to the trunk as many times as possible.
5. Fill the bucket with clear water and pour it around the trunk as well.

NOTE: Do not make more than one application per year.

Determining Amount of Dominion Tree & Shrub™ to Use

Measure the distance around the tree trunk or the height of the shrub to determine the amount to use.

Trees with 1 trunk: Measure the distance around the trunk. Measure the distance in inches around the base of the tree, divide by 12 and multiply by 8.75 to get the number of ounces of Dominion Tree & Shrub™ to apply.

Example: A tree has a circumference of 72 inches. Divide 72 by 12 and multiply by 8.75 to get the number of ounces to apply.

Shrubs: Measure the height of the shrub to the nearest inch. Measure the distance around the base of the shrub, divide by 12 and multiply by 3.4 to get the number of ounces of Dominion Tree & Shrub™ to apply.

Shrubs with 2 or more trunks: Measure the distance around the shrub at its widest point. Divide by 12 and multiply by 3.4 to get the number of ounces of Dominion Tree & Shrub™ to apply.
